The corporate governance of Mitsui & Co., Ltd. (the “Company” or “Mitsui”) is described below.

## I. Basic Views on Corporate Governance, Capital Structure, Corporate Profile and Other Basic Information

### 1. Basic Views

[Basic Corporate Governance Policy]

In structuring the corporate governance framework, Mitsui places emphasis on “improved transparency and accountability” and “the clarification of the division of roles between the oversight activities and executive activities of the management.”

For the “improved transparency and accountability,” Mitsui ensures sound supervision and monitoring of management with the viewpoint of External Directors and External Audit & Supervisory Board Members (hereinafter referred to as the “External Members”). Mitsui has also established an internal control system for disclosure so that all executives and employees fulfill their accountability to stakeholders under the principle of fair disclosure. For “the clarification of the division of roles between the oversight activities and executive activities of the management,” Mitsui delegates execution of business to Managing Officers substantially while the Board of Directors retains a supervisory role over Managing Officers’ business activities. Chief Operating Officers of 16 business units within headquarters and 2 regional business units serve concurrently as Managing Officers and engage in business operation for the consolidated group in a responsive and flexible manner.

While increasing the effectiveness of supervisory functions by having Audit & Supervisory Board Members, Mitsui implements corporate governance by maintaining an Audit & Supervisory Board system because it believes that having Internal Directors who are familiar with our business practices and operations is essential to the business of a global investment and trading company. By adopting a Committee System in which External Members participate, Mitsui achieves highly effective corporate governance to secure “improved transparency and accountability” and “the clarification of the division of roles between the oversight activities and executive activities of the management.” In order to realize effective corporate governance for shareholders and other stakeholders, Mitsui has established, and maintains, the following structures:

- (a) The Board of Directors is the highest authority for execution of business and supervision, and in order to ensure this function, Mitsui has set an appropriate number of Directors that enable effective discussion. As advisory committees to the Board of Directors, Mitsui also has in place the Governance Committee, the Nomination Committee and the Remuneration Committee, in which External Directors and/or External Audit & Supervisory Board Members also participate as members.
- (b) The Audit & Supervisory Board Members supervise the Directors' execution of duties as an independent institution with the mandate of the shareholders. For this purpose, Audit & Supervisory Board Members carry out multi-faceted, effective audit activities such as attending important internal meetings, verifying reports and investigating our business, and take necessary measures in a timely manner.

Regarding Mitsui's basic views and policies on Corporate Governance, we published "Mitsui & Co., Ltd. Corporate Governance and Internal Control Principles" on Mitsui's website as follows.

[https://www.mitsui.com/jp/en/company/outline/governance/system/pdf/corp\\_gov.pdf](https://www.mitsui.com/jp/en/company/outline/governance/system/pdf/corp_gov.pdf)

(Notes)

"External Director", "Audit & Supervisory Board Member" and "External Audit & Supervisory Board Member" are used in the same sense of "External Director", "*Kansayaku*" and "External *Kansayaku*" in the heading of the format of this Corporate Governance Report respectively. Further, "Independent Director" is an External Director who is unlikely to have conflicts of interest with general shareholders, as stipulated by the Tokyo Stock Exchange.

[Reasons for Non-compliance with the Principles of the Corporate Governance Code]

Mitsui complies with all Principles of the Corporate Governance Code.

[Disclosure Based on the Principles of the Corporate Governance Code]

[Principle 1.4 Cross-Shareholdings]

- Policy on holding and reducing listed shares for investment held for purposes other than pure investment purposes.

Regarding listed shares for investment held for purposes other than pure investment purposes including deemed stockholdings, the Company shall conduct stringent assessment about the probability of creating business opportunities, and building, maintaining and strengthening business and collaborative relationships with investee, in addition to profitability and capital efficiency.

At the same time, each year, the Board of Directors shall review the significance of and policy on holding such shares by verifying the economic rationality based on the status of dividends, business-related profits etc., compared to the total cost such as acquisition cost, fair value and our cost of capital, and by qualitative verification based on the status of and outlook for the creation of business opportunities, as well as business and collaborative relationship with each investee. If, as a result of this review, the rational of holding these assets has significantly diluted, our policy is to sell and reduce such shares.

#### Criteria of the classification of shares for investment

The criteria of classification of shares for investment held for pure investment purposes and shares for investment held for purposes other than pure investment purposes are as follows;

(Shares for investment held for pure investment purposes)

Investment held for the purposes of realizing gains solely arising from changes in the value of shares or dividends thereon;

(Shares for investment held for purposes other than pure investment purposes)

Shares for investment held for purposes other than for pure investment purposes.

#### Concept of the classification of shares for investment

We may hold investment shares for the purpose of creating new businesses and strong business clusters through both trading and business investment. In addition to profit from such trading, changes in the value of shares and dividends thereon, we strive to increase medium- to long-term economic profit by creating new business opportunities and raising corporate value by providing our functions.

Based on such business model, our criterion for the classification of shares for investment held for pure investment purposes is “Investment held for the purposes of realizing gains solely arising from changes in the value of shares or dividends thereon,” and one in which we can consider mainly about economic gain from the share in question at the time of its acquisition or disposal, without much consideration required on collaboration and business relationships with investees. Other investments are defined as shares for investment held for purposes other than pure investment purposes.

Regardless of the classification of shares for investment held for pure investment purposes and shares for investment held for purposes other than pure investment purposes, all shares will continue to be similarly verified in respect of the rationale for holding and the voting rights will be exercised appropriately.

#### ■ Verification details at the Board of Directors

Regarding the listed stocks held, the Board of Directors confirms the following verification details each fiscal year.

- The economic rationale behind the continued holding of each individual stock by comparing and examining related earnings, such as dividends and profit from related business transactions, to the cost of capital against the amount shown on the balance sheet at the end of the fiscal year.
- The qualitative rationale behind holding each individual stock.
- Stocks that we will consider divesting in the future due to the lessened significance of owning them based on both qualitative and quantitative factors.

#### ■ Policy on the exercise of voting rights of shares for investment

With respect to the exercise of voting rights of shares for investment, the content of each proposal shall be considered based on the management policies and business plans etc., of the investee, and deliberation shall be conducted on a case-by-case basis while comprehensively considering the perspectives of (1) whether or not the proposal contributes to enhancing corporate value of the investee or mutual benefit of the shareholders, and (2) the impact that the proposal may have on corporate value of the Company in terms of creation of business opportunities, and building, maintaining and strengthening of business and collaborative relationship with the investee.

[Management’s focus on cost of capital and the share price] [Last Update: June 19, 2024]

With the aim of continuously increasing our corporate value, our Corporate Management Committee and Board of Directors discussed and approved the Medium-term Management Plan ending in the FY March 31, 2026. The profitability indicators set forth in the plan are Core Operating Cash Flow, profit, and ROE. The target for ROE, which is used to measure capital efficiency, has been set to an average of more than 12% for the three-year period of the Medium-term Management Plan. We aim to continuously enhance ROE above the cost of capital through ROIC based management, which is used as an internal key performance indicator, and aim to improve profitability and lower the cost of capital through growth

investments that have a high probability of success by forming business clusters in familiar areas of business (in areas we do business or in adjacent areas). We also aim to strengthen shareholder returns by increasing the shareholder returns payout ratio and through the introduction of a progressive dividend, as well as continuously reviewing the optimal capital structure.

In addition, from the FY March 2023, ROE and ESG were introduced as factors of performance-linked restricted stock-based remuneration as part of director remuneration, in order to improve capital efficiency and to link it to the incentives of internal directors.

Please refer to “Medium-term Management Plan 2026 ~Creating Sustainable Futures~” on our website for details of specific initiatives to enhance our corporate value.

### 5. Other Special Circumstances which could have a Material Impact on Corporate Governance

#### (1) Approach and Policies related to Group Management

To achieve sustainable global growth for the Group, we are working to enhance the corporate value of the entire Group by organically linking Group companies and effectively utilizing the functions of each company. We respect the independence and autonomy of our subsidiaries and associated companies in their business operations and transactions, and conduct Group management based on the strategic and economic advantages of each company and synergies among Group companies.

#### (2) Policy on Holding Listed Subsidiaries

Mitsui does not own any listed subsidiaries and, in principle, will continue its policy of not owning any listed subsidiaries. Listed subsidiaries have advantages such as having greater business opportunities due to their high level of both brand recognition and credibility, ability to secure funding, strong systems of internal control, ability to maintain and improve employee motivation, and secure excellent personnel. However, for a parent company, it may be difficult to exercise influence over a listed subsidiary. In addition, since consideration must be given to conflicts of interest with minority shareholders, and in consideration of the impact on our medium- to long-term initiatives and our ability to rapidly reform and respond to changes in the environment, we have adopted a policy to, in principle, not hold listed subsidiaries.

#### (3) Policy on Holding Listed Associated Companies

As of the end of September 2024, Mitsui had six listed associated companies in Japan and eight outside Japan. Similar to listed subsidiaries, listed associated companies have advantages such as having greater

business opportunities due to their high level of both brand recognition and credibility, ability to secure funding, strong systems of internal control, ability to maintain and improve employee motivation, and secure excellent personnel. Although consideration of conflicts of interest with minority shareholders is required, we believe that there is sufficient rationality in holding a listed associated company based on its significance in terms of management strategy, such as the expansion of synergies between Mitsui and its Group companies.

(4) Measures to Ensure the Effectiveness of Governance Systems of Listed Associated Companies

Our basic policy is to respect the independence and autonomy of listed associated companies from the perspective of protecting the interests of minority shareholders. In addition, we will exercise our voting rights in listed associated companies by taking into consideration whether transactions with them will contribute to enhancing their corporate value and the interests of their shareholders, while taking care to avoid any conflict of interests from transactions with them.

(5) Agreements Related to the Group Management Approach and Policies

Mitsui has not entered into any agreements with listed associated companies related to its Group management approach and policies.

## Disclosure of Policy on Determining Remuneration Amounts and Calculation Methods

The Company has established the policy for determining the remuneration, etc. of individual Directors by resolution of the Board of Directors, following deliberation by and report of the Remuneration Committee. The remuneration for Directors of the Company is comprised of basic fixed remuneration, results-linked bonuses based on important management indicators for the Company, and performance-linked restricted stock-based remuneration and tenure-linked and restricted stock-based remuneration as medium- to long-term incentive remuneration. From the perspective of respecting the independence of External Directors and Audit & Supervisory Board Members who are independent from business execution, the External Directors and Audit & Supervisory Board Members are not eligible for the results-linked bonuses or stock-based remuneration.

The Company's Remuneration Committee is chaired by an External (Independent) Member. The Committee discusses the remuneration system for Directors and Audit & Supervisory Board Members, and examines the appropriateness of the level, proportions, etc. of fixed remuneration, results-linked bonuses, and medium- to long-term incentive remuneration based on trends at other companies and then reports this as well as the appropriateness of clawback provisions to the Board of Directors, among other measures, in order to emphasize transparency in the determination of Directors' and Audit & Supervisory Board Members' remuneration. Regarding the remuneration of individual Directors for the fiscal year ended March 31, 2024, after receiving the report of the Remuneration Committee, the Board of Directors has confirmed that the contents of the determined remuneration are consistent with the applicable policy and has judged that they are in line with such policy.

(1) Basic remuneration (fixed monetary remuneration) (Maximum amount: 1.0 billion yen per year)

The Company is to make monthly payment of a monetary amount determined according to rank.

(2) Results-linked bonuses (variable monetary remuneration)

(Maximum amount: 1.5 billion yen per year)

(a) Operating diverse businesses, the Company emphasizes consolidated profit for the year (attributable to owners of the parent) and Core Operating Cash Flow as common performance indicators, and references these when determining the dividend policy. Directors' bonuses are calculated using the following formula, which is linked to these performance indicators, and are paid once a year in cash.

(b) Total payment amount = (Consolidated profit for the year (attributable to owners of the parent) x 50% x 0.12%) + (Core Operating Cash Flow x 50% x 0.12%)

\* Note that the upper limit for the total payment amount is set at 1.5 billion yen and if the consolidated profit for the year (attributable to owners of the parent) is negative, i.e., loss, or if the Core Operating Cash Flow is negative, i.e., net cash outflow, this negative item will be calculated as 0.

\* The actual results of each performance indicator related to the results-linked bonuses for the fiscal year ended March 31, 2024 are as follows:

Consolidated Profit for the year (attributable to owners of the parent): 1,063.7 billion yen

Core Operating Cash Flow: 995.8 billion yen

Amount individually paid = Total amount of bonus x (Position points / Sum of position points)

Position	Chair	President	Executive Vice President	Senior Executive Managing Officer	Executive Managing Officer
Points	10	20	7	6	5

The number of Eligible Directors for performance-linked bonuses in the fiscal year ending March 31, 2025 will be reduced from nine (9) in the current fiscal year to six (6), and the amount of individual bonus payments will increase if the above formula is applied as is. Therefore, in order to make the amount of individual bonuses paid to said Directors nearly equal to the amount calculated by the current formula, the Company plans to revise the formula, which was determined by the Board of Directors based on a report from the Remuneration Committee concluding that it is appropriate, effective from the year ending March 31, 2025, to the following formula.

Amount individually paid = {(Consolidated profit for the year (attributable to owners of the parent) x 50% x 0.12%) + (Core Operating Cash Flow x 50% x 0.12%)} x Coefficient corresponding to the position of the relevant Director (%)

Position	Chair	President	Executive Vice President	Senior Executive Managing Officer	Executive Managing Officer
Coefficient	13.6	27.1	9.5	8.2	6.8

Note: The coefficient corresponding to each position is set by dividing the current position points by the average of the sum of the position points for the most recent ten fiscal years.

Note: The upper limit for the total payment amount is continuously set at 1.5 billion yen and if the consolidated profit for the year (attributable to owners of the parent) is negative, i.e., loss, or if the Core Operating Cash Flow is negative, i.e., net cash outflow, this negative item will be calculated as 0.

Based on the composition of the Directors as of the date of the issuance of this report and the Business Plan for the fiscal year ending March 31, 2025 (consolidated profit (attributable to owners of the parent) of 900 billion yen and Core Operating Cash Flow of 1,000 billion yen), the amounts that would be paid for each position are as follows:

Amount individually paid	=	{(Consolidated profit for the year (attributable to owners of the parent) 900.0 billion yen × 50% × 0.12%) + (Core Operating Cash Flow 1,000.0 billion yen × 50% × 0.12%)}	× Coefficient corresponding to the position of the relevant Director (%)	
Chair	=	1,140.0 million yen × 13.6%		= 155.04 million yen
President	=	1,140.0 million yen × 27.1%		= 308.94 million yen
Executive Vice President	=	1,140.0 million yen × 9.5%		= 108.30 million yen
Senior Executive Managing Officer	=	1,140.0 million yen × 8.2%		= 93.48 million yen
Executive Managing Officer	=	1,140.0 million yen × 6.8%		= 77.52 million yen

(3) Performance-linked restricted stock-based remuneration

(stock-based remuneration (variable) (Maximum amount: 600 million yen per year))

- (a) As an incentive to fulfill the Company's social responsibilities and continuously improve its medium-term performance and corporate value, the Company's common stock, with an established transfer restriction period, are delivered ex post according to the level of achievement of the Company's key management indicators as of the end of the evaluation period. The evaluation period is three fiscal years, and the initial evaluation period consists of the three fiscal years from the fiscal year ended March 31, 2023, which is the initial applicable fiscal year, to the fiscal year ending March 31, 2025. After the initial evaluation period, the evaluation period is the three fiscal years immediately preceding the granting year, and the common stock are granted every fiscal year (hereinafter referred to as the "Three-Year Rolling Period").
- (b) For the performance indicators during the initial evaluation period, as the management indicators that the Company focuses on, the Company selects ESG elements, including the response to ROE and climate change, and the amount of remuneration varies within a range from 80% to 120% according to the level of achievement of each indicator for the targets established by the Company. Since this system was introduced in the fiscal year ended March 31, 2023, and the initial evaluation period ends in the fiscal year ending March 31, 2025, there are no actual performance indicators for this evaluation period. Considering the accelerating pace of change in the surrounding global business environment, the Company needs to constantly review the management indicators, etc. that the Company must focus on. Accordingly, the appropriateness of the management indicators, targets, etc., the progress in achieving them and other related matters are regularly reviewed by the Remuneration Committee and the Board of Directors and are revised as necessary. In addition, during the evaluation period, the Company will not provide this stock-based remuneration if the Board of Directors determines that the provision of the stock-based remuneration would be inappropriate, particularly in the event of a mishap or impropriety deemed critical from the perspective of the Company's key management indicators (clawback provisions).

Performance-linked remuneration conditions for the fiscal year ended March 31, 2024

ROE (70%)	ROE	
ESG (30%)	E element (10%)	- Progress made in major business initiatives for halving the GHG impact by 2030 and achieving net-zero emissions by 2050 (qualitative evaluation) - Degree of achievement toward halving the GHG impact by 2030 and halving GHG emissions (Scope 1 and 2) by 2030 (quantitative evaluation)

	G element (10%)	- Average score of the responses (five-point scale) by External Members regarding important questions in the evaluation of effectiveness of the Board of Directors

Note 1: The evaluation plan for both ROE and ESG elements will be formulated after comprehensive consideration of the performance of each indicator during the three-year evaluation period, as well as the progress of matters related to each indicator.

Note 2: The ratios of ROE and all ESG elements for the fiscal year ended March 31, 2023 were set at 80%: 20%. However, after the review by the Remuneration Committee and the Board of Directors, such ratio of ROE and all ESG elements have changed to 70%: 30% for the fiscal year ended March 31, 2024.

(c) Number of shares granted: The number of shares granted is determined by the Board of Directors after the end of the evaluation period (Three-Year Rolling Period) in consideration of the report received from the Remuneration Committee, the clawback provisions according to the level of achievement of each indicator and other matters.

(4) Tenure-linked and restricted-stock-based remuneration (stock-based remuneration (fixed)) (Maximum amount: 1.0 billion yen per year)

To have a heightened sense of shared value with shareholders, common stock of the Company with a transfer restriction period and clawback provisions are granted to Directors, with the number of the common stock being determined according to rank (once per year).

- Restricted stock remuneration

Furthermore, eligible Directors for stock-based remuneration (hereinafter referred to as “Eligible Directors”) will receive the issuance or disposal of the shares based on the performance-linked and restricted-stock-based remuneration (stock-based remuneration (variable)) and tenure-linked and restricted-stock-based remuneration (stock-based remuneration (fixed)) (hereinafter collectively referred to as the “System”) in exchange for the in-kind investment of their full entitlement to receive monetary remuneration of the target fiscal year based on the resolution of the Company’s Board of Directors. The total number of common stock that will be newly issued or disposed to Eligible Directors by the Company under the System will be no more than 300,000 per year for performance-linked and restricted-stock-based remuneration and 500,000 per year for tenure-linked and restricted-stock-based remuneration (however, this number may be changed within reasonable limits if the Company’s common stock are affected by a stock split (including a free allotment of new common stock in the Company) or a reverse stock split after the date on which this Item is approved, or if other circumstances arise that necessitate

adjustments to the total number of the Company's common stock that are issued or disposed of as restricted shares). The paid-in amount per share will be determined by the Board of Directors based on the average daily closing price for the Company's common stock on the Tokyo Stock Exchange (excluding days on which there is no closing price, with the price to be rounded up to the nearest whole yen) in the three months immediately prior to the month containing the date of the Board of Directors' resolution concerning issuance or disposal of the shares, within a range that is not especially advantageous to the Eligible Directors. The issuance of shares under the System is conditional on the Company and the Eligible Directors entering into allocation agreements for the granting of the shares (hereinafter referred to as the "Allocation Agreements") in principle. An outline of the System, including the terms of the Allocation Agreements, is provided below and other matters shall be determined by the Board of Directors.

1. Restriction on transfer

The Eligible Directors will be unable to transfer, pawn, or otherwise dispose of the shares for a period of 30 years from the pay-in date (hereinafter referred to as the "Restriction on Transfer Period"). However, the restriction on disposal will be lifted if an Eligible Director retires as a Director and Managing Officer of the Company before the end of the Restriction on Transfer Period.

2. Grounds for acquisition without compensation and extinction of rights (Clawback provisions)

The Company will extinguish all or part of the right to receive performance-linked and restricted-stock-based remuneration and tenure-linked and restricted-stock-based remuneration and acquire without compensation all or part of the shares based on the System of an Eligible Director who engages in actions that contravene laws and regulations during the Restriction on Transfer Period, or on other grounds as stipulated in the Allocation Agreement.

- Composition of Director remuneration

The Company's Director remuneration is to consist of: (1) fixed remuneration (basic remuneration) and (2) results-linked bonuses (short-term incentive) as monetary remunerations, and (3) restricted stock remuneration (medium- to long-term incentive) as restricted-stock-based remuneration. Director remuneration currently consists of a roughly 3:1 mix of monetary remuneration to restricted-stock-based remuneration, and a roughly 1:2:1 mix of basic remuneration, short-term incentive, and medium- to long-term incentive.

< Effectiveness Improvement Initiatives in FY March 2025 >

The Board of Directors and Board of Directors Secretariat worked to address the following issues in FY March 2025:

- (1) Initiatives that contribute both to the enhancement of the quality of deliberations at Board meetings, and the improvement of meeting management efficiency

In the previous fiscal year's effectiveness evaluation, following the change to the governance structure after the General Meeting of Shareholders in June 2024, there were views expressed, including a call for even greater efforts to create opportunities for effective discussions with participation by all members and a comment that initiatives are needed to enhance the quality of deliberations in Board meetings. Based on these opinions, in FY March 2025, steps were taken to improve the quality of deliberations in Board meetings and improve the effectiveness of operation of the Board of Directors, including (1) the provision of pre-meeting briefings and the distribution of materials in a thorough and timely manner, (2) the enhancement of explanations about the positioning of individual projects in company-wide portfolio strategies, and (3) the efficient allocation of time for deliberations in Board meetings through the use of written resolutions and reports.

The following views were expressed in the FY 3/2025 Survey and at the Governance Committee meeting:

- Changes in the composition of the Board of Directors (through a reduction in the number of members and the adjustment of the ratios of internal and external directors) and the diversity of the Board have resulted in an improvement in the quality of deliberations by the Board of Directors.
- The provision of pre-meeting briefings and the creative compilation of materials have resulted in increased opportunities to hear explanations, not only about agenda items, but also about the overall situation, including the positioning of items in overall strategies and the impact on resource allocations.
- Owing to the use of written resolutions, the Board of Directors has been able to select projects and items for discussion in a prioritized manner.

Moreover, in response to the results of the FY 3/2025 Survey, new initiatives have been launched promptly, including consideration of earlier distribution of materials for the Board meetings than before, and an expanded scope of, and improved efficiency of, information sharing by the company

management.

- (2) Further enhancement and efficient management of various forums designed to deepen deliberations at Board meetings, including pre-meeting briefings and free discussion sessions, as well as more opportunities for exchanges of views among directors and Audit & Supervisory Board Members

Comments in the previous fiscal year's effectiveness evaluation survey included a call for further initiatives to deepen and enliven discussions in Board meetings, and a suggestion that there should be opportunities for Board members to share their knowledge. Initiatives in FY March 2025 in response to these opinions included (1) the creation of more flexible attendance options for Board meetings, (2) the provision of thorough and timely pre-meeting briefings for External Members, especially in relation to large-scale and important projects, (3) the establishment of a forum for exchanges of views between external directors and Audit & Supervisory Board members, and (4) the creation of opportunities for exchanges of views between external directors and external Audit & Supervisory Board members.

Views expressed in the FY 3/2025 Survey included the following:

- Pre-meeting briefings before Board meetings and the creative compilation of distributed materials have been facilitating thorough and energetic discussions in Board meetings.
- There are now more opportunities to learn about and discuss issues facing Mitsui, including free discussion sessions and informal meetings between Audit & Supervisory Board members and external directors.

< Outline of the Results of the Effectiveness Evaluation for FY March 2025 >

The evaluation of the effectiveness of the Board of Directors in FY March 2025 was confirmed on the basis of the FY 3/2025 Survey, discussions at an External Members meeting, and deliberations by the Governance Committee, Executive Committee, and Board of Directors.

- The Board has become an appropriate forum for discussions about both governance and growth strategies. The Chairman has efficiently managed discussions within the limited time available.
- Reporting and discussion of management issues from comprehensive and company-wide perspectives have been also contributing to deliberations about individual projects.
- In addition to vigorous discussion led by External Directors, active and constructive input from Audit & Supervisory Board members, and the participation of external Audit & Supervisory Board members in advisory committee meetings have been helping to ensure the effectiveness of the Board of Directors.
- Based on past experience, Mitsui has adopted the company with Audit & Supervisory Board model, under which a highly independent Audit & Supervisory Board and its members provide extremely effective checks and balances for directors and the Board of Directors. This structure, combined with an increase in the percentage of External Directors to ensure the transparency of discussions by the Board of Directors, is functioning very effectively at present, and there seems to be no reason to make hasty changes to the institutional design. The best path forward is to enhance effectiveness within the framework of the company with Audit & Supervisory Board structure, while continuing to discuss the structure.

- The composition of the Board of Directors (through a reduction in the number of members and the adjustment of the ratios of Internal and External Directors) and the diversity of the Board have resulted in high-quality deliberations and a high level of effectiveness. There should be continuing discussions about whether further improvements can be made, based on input from institutional investors and others.

Based on the preceding summary, the Board of Directors determined that an appropriate level of effectiveness was achieved in FY March 2025. However, we will take further actions on the following issues in order to achieve further improvements in effectiveness.

< Initiative toward the Further Improvement of Effectiveness >

Initiative for FY March 2026

Further deepening of Board discussions and improvement of administrative efficiency

The following views were put forward in the FY 3/2025 Survey and during discussions at the External Members meeting, Governance Committee meeting, and other forums, concerning initiatives to achieve further improvements in effectiveness:

- Earlier distribution of materials to make full use of the insights of External Directors.
- An increase in opportunities to share views about growth strategies, as well as about monitoring from a defensive viewpoint, such as compliance, occupational safety and health, and risk management.

Based on these views, we will consider the following initiatives with the aim of enhancing and deepening Board deliberations while also improving the efficiency of meeting administration:

- (1) Encouraging more interactive discussions among Internal Directors and External Members.
- (2) Fostering broader and more sophisticated discussion in Board meetings.

Medium-term to long-term term initiative

Continuing consideration of the governance structure, including the institutional design, based on annual evaluations of the effectiveness of the Board of Directors and the results of dialogue with stakeholders.

We will not assume that the current governance structure is the ultimate one for us. Instead, we will continue to discuss Mitsui's governance structure based on annual evaluations of the effectiveness of the Board of Directors, and social expectations, including stakeholders' opinions.

The Board of Directors will continue its efforts to achieve sustainable improvement in Mitsui's corporate value by implementing measures to further enhance its effectiveness, including taking into consideration the aspects outlined above, and by providing effective supervision of management.

- With respect to internal Audit & Supervisory Board Members, person well-acquainted with actual conditions of the company and possessing capability to conduct appropriate audits

(iii) Internal auditing

- The “Mitsui & Co., Ltd. Corporate Governance and Internal Control Principles,” which set forth the company’s basic philosophy and policy on corporate governance, clearly stipulate the roles and responsibilities of the Internal Auditing Division as follows: “Based on the annual report and other reports endorsed by the management, the Internal Auditing Division assumes the role and responsibilities for independently verifying the effectiveness of design and operation of internal control, reflecting management and business targets along with risk, of organizations provided for in the Rules on Internal Audits.” Based on these principles, as the third line in the three-line model, the Internal Auditing Division independently and objectively evaluates the appropriateness and effectiveness of governance, risk management, and internal controls in consolidated business management, and provides value-added recommendations, findings, and insights for improvements. By doing this, the Internal Auditing Division aims to make Mitsui & Co. Group better and stronger and to contribute to the Group’s sustainable growth.
- In addition, pursuant to the Financial Instruments and Exchange Act of Japan, the Internal Auditing Division also compiles and verifies, as an independent organization, the results of assessments of the Company-wide internal controls in relation to financial reporting, and submits proposals based on the said results to the J-SOX Committee.
- In order to ensure the independence and objectivity of internal audits, the Internal Auditing Division is under the direct supervision of the President of Mitsui. At Mitsui, a chief internal auditor is referred to as an executive internal auditor. For the position of executive internal auditor, a person who has extensive business experience both in Japan and overseas, as well as considerable experience in executing a top management position at a business division or an affiliated company (such as the General Manager of a Head Office division or the president of an affiliated company), and who possesses sufficient knowledge and an excellent track record of discovering issues that the organization faces and proposing specific improvement measures from a management perspective, is selected. For the position of senior auditing manager, who works together with the said executive internal auditor in a team, a person who has experience in executing a management position at a medium-sized organization in a business unit or a corporate division (such as a departmental General Manager at the Head Office), and who is able to perform internal auditing practices from a business frontline perspective together with the executive internal auditor, is selected. As of the end of March 2024, 77 staff members belong to the Internal Auditing Division, which number comprises the General Manager (Managing Officer), 32 executive internal auditors, 34 senior auditing managers, and 10 staff members, and

they are assigned to the Internal Auditing Division of the Head Office (69 people) and overseas offices (8 people).

- In order to ensure the effectiveness of internal audits, and as part of efforts to further acquire and improve their expertise as auditors, we actively encourage auditors to obtain qualifications that will contribute to internal audit operations. Currently the total number of Certified Internal Auditors (CIA), Certified Fraud Examiners (CFE), Certified Information Systems Auditors (CISA), and US Certified Public Accountants (USCPA) at the Internal Auditing Division is 50 people.
- Internal auditing methods can be broadly classified into two categories. The first is regular internal audits, in which not only are audits conducted from a compliance point of view but recommendations are also made from a management perspective. As audit target units, based on a risk approach, approximately 500 organizations are identified from among divisions/departments in Japan, overseas trading affiliates, affiliated companies in Japan and overseas, etc., and the audits for such units are completed in a period of approximately three to six years, with intervals applied in accordance with the level of the risks concerned. Moreover, for those matters that have been identified as requiring improvement in the regular internal audits, the audited units concerned are required to report on the progress of remediation measures, and the follow-up process is generally completed within a period of six months to a year.
- The second internal auditing method is management thematic audits, which focus on providing advisory functions of surveying and confirming, in a cross-sectional manner, those matters that could directly lead to company-wide risks, and making recommendations regarding such risks to management. The purposes of these thematic audits are to raise awareness and provide insight for resolving management issues with the aim of increasing corporate value, and to provide opportunities for management to make decisions towards attaining that goal. In the fiscal year ended March 31, 2024, we conducted thematic audits on “Recruitment and Compensation at Domestic Affiliates” and “Group Management System for Occupational Safety.”
- The results of the regular internal audits and management thematic audits are reported in writing each time they are carried out, and the General Manager of the Internal Auditing Division also reports directly to the President and Full-time Audit & Supervisory Board Members at least on a monthly basis. In addition, as part of dual reporting initiatives, the results of the regular internal audits and the management thematic audits are also reported directly to the Board of Directors and the Audit & Supervisory Board Members on a regular basis.

These internal audit activities are not limited to annual internal assessment, but are also subject to quality evaluations by external experts once every five years based on international internal audit standards, in order to maintain and improve the quality of audits on an ongoing basis.

(iv) Auditing of financial statements

- For the year ended March 31, 2024, the certified public accountants executing audits on our financial statements are the following three people, who all belong to Deloitte Touche

Tohmatsu LLC: Shuichi Morishige, Yoichi Matsushita, and Taro Ogi. The period successively involved in the audit by Deloitte Touche Tohmatsu LLC is 51 years. The number of assistants involved in auditing work for the fiscal year ended March 31, 2024 is 138 people, and this number is comprised of 30 certified public accountants, 22 members who passed the certified public accountants examination, and 86 others.

- Rotations of the partners were conducted properly. A partner does not serve our company for more than seven consecutive fiscal years. In addition, a lead audit engagement partner does not serve our company for more than five consecutive fiscal years.
- In order to secure prompt financial closing and reliability, the auditing work of Mitsui and its consolidated subsidiaries is in principle entrusted solely to Deloitte Touche Tohmatsu. Mitsui's Independent Auditors implement auditing under the Companies Act of Japan and the Financial Instruments and Exchange Act of Japan as well as auditing of the consolidated financial statements in English.

## 2. Framework for internal control and execution of business activities

- Ultimate responsibility for execution of business operations lies with the President and Chief Executive Officer. The President and Chief Executive Officer delegates authority to the Chief Operating Officers of the business units and regional business units, who, in turn, report to the President and Chief Executive Officer. The Corporate Management Committee is organized for deliberating the basic policies and important matters relating to the overall management. Even after the transition, Mitsui maintains its internal control system by positioning the internal control as the structure by which the management controls the executive body, aiming for: (1) "Improvement of effectiveness and efficiency of operations," (2) "Compliance with accounting standards and securing reliability of financial reporting," (3) "Compliance with laws, rules that are equivalent to the laws, and observance of management philosophy and company rules including all codes of conduct which reflect this philosophy," and (4) "The safeguarding of company assets;" and consists of: "control environment," "risk assessment," "control activities," "information and communication," "monitoring," and "response to IT." These objectives and components are as stated in the basic framework designated in "Standards and Practice Standards for Management Assessment and Audit concerning Internal Control Over Financial Reporting," issued by the advisory board to the Commissioner of the Financial Services Agency.

## IV. Matters Related to the Internal Control System

### Basic Views on Internal Control System and the Progress of System Development

Regarding internal control system and the related units, see II.2.2 “*Framework for internal control and execution of business activities*”. In the construction of internal control processes, aiming to achieve the above mentioned objective of the internal control process – “Improvement of effectiveness and efficiency of operations,” “Compliance with accounting standards and securing reliability of financial reporting,” “Compliance with laws, rules that are equivalent to the laws, and observance of management philosophy and company rules including all codes of conduct which reflect this philosophy,” and “The conservation of company assets” – the following systems are implemented.

#### 1. Risk management system

Risks arising from business activities are monitored and managed by Chief Operating Officers of business units and regional business units within their authorization delegated from management. Risks associated with our business include quantitative risks such as credit risk, market risk, business risk arising from affiliated companies’ businesses and country risk, as well as qualitative risks such as compliance risk and operational risk. Measures taken by each business unit to manage quantitative risks include setting of position limits and loss-cut limits as well as monitoring of positions by divisions with relevant expertise. For the management of qualitative risks, the business units are obligated to observe related internal regulations. When a business unit or a regional business unit takes risks greater than the scope of authority granted to the Chief Operating Officers, it is necessary to obtain approval of the Corporate Management Committee or a Representative Director in charge, or a Senior Managing Officer in charge, depending on the importance of the case, in accordance with the standards of the internal approval system.

Furthermore, as stated in II.2.1. “Corporate Governance Structure” as committees responsible for business execution and the internal control system, organizations such as the Portfolio Management Committee, Compliance Committee, Disclosure Committee and J-SOX Committee, the Sustainability Committee, and the Crisis Management Headquarters establish and develop the risk management structures and handle significant risks. These committees consist of Managing Officers and the General Managers of Corporate Staff Units. With respect to the risks in the fields they are in charge of, each division of the Corporate Staff Units is responsible for surveillance of the whole Company’s positions, control within the prescribed range of their authority, and supporting the relevant Directors and Managing Officers.

#### 2. Internal control over financial reporting

As a result of the termination of the SEC registration, Mitsui implements the internal control framework as stipulated in the Financial Instruments and Exchange Act of Japan from the year ended March 2012. In addition to the Company-wide discipline, Mitsui has been conducting self-assessment by units subject to evaluation and testing by an independent division concerning the effectiveness of accounting and financial closing controls, IT controls, and business process level controls. After comprehensively assessing the above, Mitsui management confirmed that internal control over financial reporting is effective for the fiscal year ended March 31, 2024.

3. Internal controls regarding construction and management of information systems and information security

“Information Technology (IT) policy” is declared as a basic policy for IT utilization to promote further awareness raising of employees and enhancement of IT governance. The important principles for our global group information strategy are formulated in line with the corporate management policy through the discussions at the Information Strategy Committee established pursuant to the “Rules of Information Strategy Committee.” Under the system centered around the Information Strategy Committee, we are enhancing the system of internal control including management of various possible risks such as information leakage and cyber-attacks through maintenance of the rules, necessary in light of development and operation of information systems and information security.

“Rules on Information System Management”: rules on the process of procurement, introduction and operation of Information assets

“Rules on IT Security”: code of conduct for the system supervisory divisions regarding IT security

“Rules on Information Management”: basic policies in terms of information risk management system and information management

“Rules on Protection of Personal Information”: rules for the handling of personal information required for business execution (Applied only in Japan)

“Rules on Cyber Security Countermeasures”: rules for preventive measures against cyber-attacks and emergency countermeasures in the event of incident

“Mitsui Group Cyber Security Principles”: basic cyber security measures aimed at being implemented in common across Mitsui Group companies

4. Compliance structure

In addition to the Compliance Committee, (see II.2.1 “*Corporate Governance Structure*”), chaired by the Chief Compliance Officer, Mitsui implements a compliance management system supervised by line managers at business division and department level. Further, Compliance Supervising Officers (“CSO”) are designated at domestic and overseas units, branch offices and others. Compliance Administrator is also designated in each business unit, who assists CSO, namely COO of each business unit, in the execution of his/her duties, and accelerates efforts to ensure compliance and promote integrity in a more practical manner.

Mitsui has set forth the “Business Conduct Guidelines for Employees and Officers of Mitsui & Co., Ltd.” (“Guidelines”) and has equivalent business conduct guidelines in place at its subsidiaries as well. Mitsui is striving to improve observance of the Guidelines through continuous monitoring and reviewing. Additionally, to further clarify our basic approach toward integrity and compliance on a global group basis, we have put together the “Mitsui & Co. Group Conduct Guidelines” to be shared by Mitsui & Co. Group companies. Please refer to the “Business Conduct Guidelines for Employees and Officers of Mitsui & Co., Ltd.” or “Mitsui & Co. Group Conduct Guidelines” released on the Mitsui’s website. Mitsui has a total of eight whistle-blowing avenues in place, including those involving an external attorney at law and a third-party providing hotline services. Mitsui makes sure that its domestic affiliated companies are also able to use the whistle-blowing routes (external attorneys at law and a third-party providing hotline services) designated by Mitsui in order to (i) maintain a high standard of confidentiality and (ii) enable their employees to use these routes without uneasiness. In the fiscal year ended March 31, 2024, Mitsui implemented e-learning based on the actual incidents for all employees to promote awareness on whistle-blowing. Mitsui’s overseas offices and overseas

affiliated companies also have whistle-blowing systems that have been put in place after considering applicable local laws and regional characteristics. Furthermore, Mitsui prohibits treating a whistleblower disadvantageously for using the whistleblowing system and any retaliation under internal rules and regulations. Any instances of a compliance violation are handled strictly, including disciplinary actions in accordance with the Employment Regulations of Mitsui & Co., Ltd.

5. Systems to secure appropriateness of operations within the corporate group

In March 2006, Mitsui established the “Mitsui & Co., Ltd. Corporate Governance and Internal Control Principles” (“Principles”). In light of other laws and regulations and to the extent reasonable, Mitsui requires its subsidiaries to develop and operate internal controls based on these Principles, and for its equity accounted investees, Mitsui coordinates with other equity participants and encourages the equity accounted investees to develop and operate similar internal controls. For internal controls to secure reliability in financial reporting, see IV.1.2. “*Internal control over financial reporting*” above. In addition, to its officers and employees, Mitsui appoints supervising officers for its affiliated companies and has them engage in their duties based on the “Rules on Delegation of Authority for Supervising Officers for Affiliated Companies.” Also, when Mitsui deploys full-time audit & supervisory board members in major affiliated companies, Mitsui selects personnel from the Internal Auditing Division rather than from related business units to enhance the independence of auditing.

2. Basic Views on Eliminating Anti-Social Forces

1. Mitsui reacts resolutely towards antisocial forces, and will not, as a matter of principle, conduct business with antisocial forces or with parties that have relations with antisocial forces.
2. Mitsui specifies the abovementioned principle in its “Business Conduct Guidelines”, and makes this thoroughly known to its officers and employees. To reject antisocial forces, and to make this a company-wide stance, insertion of a clause within contracts rejecting antisocial forces is encouraged, and by placing a response unit, a system enabling routine coordination with external professionals, such as police and lawyers, is established.

  - (1) Mitsui has formulated principles and a basic policy and developed an internal structure relating to statutory disclosure, timely disclosure and other important disclosure materials and disclosing acts on an internal and external consolidated basis. We have also established the Disclosure Committee to examine highly urgent IR matters and formulate measures. The Disclosure Committee is a subordinate organization of the Corporate Management Committee. It is headed by the CFO and co-headed by CSO and General Counsel, and its members are the General Managers of the relevant corporate staff divisions. The Investor Relations Division, which acts as the secretariat for the Disclosure Committee, works with IR staff assigned to corporate staff divisions and business units to prepare drafts of disclosure documents and analyze points for discussion in response to directives from the Disclosure Committee.
  - (2) In its Corporate Disclosure Policy, Mitsui has defined the fundamental requirements and procedures for the disclosure of information that investors need to make appropriate decisions. This policy has been posted on the Company's website.
  - (3) Mitsui has established the Investor Relations Division as the unit responsible for disclosure to investors. This Division is in charge of administrative processes relating to timely disclosure and is responsible for the monitoring and management of facts, financial data, and other information that could have a material impact on investors' decisions, and for the accurate and timely disclosure of that information.
2. Facts that could have a material impact on investors' decisions
  - (1) Management of information relating to timely disclosure is integrated within the Investor Relations Division, which is the unit responsible for communication with the Tokyo Stock Exchange. When disclosing important new facts, the Investor Relations Division, determines the content of the disclosure. If necessary, it first examines the information in consultation with the corporate staff divisions that make up the Disclosure Committee and consults with the Corporate Communications Division, which is responsible for interaction with the media.
  - (2) If a high-level management decision is required concerning the disclosure method and timing, etc., disclosure will be carried out after deliberation by the Disclosure Committee, and, if necessary, after approval has been obtained from the Corporate Management Committee.

- (3) The Investor Relations Division is responsible for day-to-day communications among internal units in preparation for the disclosure of important information. Internal units are required to inform the Investor Relations Division about progress on important businesses through the corporate organization. To align the viewpoints of the corporate organization and frontline business units, the Investor Relations Division holds regular meetings with each business unit after the publication of quarterly financial results. The purpose of these meetings is to share information about market reactions to information disclosed at the corporate or individual business unit level, and about important disclosure items going forward.

\*3 During regular audits, items to be audited are identified based on risk factors, and an independent and objective evaluation is carried out in accordance with international internal audit standards. Continuous efforts are made to maintain and improve the qualities of these internal auditing activities through measures such as quality evaluations by external specialists.
