

Title	Waste Separation at PT Mitsui Indonesia (PTMI) Office
Topic	Sustainability, Environmental
Article date	May 31st, 2024

Aligning with PTMI Office's Building Management initiatives, PTMI has started an internal trial by providing separate waste bins for organic, recycling, and residual waste in the office area. In Indonesia, where waste management is a significant issue and waste separation is not yet a habit, we hope this small step will contribute to ESG awareness starting from our office.
