

Anjacom®

Anjacom® is a brand of engineering plastics manufactured by almaak International GmbH. It refers to a variety of materials suitable for different applications, particularly within the automotive industry.

Types:

Anjacom® encompasses various plastics like ABS (Acrylonitrile Butadiene Styrene), PA (Polyamide), PBT (Polybutylene Terephthalate), PC/ABS (Polycarbonate/Acrylonitrile Butadiene Styrene), and PBT+ASA (Polybutylene Terephthalate + Acrylonitrile Styrene Acrylate Copolymer). Each material offers distinct properties.

Properties:

Anjacom® plastics are generally known for their high heat resistance, rigidity, and durability [UL Prospector]. Some variations are even heat-stabilized and contain glass fiber fillers for additional strength [Omnexus - SpecialChem].

Applications:

Due to their properties, Anjacom® plastics are commonly used in automotive applications.
