3. Reason

In accordance with our principal intention to steadily increase dividends through improvements in corporate performance, we decided to pay an interim dividend of ¥40 per share, and envisage an annual dividend of ¥80 per share (including the interim dividend of ¥40 per share), taking into consideration of
our higher core operating cash flow than the business plan and the expansion of the underlying base profit, as described in the consolidated financial results for the six-month period ended September 30, 2018 announced today.
