For Healthcare[PSP]

Cloud x Medical Imaging

◆ As of 2020, PSP has introduced cloud PACs systems (picture archiving and communication systems) to around 1,100 medical facilities, which comprise **roughly 70% of the domestic cloud PACS market.**

◆ Manages **38 million patients** and handled **227 million lab orders/results**.

◆ The PHR service enables individual patients to view and manage the patient medical information on their smartphone stored in a medical institution.

◆ The **medical diagnostic imaging support AI platform business** uses AI to support diagnostic frontlines.

Main Business

Overview of Cloud PACS System

Cloud PACS
Medical imaging data is stored on the cloud safely and accessibly, making it possible to use it for a wide variety of purposes.

Medical Imaging AI Business
Supports development and sales of diagnostic imaging support AI to facilitate advanced medical care

PHR Business for Patients
Provides a service that enables individual patients to view and manage their own and family medical information on a smartphone
