business innovation.

MITSUI & CO., LTD.

Integrated Report 2020
Publication of an Integrated Report

“Let not short-term gains tempt your mind, seek only enduring prosperity by embracing grand aspirations.”

These words from the first president of the former Mitsui & Co., Takashi Masuda, represent our foundation. His words urge us to avoid becoming overly focused on near-term profit. Rather, we must realize growth by creating businesses that contribute to society’s long-term development.

In May 2020, Mitsui released a revised version of its Mission, Vision, Values, our corporate management philosophy to coincide with the announcement of Medium-term Management Plan 2023—Transform and Grow. Revised for the first time in 16 years, the new philosophy puts Takashi Masuda’s message front and center and includes a vision whereby “As Challengers and Innovators, we create and grow business while addressing material issues for sustainable development.”

When preparing the new plan, we set goals for respective frontline operations by keeping firmly in mind the Materiality that we had previously revised in 2019 and which is the base of our business activities. More specifically, we discussed the aspects of our Materiality on which each type of day-to-day work and activity should focus.

In 2015, the United Nations identified priority tasks and set out a concrete plan of action for humanity, the earth, and global prosperity with the adoption of 17 Sustainable Development Goals (SDGs) and 169 related targets. The SDGs are embedded in Mitsui’s Materiality. I believe that by placing Materiality at the core of a broad range of businesses and activities we can help address the issues listed in the SDGs.

Efforts to realize a sustainable society are becoming ever more important due to the unprecedented speed of social change being driven by the emergence of COVID-19. In adapting to this dramatic change, Mitsui will leverage the wide-ranging network that it has developed over a long history as a general trading company. Moreover, we will reform the mindset of each employee based on the words of Takashi Masuda cited earlier. In addition, Mitsui will achieve growth by drawing on its “Challengers and Innovators’ DNA to create businesses that help address social issues.

In preparing our third integrated report, we referred to the International Integrated Reporting Framework propounded by the International Integrated Reporting Council (IIRC), the Guidance for Collaborative Value Creation issued by the Ministry of Economy, Trade and Industry, and a large volume of feedback received from stakeholders. Also, the report has been prepared through close collaboration among a range of ‘in-house divisions to provide our holistic perspective of the Group. I believe that this process reflects a sincere and honest commitment to explaining our value creation in a readily understandable manner.

August 2020
Masami Iijima
Representative Director and Chairman of the Board of Directors
Chairman of the Governance Committee

This integrated report summarizes relevant information with a particular focus on factors that impact Mitsui’s corporate value. In addition to this report, the Company publishes various communication tools for Mitsui’s stakeholders (please refer to the end of this report for details on reports issued by the Company).

In this section, we explain what kind of value Mitsui will continue to create. Mitsui’s direction rooted in a long-term outlook, our vision, and the corporate culture and people who will make this vision a reality.

This section draws a picture of our strategy, as Mitsui strives to increase corporate value in any era. We also discuss Mitsui’s strengths and strategies.

Medium-term Management Plan 2023—Transform and Grow—commenced in April 2020. Here, we summarize this new management plan while reviewing the progress made under the previous medium-term management plan.

As a general trading company involved in a broad array of business domains, Mitsui must constantly seek a sophisticated level of corporate governance. In this section, we discuss Mitsui’s constantly evolving management foundation.

This section summarizes a variety of data about Mitsui.

A Cautory Note on Forward-Looking Statements:

This report contains statements (including figures) regarding Mitsui & Co., Ltd. (“Mitsui”)’s corporate strategies, objectives, and views of future developments that are forward-looking in nature and are not simply restatements of historical facts. These statements are presented to inform stakeholders of the views of Mitsui’s management but should not be relied on solely in making investment and other decisions. You should be aware that a number of known or unknown risks, uncertainties and other factors could lead to outcomes that differ materially from those presented in such forward-looking statements. These risks, uncertainties and other factors referred to above include, but are not limited to, those contained in Mitsui’s latest Annual Securities Report and Quarterly Securities Report, and Mitsui undertakes no obligation to publicly update or revise any forward-looking statements.
Mitsui’s Value Creation
Roadmap to Value Creation with “Challenge and Innovation” DNA

Mitsui has created value for industry for many years, while evolving its own business models in response to trends of the times and changes in society. Mitsui continues to contributes to the sustainable development of society through its business activities, by drawing up and executing business strategies that leverage its cultivated strengths, while keeping in mind its future direction.
Understanding the business environment: Opportunities amid the COVID-19 pandemic

The spread of the novel coronavirus in Japan abated after the state of emergency declaration and other measures taken earlier in 2020, but the trend is now reversing with more infection cases being reported. As the nation works to balance infection countermeasures with economic continuity, Japan's economy is still only slowly recovering. Looking at the situation worldwide, there is absolutely no cause for complacency, with infection still spreading in developing nations amid fears of a second or third wave of infections on a global basis.

Our management priority is the health and safety of our employees and their families across our group operations worldwide. The health and safety of our people is the foundation of business, without which we cannot hope for an early return to a growth trajectory. We have a range of measures in place that reflect the circumstances and medical services in each country.

Our next priority is to maintain our businesses in each area, and in doing this I think it is important to maintain strong relationships with our business partners, customers, and vendors. These relationships, developed over many years, are a crucial asset and a key source of our competitiveness and differentiation. We are all faced with the issue of how to protect and ultimately grow our individual businesses in this severe environment, so while directing our teams at the business front line to communicate closely and frequently with our counterparts through online meetings and such, I am also personally engaged in this process.

A phrase being heard these days is “living with the virus,” which raises the questions: what do we change, and what do we leave unchanged? As we begin the “New Normal,” I want Mitsui to take on challenges on every front, and I want to increase our resilience—our adaptability and toughness.

Although pundits have sometimes questioned the need for sogo shosha, we can take pride in our track record of using our comprehensive capabilities to forge new paths when old business models have become obsolete. Recently I have been talking to internal and external audiences about “Mitsui being horizontal.” I use this expression to explain the idea that for a company like ours, which has multiple businesses in diverse areas, we can make best use of our strengths when we pursue the creation of new work and new value by reaching horizontally across our organization, looking beyond the verticals of any particular business sector. This is because, from a global perspective, few of Mitsui’s businesses could be described as large—so to compete on the global stage we must create new value by linking our businesses horizontally.

The relocation to our new head office in May 2020, marking our return to Otemachi after five and a half years, will support our horizontal business development initiatives. In preparing for this relocation, we established a project team to comprehensively rethink the purpose of our office, to consider new working styles, and to develop the systems, physical design and facilities required to realize our goals. I define an office as a place where diverse individuals come together to stimulate intellectual fusion and to catalyze the creation of new business. Of course, our new offices enable each division to work effectively, but they are also designed to promote and facilitate cooperation between divisions, so that we can create new collaborative businesses in a sustainable cycle of corporate value accretion.

Many of the initiatives we undertook in preparing for our office move have proven useful in responding to the pandemic. Going paperless, adopting digital tools and other steps we took to modernize the way we work made the enforced transition to working from home a relatively seamless process, and amid the emerging “New Normal” that combines public health and economic necessities, our working style has been a...
CEO Message

Looking back on the previous medium-term management plan

During the period of the previous medium-term management plan, we successfully bolstered our profit base in Resources & Energy, and strengthened non-resource areas, particularly Machinery & Infrastructure and Lifestyle, in line with the plan’s key initiatives of “Build a robust profit base and thoroughly strengthen existing businesses” and “Establish selected new growth areas.” In the focus areas of environment and health, we further developed our LNG business and expanded the business base of our healthcare business. We also strengthened cash flow management, implementing flexible capital allocation including for shareholder returns, in accordance with the cash flow allocation framework, while tightening investment discipline.

Regarding innovation functions, we launched Moon Creative Lab, which has locations in both the U.S. and Japan. This initiative aims to create new business models based on employee ideas as well as customer and partner feedback. In addition, Mitsui continued to drive personnel initiatives at a global level, including the development of next-generation leaders, while at the same time strengthening governance by improving the effectiveness of the Board and through other initiatives.

Nevertheless, the challenges that remain from the previous plan are clear. The first of which is the urgent need to further improve the profitability of our existing businesses. While building up quality assets is important, we must first ensure that we raise the profitability of individual projects. We must also focus management resources on growth areas where we can demonstrate Mitsui’s strengths and establish new revenue pillars. In the previous plan, we designated Mobility, Healthcare, Nutrition & Agriculture, and Retail & Services as our four growth areas, but I want to further refine these and establish a system so that we can sharpen our business activities. We expect the rate of change in the structure of society and industry to accelerate further, and so, in addition to strengthening our resistance to downturns through risk management and by reducing costs, we view digitalization and decarbonization as opportunities to further accelerate our growth.

Medium-term Management Plan 2023 — “Transform and Grow”

Despite continued uncertainty about the future due to COVID-19, we announced our Medium-term Management Plan 2023 on May 1, 2020. Even now, it is unclear what level of recovery can be expected upon resumption of economic activity at the end of the COVID-19 pandemic, and it is extremely difficult to foresee its quantitative impact. There was much discussion within the Company as to whether we should even announce this new management plan in May. Ultimately, however, we decided that it was important to share Mitsui’s business direction based on a certain set of assumptions with internal and external stakeholders, and that the plan may also act as a compass for employees during this uncertain time. I hope that sharing our thoughts and what we believe to be the path for Mitsui will lead to valuable dialogue with our many stakeholders—customers, business partners, shareholders, etc. We plan to revise and disclose quantitative plans as appropriate and will continue to exercise highly transparent management.

“Transform and Grow” is the theme of the new medium-term management plan—a plan that has been created in consideration of the challenges that remain from the period of the previous plan. While there is much uncertainty about a world where we must learn to coexist with COVID-19, in the medium to long term, I believe that Mitsui must not waver from its path, rather we should accelerate forward to transformation and growth.

Mitsui’s target of 400 billion yen in profit for the year ending March 2023 is not a large increase from 391.5 billion yen in profit for the year ended...
March 2020. However, we plan to achieve 240 billion yen in profit for the year in non-resource areas, which would be a record and higher than the 170 billion yen planned for resources. While it is hard to envision a situation where commodity prices rise and remain high due to the ongoing impact of COVID-19, we are steadily growing our non-resource business base as a counterbalance to our resource business.

In resource areas we are being conservative with iron ore and coking coal price estimates due to concerns about a global downturn in demand in the short and medium term. Furthermore, amid expectations that a return to previous oil and gas price levels from the rapid decline witnessed since the beginning of the year will take time, the outlook is for the harsh business environment in Resources and Energy to continue for the next three years. Nevertheless, during this period there will be no change to our policy of enhancing our strengths. We will pursue thorough cost reductions in existing businesses and maintain competitiveness while pushing ahead with the development of new deposits at our Australian iron ore operations and with LNG projects in Mozambique and the Russian Arctic Circle. Conversely, in non-resource areas, I believe we will achieve strong growth over the coming three years and I have high expectations in particular for contributions to earnings resulting from growth in ICT core businesses, from digital and EC enhancement of retail business, recovery of market and trading businesses in chemicals, and IPP and FPSO start-ups.

In the current medium-term management plan, we are aiming to thoroughly strengthen core businesses. In the past, we tended to focus on making investments, but we are now introducing ROE as an internal management indicator to shift our focus to capital efficiency improvement, and we are aiming to enhance ROE by strengthening budget control. We will raise profitability in several industries by accelerating measures to enhance competitiveness through restructuring.

We have identified Energy Solutions, Health-care/Nutrition, and Market Asia as three areas of strategic focus and Mitsui’s next profit pillars. Through the implementation of initiatives in previous fiscal years, these have emerged convincingly as areas in which Mitsui can leverage its comprehensive strengths. In Energy Solutions we will pursue smart energy services and businesses that contribute to mitigating climate change with LNG development and renewable energy projects as the central platform. In Health-care/Nutrition, IHH will be the central platform as we accelerate growth in medical data and integrated facilities management, among others. In addition, in recognition of the power shift to the consumer, particularly in Asia, we will establish a growth platform and pursue the evolution of business models.

We will be pursuing sustainability management and the evolution of ESG as the basis of Transform & Grow. With respect to climate change in particular, as part of Mitsui’s Goals in 2050, we have set a goal of achieving net-zero emissions by that year, making us the first sogo shosha to set such a goal. And as a pathway to Mitsui’s Goals, we have set a milestone of reducing our GHG impact by 50% in 2030, compared to 2020.

There are three main measures to achieve this. The first is reduction, where we optimize our resource and power generation asset portfolio to reduce emissions. The second is transition, where we support the shift from coal-fired to LNG-fired power generation. The third is opportunity, where we drive new business in energy solutions and areas that can address climate change and contribute to reducing GHG impact.

We have also introduced an internal carbon pricing system to increase resilience over the medium to long term for businesses that emit a large amount of greenhouse gases. With regard to shareholder returns, we have set the minimum dividend amount at 80 yen per share for the period of the current medium-term management plan. This is unchanged from the level for the fiscal year to March 2020, but we are committing to this as a minimum for the period, and it is calculated based on stable generation of 400 billion yen in core operating cash flow even amid the spread of the novel coronavirus. We will maintain flexible capital allocation with an eye on both growth investment and additional shareholder returns.

In closing: Mitsui’s Mission, Vision, Values

This year, in parallel with the announcement of the new medium-term management plan, we unveiled our renewed Mitsui’s Mission, Vision, Values. It is the first renewal of the MVV in 16 years and the intervening period has seen dramatic changes. Not only has the business environment changed but our people have become increasingly diverse, we are operating in a more global environment than ever before, and the business front line is shifting toward group companies.

We have therefore redefined our MVV to reflect the changing times while preserving the basic spirit of the previous MVV. Infused in the new MVV is the expectation that each Mitsui person will proactively carry on Mitsui’s DNA of being challengers and innovators and continue to meet the expectations of our stakeholders and society at large.

Taking the opportunity for reflection presented by the announcement of the new medium-term management plan, our relocation to the new head office building, and the renewal of our MVV, I have been considering the question of what kind of company I want Mitsui & Co. to be. The answer, of course, is in the Japanese rendering of our name. The name ‘Mitsui Bussan’ was chosen by Takashi Masuda, the first president of the former Mitsui & Co., because the characters in Japanese signify creation, or birth. This is a reflection of Mitsui & Co.’s reason for being, which is to create and nurture new businesses and industries. Now, amid the unpredictability created by the COVID-19 pandemic, we have an opportunity to reflect again on our mission, our values, and our goals, and return to Mitsui’s origins to pursue transformation and growth.

August 2020

Tatsuo Yasunaga
Representative Director, President and Chief Executive Officer
Gate 1

Continuous Value Creation
Mitsui’s Corporate Culture

What supports the Mitsui Group’s ‘Challenge & Innovation’? Here, we take a look at the corporate culture of the Company through the eyes of its employees in Japan and overseas as well as the senior executives of its affiliated companies and partner companies.

Acceptance of diverse individuals that fosters mutual respect

I am responsible for in-house training in relation to Microsoft 365 products and services and other measures focused on the use of leading-edge IT to improve business efficiency and promote work style reform in the Company and its affiliated companies. The challenging goal that I aim to achieve is to draw on the expertise and networks that we have developed and to create user-friendly environments that truly heighten employee productivity. In these efforts, we are seeking systems and services that incorporate themselves into work processes organically because employees can use the systems and services intuitively, conveniently, and comfortably anywhere.

I was recruited mid-career by Mitsui from a global IT company in 2015. After joining the Company, senior coworkers taught me the importance of pursuing projects based on one’s own policies and passion. Mitsui has an open-minded corporate culture that fosters mutual respect among employees, and we are encouraging employees to go beyond their particular role or organization and forge ahead with matters that they feel strongly about.

I believe that employees with clear ideas of their own who can adapt flexibly to social changes and create new types of work have always been the source of Mitsui’s competitiveness.

Empathize with long-term vision and professionalism

For more than 35 years, I was engaged in the operations and management of the copper business of Corporación Nacional del Cobre de Chile (CODELCO), the world’s largest copper mining company. After retiring from CODELCO, I joined MMRLA because I wanted to get involved with projects from a standpoint other than that of an operator and to take on the challenge of creating and growing the value of businesses. I identify and sympathize with Mitsui’s commitment to maximize project value with the spirit of transformation while tackling medium- to long-term strategic perspectives, which are essential in the mineral resources business. Also, Mitsui’s emphasis on developing human resources and innovating technology with a view to future growth is extremely attractive. When working with Mitsui personnel, I am always impressed by their professionalism. Invariably, they show respect for others and are open-minded. In particular, Mitsui personnel are adept at working in a disciplined and dedicated manner as a team.

I believe that Mitsui is well placed to contribute to the development of the copper business throughout Latin America as a corporate group that could leverage comprehensive strengths to realize integrated collective functions not only in Chile but globally. Taking maximum advantage of Mitsui’s accumulated knowledge and experience in relation to the copper business, I will concentrate efforts on strengthening the trust and presence of Mitsui in Chile’s mining industry as well as overall businesses in Chile.

Continue to pursue challenge and innovation with conviction

After joining Mitsui & Co. (Asia Pacific) Pte. Ltd., which is headquartered in Singapore, I was involved in the acquisition of PT. Kingsford Holdings as a project member, and I was seconded to the company in 2017. Since then, I have mainly been responsible for the post-acquisition integration process. We need to pay more attention than ever to risks as a variety of issues have emerged due to the spread of COVID-19. Nonetheless, we will unwaveringly pursue opportunities to grow the new business. The operating company at which I am currently seconded has grown to become the leader in Indonesia’s pharmaceutical packaging industry. Looking ahead, we want to make the company No. 1 in Southeast Asia and then No. 1 in Asia. In this way, we will become a significant arm of Mitsui’s Non-Resource Area. In executing a prepared strategy, nothing is more important than gaining the buy-in from frontline employees. For this reason, providing persuasive explanations that get the acceptance from our frontline employees is one of my major tasks and sources of motivation.

Attitude to continuously pursue Challenge and Innovation is part of Mitsui’s DNA. When you take on new initiatives, you face a range of issues. However, I have learned that professionals stick to their guns and, while taking occasional criticism on board, are uncompromising in pursuit of their ultimate objectives. Mitsui has a corporate culture that allows all employees to tackle ambitious goals together while improving themselves in friendly competition.

Leading by example, to accomplish our mission

I am the CEO of a Thailand-based sugar manufacturing company jointly managed by Mitsui and Mitsui Sugar Co., Ltd. We are in the process of building a new production line with a view to shifting toward high-value-added products with dramatically better quality and providing the world with a stable supply of sugar, a daily necessity. As many of the personnel at our operating sites do not understand English, we are concentrating on instilling efforts on talent development and organizational reform. My predecessors created the business from almost nothing, working in a new frontier, not speaking the local dialect. An absolute determination to accomplish the mission and to continue growing by thinking and acting independently are in Mitsui’s DNA. I want to share with employees our mission of providing people around the world every day with our sugar made with dedication from sugarcane carefully grown by our local farmers. Through patient dialogue with local personnel and other employees, I aim to increase the numbers of those who embrace this mission. By combining this approach with an emphasis on strict discipline, we will continue to evolve and improve the company.

Hideyuki Murakami
CEO, Kaset Phol Sugar Ltd.

Ricardo Alvarez
Vice President
Mitsui & Co. Mineral Resources Development (Latin America) Limited

Noriko Kawai
User Experience Transformation Department, Integrated Digital Strategy Division

Subiantoro
Director, PT. Kingsford Holdings (seconded)
A true partner who will enable our continued growth

In 2009, I became CEO of Ventura Foods LLC, which is a joint venture of Mitsui and CHS, Inc., the largest agricultural cooperative in the United States. I am proud of the relationship of trust and friendship that we have built with Mitsui for more than 10 years. This relationship encompasses not only Mitsui employees assigned to Ventura Foods but also many members of the senior management team, including President Tatsuo Yasunaga. Furthermore, Mitsui and Ventura Foods share a belief that our people are key to our future success. We are equally committed to investing in our talent and supporting their development. In fact, this philosophy has been one of the key reasons for the growth of Ventura Foods.

Mitsui plays an important role in the growth strategy of Ventura Foods. We leverage Mitsui’s in-depth, wide-ranging knowledge and global experience to inform our International strategy. Ventura Foods has focused on expanding its overseas business in step with the overseas forays of our customers. Thanks to Mitsui’s expertise and network, in a short space of time we have been able to significantly expand our overseas business outside North America. Mitsui is a collaborative partner as well, always sharing best practices in relation to a wide variety of areas including IT, finance, human resources, and legal. Going forward, Ventura Foods is sure to grow further as it tackles digital transformation in partnership with Mitsui. As part of this initiative and others, Mitsui and its employees are rigorously exploring how they can contribute to the growth of Ventura Foods.

Christopher Furman
CEO
Ventura Foods LLC

Working sincerely to meet nation-building expectations

I am engaged in strategic planning for Mitsui’s oil and gas resource development and in managing projects that have become operational in the United States, the Middle East, and other regions. The differentiating features of our operations are our long history in the energy development business, which began in the 1960s, and also the large number of technicans with in-depth knowledge that work at our affiliated companies. When Mitsui becomes involved in a project, the host country always has expectations with respect to the roles that the Company can play in helping to build the nation. Such situations, particularly call for Mitsui to exercise its comprehensive strengths.

On the other hand, I will never forget that the cooperation of our host countries Qatar and Abu Dhabi enabled us to maintain stable supplies to important customers when supplies were struggling to keep up with demand at the time of the Great East Japan Earthquake. While the scale of energy development is large, I have learned that building consensus by responding to each matter with sincerity in the process of negotiations is the most important thing. Changing in step with society is in Mitsui’s DNA. As climate change countermeasures become an increasingly pressing issue, we will continuously consider value which we can provide and cater to society’s needs accordingly.

Hiroe Nagamatsu
Group Corporate Strategy Department, Oil and Gas Resources Development Division

A corporate culture that fosters reforms

With a view to enhancing the value of Mitsui as a consolidated corporate group, we help business units and affiliated companies improve their business management. A feature of our department’s work is that even after a project has ended, we ensure that the proposed strategies are progressing steadily by working with the employees of target companies over the long term to tackle management issues in a hands-on manner. These efforts extend from building strategy frameworks through to rules and regulations.

Our superiors constantly stress that, regardless of our age or experience, it is important to have our own clear opinions and move forward without being constrained by convention. I believe that true professionals are those that take on challenges without fear of change, continue efforts unflinchingly, and achieve solid results in the end.

Further, the composition of the department is distinctive, with 10 of its 15 members having worked at other companies. This diversity demonstrates that as an organization Mitsui is not content with maintaining the status quo. It is always seeking reforms. Instilled in all employees, this reform-focused culture plays a major role in maintaining and enhancing Mitsui’s competitiveness.

Hiroto Yamada
Business Consulting Department, Corporate Development Division

A Partner’s View of Mitsui

Taking on the challenge of further growth and innovation with Mitsui

Our robust relationship with Mitsui has been growing for nearly 20 years. More than ever, I appreciate the importance of the strong partnership between the two companies and our shared long-term vision. Mitsui is one of our most important strategic partners.

For us, Mitsui’s global footprint and involvement across various industries provided new ideas and unique opportunities to new customers and new relationships around the globe. Penske Automotive Group, Inc. had already been entering markets outside North America. However, we were able to strengthen our position in Australia thanks to the collaboration with Mitsui, which has a long history of experience across various sectors and customers there. Additionally, Mitsui has opened new opportunities for Penske Logistics to expand and enhance its logistics businesses and supply chain solutions through the acquisition of a company that provides logistics services primarily to automotive manufacturers.

As the business landscape is changing rapidly, Mitsui’s strategic vision, diversification, commitment to mobility, and its focus on sustainability promise to be a significant source of support for our innovation efforts. Moreover, we are convinced that our existing business relationship will help Mitsui to deliver on its corporate slogan of “360° business innovation” to create and grow business while addressing many of the material issues facing the world today.

Roger S. Penske
Chairman, Penske Corporation
Dialogue

“Mitsui is People” Going Forward

For Mitsui, as a general trading company, its greatest asset is people. From a variety of viewpoints, we sought opinions from two of our external directors with respect to how best to foster people and the type of people that Mitsui requires going forward in an operating environment with an uncertain outlook.

“Mitsui is People” Going Forward

Fujiwara

As the first president of the former Mitsui*, Takashi Masuda, stated, “Mitsui has a pool of very talented individuals. This is Mitsui’s most important asset.” In the course of a long history, Mitsui has been able to advance to its present position by placing particular emphasis on people. Going forward, this approach will remain unchanged. Medium-term Management Plan 2023—“Transform and Grow” sets out six corporate strategies, which include a personnel strategy calling for Local Depth for Global Reach, Global Reach for Local Depth and Diversity & Inclusion. Keeping these goals in mind, we are tackling a variety of initiatives.

Kobayashi

As is often said of us, “Mitsui is People,” Mitsui’s senior management and employees are very distinctive. I feel the Company has many highly individualistic people. On the other hand, whether the Company is making sufficient use of this individuality and whether such individuality is contributing to the Company’s value creation are issues to be examined.

Rogers

Historically, the Company has a culture that values people. I agree that people are a particularly crucial asset for general trading companies. The composition of the Board of Directors is becoming increasingly diverse. Five years ago, I became the first non-Japanese director and, after Ms. Kobayashi, the second female director. Now, however, there are more non-Japanese directors, and the number of female directors has increased to three. In addition, a female external Audit & Supervisory Board member has joined the management team. Both Chairman Masami Iijima and President Tatsuo Yasunaga have a deep understanding of diversity and believe that it is the source of innovation. Consequently, I look forward to Mitsui’s future.

Empowerment of Women

Fujiwara

We aim for women to account for 10% of our managerial positions by the fiscal year ending March 31, 2025. With the help of Ms. Kobayashi, we implemented a support program for female leaders in 2019. We want to further strengthen environments and systems that encourage female employees to take on more-significant roles in the Company.

Kobayashi

In a variety of situations, I have met Mitsui’s female employees, and my impression is that they are all extremely capable. However, as I mentioned earlier, we should consider whether such talent is being fully used by the Company. Unfortunately, there are as yet no female employees who have been promoted in-house to director. Although the situation is improving steadily, promotion based on length of service remains. As a result, promotion to director inevitably takes a long time. For this reason, I believe it is worth considering a flexible approach to promotion that, regardless of gender, is not exclusively focused on length of service. Further, I have many opportunities to speak with mid-career female employees in front-line businesses. While I get the impression that up to a certain level female employees’ work in front-line businesses and work overseas, but when they rise above a certain rank in many instances they are assigned to non-business divisions. I would like to see more female employees receiving promotions and playing important roles in business divisions. To earn promotion, however, irrespective of their gender, employees have to experience trials and produce results. In other words, the issue at hand for the Company and its managers is whether they are able to provide female employees with such opportunities. Given that the outstanding capabilities of female employees are evident, I urge the management team to think over whether they are prepared to entrust female employees with important tasks. I suspect that unconscious bias has come into play in this regard.

Rogers

On visits to business sites worldwide with Ms. Kobayashi, I have met many female employees who have earned promotion and are expanding their fields of activity in the Company. Unfortunately, however, the occasions when female employees explain proposals at meetings of the Board of Directors are rare. Even female employees who have spent a certain amount of time at the Company, various personal events may leave them with no choice but to quit their jobs. Envisioning a future career is difficult for female employees because they have few role models. Nonetheless, I think the Company should establish systems with a certain flexibility that enable employees to adjust the timing of overseas assignments and return to Mitsui after career pauses. More than one-quarter of Mitsui’s employees are women, and the number of female managers is increasing. The Company puts in order a system that facilitates female activities, and in that sense, is ahead of its peers. Role models play an important part in empowering women. In addition, the Company...
needs a system that evaluates managers whereas their cultivation of diversity in organizations plays a part. There really are a lot of female high performers, and I hope frontline businesses can become as diverse as the Board of Directors has become.

Rogers In terms of providing opportunities, it may be the case that managers are unconsciously giving female employees insufficient support. I believe that making use of the capabilities of high performers by providing female employees with opportunities to accumulate experience and grow is the key to success in terms of the empowerment of women. We will reflect the opinions you have both stated in our human resources system.

Let me add that the percentage of women among new graduate hires is increasing. Although broadening the in-house pool of female candidates for senior management positions will require a little more time, we will also broaden the pool of candidates through active mid-career recruitment.

Global Talent

Fujiwara Mitsui is engaged in a variety of businesses around the world. Since the establishment of the Company, we have been involved in the trading business, and present-day Mitsui has become deeply embedded in a range of regions and contributes to nation building. As our intention is to remain deeply involved in local businesses as well as nation building, we have been considering the best way to foster and assign global talent. As part of these efforts, we are conducting programs aimed at developing regionally hired staff. Moreover, we are promoting such employees to executive positions in overseas affiliated companies.

Rogers Since becoming a director five years ago, I have visited local offices in the United States, Australia, Mexico, and Singapore, and I can confirm that a number of regionally hired staff are playing pivotal roles there. However, in many cases a Japanese employee transferred from Japan heads these businesses. For this reason, I feel that there is something akin to an invisible wall in the sense that no matter how hard local employees work they cannot get promotion to the top of the organization. Motivating local high performers to make even greater contributions to operations calls for a change in assumptions not only about salaries but also with regard to promotion as well as the establishment of a system that reflects this new mindset.

Kobayashi At the overseas offices I have visited, even though the leader is Japanese there are many regionally hired staff who perform important functions in the businesses. On the other hand, I have never been to a preparatory briefing before a meeting of the Board of Directors at the head office conducted by a non-Japanese employee. While the number of cases of highly capable local hires being assigned to Japan is increasing, I think there is room for further improvement. Furthermore, the Company should increase opportunities for transfer among overseas offices so that employees can move from the United States to Europe or from Asia to the United States and so on. When it comes to non-Japanese employees working in Japan, understandably the language barrier becomes a factor not only for in-house communication but also for communication with customers. By contrast, given that English is the general language of communication globally, I believe the Company could facilitate transfers among overseas offices in a more flexible manner. In advancing transfers among overseas offices, however, acquiring information on the specializations and experience of employees is important. Therefore, the Company needs to expand and enhance its global database in relation to employees.

Fujiwara As Ms. Rogers pointed out, at this moment the Human Resources & General Affairs Division is developing systems focused on global talent management. We are accelerating initiatives aimed at cultivating friendly rivalry among regionally hired staff and staff hired in Japan on a global basis so as to refine their abilities as well as add to their experience.

Rogers It is important for employees to deepen communication with their coworkers regardless of nationality, get to know each other, and cultivate a team spirit as Mitsui people. I would like the Company to continue programs in which regionally hired staff and staff hired in Japan are trained together. Further, the Company hires non-Japanese employees who are fluent in Japanese. However, communication will become even more lively if the Company fosters employees who are not only linguistically proficient but are also able to understand multiple cultures.

Kobayashi Putting fair career planning in place is needed to realize true friendly competition among regionally hired staff and staff hired in Japan. For this reason, the Company should establish an approach and culture of developing talent on an equal footing regardless of their nationality or the region they were hired in.

Talent Development

Fujiwara Talent development is indispensable for the Company’s sustained growth. Until now, we have developed employees mainly through on-the-job training that includes guidance from superiors and senior employees. While preserving such beneficial systems, in the coming era we must focus on fostering the capabilities of individuals. With this in mind, in the fiscal year ended March 31, 2020, we discontinued an appraisal system that was based on organization’s results and enhanced our system for evaluating the development of individuals. If Mitsui is to continue growing globally in a new era, on which aspects of talent development should it focus?

Kobayashi Considering that Mitsui has diverse talent working in regions around the world, I think that the Company should make it clearer to the leaders of frontline businesses that talent development is one of the very things among their important jobs. The senior management team needs to set out the development of the next generation of leaders as an important mission and to evaluate progress toward achievement of this mission.

Rogers I think it is also necessary to unify indicators for measuring the achievements of individuals. In Japanese companies, job descriptions tend to be unclear, making it difficult to measure the achievements of individuals. Therefore, the experience and evaluations required for promotion need to be made more explicit.

Fujiwara I agree that impartial, unified standards for evaluation are essential for the work in a globalized environment. Further, Ms. Kobayashi’s recommendations on how to proceed with training at frontline businesses will become even more important as we develop an array of different businesses going forward. What is required to heighten awareness of talent development at frontline businesses?

Kobayashi It is important to develop a culture in which work is not something that employees are compelled to do but rather something that they tackle with a sense of ownership. Environments and innovative systems that inspire employees to venture further and conduct more research of their own volition are beneficial. Further, while some are interested in promotion, others are not. Consequently, multifaceted systems that allow many types of people to be evaluated and express themselves in a variety of ways are called for.

Also, the young generation who will join the Company are focused on finding interesting work that helps them grow rather than on salary. In light of these priorities, Mitsui has to show potential employees that it offers interesting work by establishing systems that empower individuals and support their ambitious initiatives.

Rogers As Ms. Kobayashi said, there exists room for reconsidering the system under which all employees are promoted in the same way and via the same routes. A system ought to be established that appropriately recognizes the professional status of employees who do not have subordinates but instead focus on honing their expertise. Such a system would enable specialists to work with vitality and contribute to the Company. Further, the mindset of supervisors is important. Supervisors should discuss with each subordinate his or her strengths and the types of work they can do.
suits to them. Utilizing each person’s individuality in this way is sure to bring about a range of innovations. Realizing such a dynamic not only calls for a nuanced approach on the part of supervisors but also requires each employee to take greater responsibility for their own careers.

Work Styles in the “New Normal” Era

Fujimori As a result of the spread of COVID-19, working from home has become the primary work style. Meanwhile, the head office building to which we relocated in May 2020 has various innovative features, including spaces for interaction among employees and spaces for focusing on work. What are your opinions on work styles that incorporate working both from home and at the office in the “New Normal” era?

Kobayashi I think that we have made a very good discovery, namely that work styles we had thought of as problematic are in fact feasible. Some work, however, cannot be done entirely from remote locations and is better suited to being done by coworkers meeting directly, even if they are separated by partition walls. On the other hand, there is no need to go all the way to the office to do work that can be done remotely. At other companies, I have heard of cases where employees work at the office due to their supervisor's lack of IT literacy. It is important that each employee is given various options and that companies put in place systems guaranteeing the availability of these options.

Rogers As far as I am aware, among Japanese companies Mitsui’s adaptation to working from home has been quite swift. As the Company was able to naturally transition to working from home without confusion, online meetings of the Board of Directors are being conducted in the same manner as offline meetings. At online meetings of the Board of Directors, participants ask questions and state opinions in a given order, and my impression is that the number of participants asking questions has increased, and discussions have become deeper. This has shown me some of the merits of online meetings.

Fujimori The increased diversity of work styles will affect talent development. As a company, we will view these changes seriously and analyze which work styles are optimal for the growth of employees. I would like to thank you both for sharing a broad range of informative opinions with me today.

*From a different perspective, there is no continuity between the former Mitsui & Co. and the present Mitsui & Co., and they are totally separate corporate entities.*

With “build brighter futures, everywhere” as our corporate mission, we will aim to be a corporate group that continues to grow while working to resolve social issues.

Shinichiro Omachi Representative Director, Senior Executive Managing Officer, Chief Strategy Officer (CSO), Chairperson of the Sustainability Committee

We identified Materiality (material management issues) that reflect international frameworks, such as the Sustainable Development Goals (SDGs) adopted by the United Nations for the year 2030, and the perspectives of a broad spectrum of stakeholders, as well as the impact on business corporations. The identified Materiality is namely, “Secure sustainable supply of essential products,” “Enhance quality of life,” “Create an eco-friendly society,” “Develop talent leading to value creation,” and “Build an organization with integrity.” These constitute the basis for conducting all of our business activities, and we are strengthening our sustainability management that aims to achieve sustainable development of both society and the Company.

The main theme for our Medium-term Management Plan 2023, which begins in the fiscal year ending March 31, 2021, is “Transform and Grow.” We are accelerating initiatives to address social issues through our business activities and have identified climate change, business and human rights, and a circular economy as key themes for the Company’s sustainability management. As for climate change, we have set a new goal, which is to achieve net-zero emissions by 2050, and as a milestone for such goal, to reduce GHG impact by 2030 to half of what it is in 2020. As one of the measures to realize such goal, we established the Energy Solutions Business Unit in April 2020 so as to accelerate its efforts, especially in the areas of next-generation electric power and new energy (hydrogen, biofuels, etc.) and enhance a cross-organizational approach in the area of infrastructure business such as next-generation mobilities.

In relation to business and human rights, we formulated a Human Rights Policy in August 2020 in order to clearly stipulate our groups position and approaches. Looking ahead, we will spread awareness of this policy at workplaces and put it into practice in our operations. Under the theme of circular economy, we will enhance related measures in our existing businesses and our approach toward new opportunities, while closely monitoring the external environment. People are the foundation of Mitsui & Co’s sustainability management. The entire Mitsui & Co. global group has a shared awareness of the importance of integrity. As stated in the Mitsui & Co. Group Conduct Guidelines—“With Integrity,” going beyond simply following the established rules, we must act with conscience and dignity as business people, and we must think about our own words and actions from the perspective of integrity.

Amid rapid changes in megatrends that could impact our business, it has become harder to predict the future due to the spread of COVID-19 and its impact on the economy and society. As a corporation engaged in business on a global scale, we will flexibly respond to changes while taking initiatives to contribute to achieving a sustainable economy and society, and address global issues such as climate change. Mitsui & Co. will continue to pursue its corporate mission to “build brighter futures, everywhere.”

August 2020
Corporate Management Philosophy (Mission, Vision, Values)

Mission

Build brighter futures, everywhere

Realize a better tomorrow for earth and for people around the world.

Vision

360° business innovators

As challengers and innovators, we create and grow business while addressing material issues for sustainable development.

Values

Our core values as challengers and innovators

Seize the initiative
We play a central role in driving transformation.

Thrive on diversity
We foster an open-minded culture and multiply our strengths to achieve excellence.

Embrace growth
We drive our collective growth by continuously growing as individuals.

Act with integrity
We pursue worthy objectives with fairness and humility, taking pride in work that stands the test of time.

Our Spirit Expressed through MVV

We established our first MVV in 2004. Since that time, change in the global environment has been both continuous and dramatic. Within the Company, our people have become more diverse, and our business front line has extended further around the world with the expansion of our Group companies.

So in this context we have to ask ourselves: Where are we heading? What values should underpin our day-to-day activities and our ongoing drive for innovation and new challenges? The revised MVV is the platform we can stand on to answer these questions.

Mission

Build brighter futures, everywhere

We aim to realize a better tomorrow, everywhere, from the most developed nations to those taking early steps toward nation building, with a foundation of a deep consideration of each country and its history. Our mission is to help realize a just and plentiful world, where the environment and its resources are sustained for generations to come and people look to the future with hope and aspiration.

Vision

360° business innovators

The driving force for everything we do is our people. We believe the power of individuals can create a thriving organization, and we are accelerating our evolution as a company playing a more central role in value creation and business development. We are a united group of individuals who consider every angle in the constant search for business transformation. This is who we are.

Values

Our core values as challengers and innovators

Everyone is different. This diversity provides the strength when we share the same values in our work, harnessing our individuality while coming together for a common purpose. We will embody our role as challengers and innovators by sharing core values.

Seize the initiative
Mitsui has a history of overcoming adversity—frequently finding new opportunities for growth amid upheavals in the business environment. The source of this resilience is a mentality that has no fear of continuous transformation. With curiosity and an inquiring spirit, we each play a leading role in our ongoing search for new challenges and the next innovation.

Thrive on diversity
Information now spreads worldwide in an instant, and the intersection of cultures and different ways of thinking is producing innovation at every turn. This diversity of thought and action is one of the most powerful forces of innovation, and the open-mindedness that has been a part of Mitsui’s corporate culture since our earliest days is surely set to be an even greater part of our success in the years ahead.

Embrace growth
Individual strengths. Individual desires. Individual dynamism. Without these unique characteristics in our people, every difficult challenge would be our last. Our personal challenge is to maintain professional skill, adapt readily to change and be committed to high-quality work. In this way, our personal growth feeds the growth of our team and our business.

Act with integrity
Our work must always be something we can look back on with pride. As an organization of professionals with integrity and a strong sense of social responsibility, our high aspirations must be tackled with humility and self-discipline, and with a strong sense of fairness in a complex, interwoven society. We must approach our customers and business partners with the respect that we ourselves hope to merit.
Megatrends and Business Environment

In addition to the growing importance of sustainability, the megatrends that may impact our businesses are changing by the moment. With an awareness of the internal and external environments of each Business Unit, we have identified the risks and opportunities facing our businesses and formulated strategies for sustainable growth accordingly. In this manner, we aim to not only achieve sustainable growth in corporate value but also contribute to the sustainable development of the environment and society as a whole.

### Materiality

As an industrial solution provider for sustainable social development, we identified issues that are of high importance to society and our stakeholders and that have a significant impact on our businesses. Materiality is the foundation from which we engage in all our business activities, by helping to identify risks and opportunities in our business strategies from a medium- to long-term perspective.

#### Identification and Review of Materiality

**Megatrends That Mitsui Envisions**

- United Nations Global Compact<br> - Sustainable Development Goals (SDGs)<br> - OECD Guidelines for Multinational Enterprises<br> - Universal Declaration of Human Rights<br> - Declaration on Fundamental Principles and Rights at Work<br> - Guiding Principles on Business and Human Rights<br> - ISO 26000<br> - GRI Standards

**Mitsui and the SDGs**

As a general trading company, the Mitsui Group conducts a diverse range of business across nations and regions. We believe that this allows us to make a wide-ranging contribution to the achievement of all the 17 goals set out under the SDGs. In resolving the issues facing industries and society, Mitsui believes in the importance of cooperating with various stakeholders, including its business partners, customers, local communities, NPOs and NGOs. With this belief, we promote initiatives that embody the essence of Goal 17 of the SDGs, ‘Partnerships for the Goals.’

For details on the process of revising our Materiality, please see Sustainability Report 2020.

Mitsui’s Collective Impact

Mitsui’s Reason for Being, Value Creation

Our pool of diverse professionals actively leverages the Group’s comprehensive strengths and networks while drawing on common goals together with our various stakeholders, including our clients, partners, and local communities, to create new businesses which help solve issues directly faced by society and industry. This approach to business, where Mitsui grows while contributing to the sustainable development of society, has been in our DNA since our founding.

Creating industrial value, both quantitatively and qualitatively, which far exceeds that of Mitsui acting on its own

CASE

Cameron LNG Project in the U.S.

Mitsui participates in the Cameron LNG project, which produces and sells LNG in Louisiana in the U.S. Production commenced on all three trains of the project in May 2020. Mitsui has secured long-term access to four million tons of LNG annually, some of which will be transported on its own LNG tankers, for sale on the global market.

The Cameron project is a prime example of how Mitsui combines the comprehensive strength of its many businesses, including the LNG business, infrastructure projects business and ship business, to formulate a collective impact on value creation for the economy, society and the environment, while engaging with stakeholders such as partners, host countries and customers.

Having defined ‘secure a sustainable supply of essential products’ as a material issue (Materiality), Mitsui will contribute to the reliable supply of energy for Japan and the world by supplying LNG produced from the Cameron project, which has a relatively low environmental impact.

Our pool of diverse professionals actively leveraging the Group’s comprehensive strengths and networks

Track Record of Challenge & Innovation (Core Businesses)

1963 Participated in the development of the Moura coal mine in Australia (currently the Dawson coal mine)
1965 Participated in the Robe River iron ore mine in Australia
1966 Concluded long-term purchase agreement on iron ore from Mount Newman in Australia
1967 Established an iron ore joint venture business with BHP in Australia
1970 Established Mitsui Iron Ore Development (MOID) in Australia (Robe River iron ore joint venture)
1996 Participated in Collahuasi copper mine in Chile
2002 Participated in Coral Bay nickel mine in the Philippines
2003 Participated in Valepar S.A., the holding company of Vale S.A., the Brazilian diversified resource development company
2007 Participated in Sime Metal Management Limited, a metal and electronics recycler in Australia
2010 Participated in Caverzones copper mine and molibdenum mineral deposit development project in Chile
2012 Sealed a strategic alliance with Corporacion Nacional del Cabo de Chile and jointly participated in Anglo American Sui S.A.
2013 Acquired interest in the Jimblebar iron ore mine in Western Australia
2015 Completed second phase of expansion of Robe River (W) mine and port
2017 Participated in Moatize coal mine and the Nacala rail and port infrastructure project in Mozambique
2018 Decided to develop South Flank iron ore mine in Australia as well as new iron ore deposits through Robe River IV
2019 Acquired interest in Grosvenor coal mine in Australia

Mineral & Metal Resources

1969 Established Mitsui Oil Exploration Co., Ltd.
1971 Signed a basic contract for the development of an LNG facility on Das Island in Abu Dhabi
1985 Participated in Western Australia LNG project
1989 Participated in Qatar LNG project
1994 Signed development contracts for the Sakhalin II petroleum and natural gas projects
2008 Acquired partial interest in Mozambique’s Area 1 project
2010 Acquired working interest in onshore oil and gas development in the Marshall area in the U.S.
2010 Discovered world-class gas field in Mozambique’s Area 1 project
2011 Acquired working interest in shale oil in Eagle Ford area in the U.S.
2013 Acquired interest in Tempra Rossa onshore oil field in Italy
Entered into natural gas liquefaction tolling agreement and joint venture agreement for the Cameron LNG project in the U.S.
2016 Acquired working interest in Kipper gas and condensate field in Australia
Made final investment decision for Greater Enfield oil field development project in Australia
Acquired stake in Kaikas oil and gas development project in the Gulf of Mexico
2018 Acquired AWE Limited, an oil and gas company in Australia
2019 Made final investment decision for the Mozambique LNG project
Participated in Arctic LNG 2 project in Russia, made final investment decision
Commenced production at Greater Enfield project in Australia
2020 Commenced production at Tempra Rossa oil field in Italy

Energy

1960s Supported the overseas development and export sale of Japanese products such as steel products, machinery, and chemicals
1994 Established P.T. PATON ENERGIE, an electric power company in Indonesia
2001 Participated in Penske Automotive Group, a major automobile retailer in the U.S.
2004 Jointly acquired 13 power generating assets with International Power (currently ENGIE)
2005 Commenced charter for first FPSO
2006 Acquired gas distribution business in Brazil
Invested in Thai Tap Water Supply Public Company Limited, a water supply company in Thailand
2014 Invested in cogeneration power projects in Thailand
Signed time charter parties for LNG ships for the Cameroon LNG project
Invested in VLI S.A., a Brazilian integrated logistics company, owned and operated by Vale S.A.
2015 Acquired shares in Petrobras Gás S.A. in Brazil, thereby expanding the gas distribution business in the country
Participated in Penske Truck Leasing, Co., L.P., one of the largest truck leasing firms in the U.S.
2017 Sold interest in First Hydro, a pumped-storage power generation business in the U.K.
2018 Decided to move forward with gas-fired power plant project in Chonburi, Thailand
2019 Invested in second major gas-fired power plant in Rayong, Thailand

Machinery & Infrastructure

1960s Supported the overseas development and export sale of Japanese products such as steel products, machinery, and chemicals
1972 Established Intercontinental Terminals Company LLC, a chemical tank terminal business in the U.S.
2004 Commenced commercial production of methanol at International Methanol Company in Saudi Arabia
2006 Invested in Onslow salt field in Western Australia
Launched chemical tank terminal business at the Port of Antwerp in Europe
2015 Commenced commercial production of methanol at Fairway Methanol LLC in the U.S.
2016 Invested in Hexagon Composites ASA, a Norwegian CFPP pressure tank manufacturer
2017 Participated in ETG Group Limited, which trades in agricultural products and sells agricultural supplies, mainly in East Africa and Indian Ocean rim regions
Acquired Latitude® wheat seed treatment fungicide business assets from Monsanto Company in the U.S.
2018 Invested in coating manufacturing and sales business in Europe
Participated in Adelor, a Mexican agricultural supply company
2019 Participated in Quis Fino Quimica Ltd., an agrochemical sales company in Brazil, and Beltrim Crop Protection NV/SA, an agrochemical sales company in Europe

History of Mitsui

1950s
Facilitated import of daily necessities into Japan and exports after controls were lifted
- 1947 Daichi Bussan Kaisha, Ltd. established
- 1959 Daichi Bussan Kaisha, Ltd. integrated with other trading companies (Mitsui & Co.’s great amalgamation) and changed its name to Mitsui & Co., Ltd.

1960–1970s
In view of Japan’s high dependence on overseas sources for key materials, Mitsui invested in the development of its own sources of mineral resources and energy with the aim of ensuring their stable supply to Japan
- 1969 Established Mitsui Oil Exploration Co., Ltd.
- Supporting overseas business development of Japanese products
- Promoted export sales of iron and steel products, machinery and chemicals, invested in overseas production and sales operations of Japanese automotive and motorcycle makers
- Introduced overseas technologies and business models to Japan

1980–1990s
Further strengthened functions, including IT (information technology), IT (financial technology), and IT (logistics technology)
- Accelerated the planning and development of large-scale LNG projects in accordance with efforts to diversify Japan’s energy supply sources
- 1994 Signed development contracts for the Sakhalin II petroleum and natural gas projects
- Acquired and developed large-scale businesses overseas
- 1991 Acquired feed additive business from Monsanto Company
- 1994 Established PT. PAITON ENERGY, an independent power company in Indonesia

2000–
Long-term initiatives in developing resources and energy businesses to enhance our ability to provide a sustainable supply
- 2015 Made final investment decision for the Mozambique LNG project
- Responding to new needs for enhancing industry and enriching lifestyles
- 2017 Invested in Mozambique’s largest private hospital group, Integrated Healthcare Holdings S/B (currently IHH Healthcare Bhd.)
- Developing infrastructure businesses that contribute to nation building and industrial promotion in countries around the world
- 2017 Invested in Minalco Coal Mine and the Nacala rail and port infrastructure project in Mozambique
As a general trading company, Mitsui’s bread-and-butter business has always been trading. To leverage the superior trading functions that we possess to the fullest, Mitsui has naturally formed a business structure for handling an extensive lineup of products through a wide variety of outlets. Our traditional core competencies have been trading activities that link product demand with product supply and the extensive network of clients we have acquired through these trading activities. Additionally, these competencies have included the judgment capabilities, keen awareness, and appropriate conduct of our employees, who have helped us maintain and expand our network.

The diverse range of products that general trading companies handle—born to be diversified

In the early stages of its history, Mitsui traded mainly in daily necessities and machinery. As Mitsui has grown, it has broadened its product lineup to include sectors such as natural gas and iron and steel products. Through our original business of trading, Mitsui has cultivated expansive networks comprising a wide range of clients and has leveraged these networks to carry out business investments. Mitsui gets involved in management of the projects in which we have invested in an effort to enhance their value. In turn, these projects help Mitsui further promote our trading business and expand our networks. Through the repetition of this cycle, Mitsui has developed our current business structure.

Mitsui’s Business Portfolio
- Trading
- Business management / Business development

Mitsui’s Forte in Six Functions
1. Marketing: Create new markets by drawing on sales capabilities developed through extensive experience aligned with various business practices as well as our powerful information gathering and analysis expertise
2. Logistics: Provide optimal logistics solutions in both transportation and cost efficiency
3. Finance: Offer and advise on various financial functions, from fund procurement and financial structuring to trade finance
4. Risk management: Propose risk reduction and control by utilizing know-how accumulated over many years
5. Management: Create competitive businesses by maximizing comprehensive strengths and application of management resources. Realize sustained value improvement
6. Digital transformation: Optimize business processes and revolutionize business models by utilizing AI and IoT

Mitsui seeks to improve the value of businesses that were created from its comprehensive strength, by thoroughly fortifying them and pursuing synergies with other businesses. We review our entire portfolio for areas where value can be improved with better strategies and by leveraging the Company's functions. We examine whether business value is approaching a peak, and will move to sell the business if that leads to a higher-quality portfolio and greater value. By repeating this process, we create a cycle of portfolio improvement and value creation.

Portfolio Management and Financial Strategy

Diverse Business Portfolio Resilient to Downward Pressure
Mitsui has carried out business investments by leveraging the experience and client base it has amassed through trading in a wide range of industries. Mitsui aims to further enhance the value of its investments by leveraging its business management capabilities and comprehensive strengths. At the same time, Mitsui has continuously replaced its business assets while always keeping an eye on the future. Formed as a result of these efforts, our diverse business portfolio has been able to generate strong cash flows in a challenging business environment under the COVID-19 pandemic.

By practicing disciplined portfolio management, Mitsui has strategically allocated our limited capital to areas that are of importance to the Group, to further strengthen our business portfolio with the aim of sustainable growth and social development.

In addition, our basic financial policy is to maintain liquidity and a stable financial base to support our diverse business portfolio as well as our growth strategies.

Practicing Disciplined Portfolio Management and Maintaining a Stable Financial Base

- Core Areas: 96%
- Others: 4%

- Core Operating Cash Flow:
  - Core operating cash flow (left scale)
  - Core operating cash flow (right scale)

- Non-current assets
- Current assets
- Other liabilities
- Shareholders’ equity

Balance sheet (As of March 31, 2020)

Current assets 4.1
Non-current assets 7.7
Other liabilities 2.8
Shareholders’ equity 4.9
Non-controlling interests 0.3

Basic Approach to Financial Strategy

We aim to ensure liquidity and maintain a healthy financial position.

Basic philosophy of portfolio management
- Strengthening earnings bases of existing businesses and leveraging economies of scale
- Generating inter-business synergies through strategic positioning in the value chain
- Acquiring new function platforms
- Expanding into new business fields and taking on the challenge of creating innovative new business models

Steadily procure funds over the long term in accordance with asset liquidity
- Maintain a sufficient amount of liquidity to cover the repayment of interest-bearing debt
- Keep enough liquidity, mainly cash in hand, to cover approximately two years of repayments
- Hold necessary liquidity on our balance sheet even in emergency situations, including the drying-up of market liquidity

Maximize funding efficiency throughout our consolidated Group
- Create an in-house banking process in which funding can be procured and surpluses deployed efficiently in each region according to need
- Effectively leverage liquidity and lines of credit

FOCUS

The Portfolio Management Committee’s Role and Yearly Cycle of Portfolio Management

Establishment of a strategy for the overall portfolio of Mitsui

- Specify priority areas and areas of focus, new target areas, and areas that need to be reviewed, in view of the overall strategy of Mitsui, the individual strategies of business units, market trends and macro analyses, and the allocation of its management resources

Establishment of investment and finance policies

- Establish important policies relating to the management of the overall portfolio of Mitsui such as guidelines for investment and finance limits, the design of a consolidated capital cost structure, etc.

Regular monitoring of Mitsui’s overall portfolio

- Review regularly to confirm the significance of all business holdings, in addition to confirming the appropriateness of asset size in accordance with each business area and country

Confidentiality

- All information in this report is for the exclusive use of shareholders of Mitsui & Co., Ltd. and may not be disclosed to any third party without the consent of the parent.
Portfolio Management and Financial Strategy

Indicators We Focus on in Our Financial Strategies

In 2014, Mitsui introduced a framework for cash flow allocation. The purpose of this framework is to drive the implementation of our growth strategy while maintaining and strengthening our financial foundation by making a balanced allocation of cash, gained from operating cash flow and asset recycling, to both growth investments and shareholder returns. For all of the indicators we focus on when considering financial strategy, our policy is to maintain appropriate levels based on our cash flow allocation framework.

Concurrent with the shift in business composition from trading to investment, our investment assets and fixed assets have been increasing. When business investments of fixed assets that are relatively high risk or take longer to generate returns, leverage needs to be reduced, and we have in fact deleveraged significantly compared to historic levels.

Net DER*

Adjusted net DER by including 50% of subordinated syndicated loans (¥550 billion) in capital

Risk assets (left scale)

Risk assets refer to the maximum amount of anticipated loss on operating receivables and investments, assets such as property, and off-balance-sheet positions such as liability on guarantees, in a period with a reasonable amount of risk and guarantees, using a set standard. The risk-return ratio is the ratio between the amount of risk assets associated with a specific project and the profit for the year projected to be generated through Mitsui’s equity holdings in the project.

Quantitative standards considered include consolidated internal rate of return, ratio of consolidated investments and loans outstanding to guarantees, and risk-return ratio. The risk-return ratio is mainly funded by interest-bearing investments of fixed assets that are related to ESG, and we have in fact deleveraged significantly compared to historic levels.

Analysis, Evaluation, and Deliberation

Investment decisions are made based on an analysis of qualitative factors as well as the required profitability ratio and other quantitative standards. Moreover, a variety of factors are evaluated in making decisions, including the ability to execute business plans, Mitsui’s functions to be utilized, probability of increasing value, conditions of contracts with other related parties, risk analysis and management measures (including ESG-related risks), value of the business, period of project execution, and internal control effectiveness. Investment candidates are screened and final decisions are made after deliberations by relevant committees.

• Verify assumptions, including strategic viability, ability to execute business plans, commodity prices, costs, foreign exchange rates and interest rates

• Deliberations by committees on investment, loan, and guarantee amounts

In accordance with the Specially Designated Business Management System, separate discussions are held, when necessary, regarding business domains with high qualitative risks pertaining to ESG and other factors.

• Introduced internal carbon pricing system in April 2020

Lifecycle Management of Business Investments

01 Project Incubation

Mitsui develops existing businesses by leveraging the networks and insights gained through partnerships and customer relationships in various industries and regions while seeking out and advancing new projects with the potential to become promising businesses in a similar manner.

02 Analysis, Evaluation, and Deliberation

Investment decisions are made based on an analysis of qualitative factors as well as the required profitability ratio and other quantitative standards. Moreover, a variety of factors are evaluated in making decisions, including the ability to execute business plans, Mitsui’s functions to be utilized, probability of increasing value, conditions of contracts with other related parties, risk analysis and management measures (including ESG-related risks), value of the business, period of project execution, and internal control effectiveness. Investment candidates are screened and final decisions are made after deliberations by relevant committees.

• Verify assumptions, including strategic viability, ability to execute business plans, commodity prices, costs, foreign exchange rates and interest rates

• Deliberations by committees on investment, loan, and guarantee amounts

03 Final Investment Decision and Execution

Investments are decided and executed once it has been determined that they meet internal approval standards and that contractual obligations have been fulfilled.

In addition to the risk amount carried by assets on the balance sheet, we assess and periodically monitor the amount of off-balance-sheet risk, such as market risk and guarantees, using a set standard. Our risk exposure is being held within a range of about 60%–70% of our shareholders’ equity, and we periodically stress test our risk assets for various scenarios, verifying the impact on the risk assets to shareholders’ equity ratio.

In addition to the risk amount carried by assets on the balance sheet, we assess and periodically monitor the amount of off-balance-sheet risk, such as market risk and guarantees, using a set standard. Our risk exposure is being held within a range of about 60%–70% of our shareholders’ equity, and we periodically stress test our risk assets for various scenarios, verifying the impact on the risk assets to shareholders’ equity ratio.

*2. Risk assets are defined as the maximum amount of anticipated loss on operating receivables and investments, assets such as property, and off-balance-sheet positions such as liability on guarantees, in a period with a reasonable amount of risk and guarantees, using a set standard. The risk-return ratio is the ratio between the amount of risk assets associated with a specific project and the profit for the year projected to be generated through Mitsui’s equity holdings in the project.

Defining standard

Quantitative standards considered include consolidated internal rate of return, ratio of consolidated investments and loans outstanding to guarantees, and risk-return ratio. The risk-return ratio is mainly funded by interest-bearing investments of fixed assets that are related to ESG, and we have in fact deleveraged significantly compared to historic levels.

In accordance with the Specially Designated Business Management System, separate discussions are held, when necessary, regarding business domains with high qualitative risks pertaining to ESG and other factors.

• Introduced internal carbon pricing system in April 2020

Life management

Mitsui plays a direct role in operating businesses and managing companies in order to boost their competitiveness and value. Mitsui’s functions are utilized to this extent by appointing professionals who are highly specialized in the respective business areas, dispatching our diverse group of professionals, and pursuing close coordination between Mitsui and individual businesses. Furthermore, inter-business collaboration is promoted to help Mitsui explore new markets and business models. Our aim is to continuously improve the efficiency of invested capital by utilizing ROIC (return on invested capital) as an internal management indicator, in addition to profits and cash flows.

04 Project Development

Energy resource and infrastructure development projects are advanced together with partners. By carefully monitoring project progress and flexibly responding to unforeseen circumstances, projects are completed within the planned budgets and time frames.

05 Business Operation and Management

Mitsui develops existing businesses by leveraging the networks and insights gained through partnerships and customer relationships in various industries and regions while seeking out and advancing new projects with the potential to become promising businesses in a similar manner.

06 Asset Recycling

Businesses we have invested in are continuously evaluated based on growth potential, the ability to increase value with Mitsui’s functions, and strategic benefits. If it is deemed that a business’ viability is beginning to peak, we will consider new strategies, such as merging businesses into other companies, or the possibility of asset recycling, and then put these plans into effect.
Sustainability Management—Tackling Climate Change through Our Businesses

With the adoption of the Sustainable Development Goals (SDGs) and the Paris Agreement by the United Nations, companies’ measures to address climate change are becoming important for the sustainability of society. Mitsui has identified ‘Secure sustainable supply of essential products,’ ‘Enhance quality of life,’ and ‘Create an eco-friendly society’ as components of its Materiality. Accordingly, our global business activities will both contribute to the development of economies and societies in a variety of countries and regions worldwide and help address climate change and other global issues. We believe that a favorable long-term balance between economic and social contributions is essential to realizing a sustainable growth strategy.

Also, in December 2018 the Company declared its support for the Task Force on Climate-related Financial Disclosures (TCFD). Pursuant to the TCFD recommendations, we will advance relevant disclosure further.

**Strategy**

Pursue Economic, Social, and Environmental Value in a Balanced Manner

We view the various risks and opportunities related to climate change as important factors that we must take into consideration when building business strategies. We have formulated Medium-term Management Plan 2023 in light of scenario analysis (→ page 48) conducted in the fiscal year ended March 31, 2020.

**Major Risks and Opportunities Related to Climate Change**

Mitsui conducts a wide range of businesses in many different countries and regions. We believe the potential impact of climate change on our business is as follows.

- **Economic Risks:**
  - Loss of competitiveness due to market erosion

- **Social Risks:**
  - Social acceptability of business practices

- **Environmental Risks:**
  - Changes in climate and natural environment

Further, for each of our business fields we have analyzed the internal and external environment and identified risks and opportunities.

- **Iron & Steel Products**
  - Decrease in demand for materials and drilling equipment for the energy sector

- **Mineral & Metal Resources**
  - Increase in demand for raw materials due to changes in the electric power mix

- **Energy**
  - Increase in demand for efficient power supplies

- **Mechanical & Infrastructure**
  - Change in demand for new technologies and new markets

- **Chemicals**
  - Change in demand for raw materials for secondary batteries

- **Lifestyles**
  - Change in demand for forest products

- **Innovation & Corporate Development**
  - Change in demand for renewable energy technologies

**GHG-Related Initiatives**

Mitsui has been conducting GHG emission surveys in Japan since the fiscal year ended March 31, 2006, and overseas since the fiscal year ended March 31, 2009. Previously, we disclosed Scope 1 and Scope 2 GHG emissions based on the control approach of the GHG Protocol. As of the fiscal year ended March 31, 2020, we disclosed the Scope 3, Category 15 indirect GHG emissions of investment based energy businesses, investment based mineral and metal resources businesses, and investment based thermal power generation businesses that do not fall under the classification of either Scope 1 or Scope 2, and we disclosed the Scope 1 and Scope 2 GHG emissions of the businesses of affiliated companies in all business fields. We have extended the scope of disclosure to reflect our corporate strategy, which entails continuously re-forming our portfolio with a focus on resilience to risks arising from climate change and utilizing our wide-ranging business development to take on opportunities flexibly.

In the fiscal year ended March 31, 2020, GHG emissions from the Head Office, Company offices and branches, and domestic and overseas subsidiaries were 0.75 million tons. Further, GHG emissions from unincorporated joint ventures in the metal resources and energy sectors totaled 3.07 million tons. As a result, total GHG emissions were 3.82 million tons. In addition, Scope 3, Category 15 indirect GHG emissions accompanying investments amounted to 32 million tons.

**Aiming for Net-Zero Emissions in 2050**

Mitsui has set a goal of achieving net-zero emissions by 2050. As a pathway to that goal, we aim to reduce GHG impact by 50% in 2030 compared to the impact in 2020.

**Medium-term Management Plan 2023**

Management Foundation Risk Management and Governance Concerning Climate Change

**ESG Due Diligence Checklists and the Specially Designated Business Management System**

Decisions are made on the selection of new businesses and on whether or not to implement new businesses following evaluations at respective committees based on quantitative standards such as profitability and on qualitative evaluations (p. 43 “Lifecycle Management of Business Investments”). As part of these evaluation efforts, respective business division management, corporate management, environmental, social, and governance (ESG) impact assessments using ESG due diligence checklists that, with reference to international standards, summarize environmental and social risks for each business division. Factors covered by these assessments include climate change, pollution prevention, ecosystems, water stress, and human rights.

Upon completion of these evaluations, businesses that have high qualitative risks in relation to climate change and other ESG factors are classified as “specially designated businesses” and advanced in compliance with the Specially Designated Business Management System. As required, recommended or not to proceed with potential new businesses and recommendations on optimizing the potential of new businesses are sought from the Sustainability Committee, the Environmental & Societal Advisory Committee, and other bodies. Ultimately, whether or not to proceed with potential new businesses is determined through deliberations that consider whether or not new businesses meet certain quantitative and qualitative standards and which are held at meetings of the Board of Directors, the Corporate Management Committee, and the Council of Investment and Finance Proposals, which supervise ESG risk.

**Management Foundation Risk Management and Governance Concerning Climate Change**

Governing in Support of Climate Change Countermeasures

To create an organization that operates under the Corporate Management Committee, in May 2017 we established the Sustainability Committee, which comprises directors, executive officers, and the general managers of each relevant corporate division. With a view to advancing management based on an awareness of the sustainability of society and the Company, the Sustainability Committee offers recommendations on business policies and business activities from the viewpoint of sustainability. These activities include the formulation of basic policies for sustainability management. Furthermore, with the aim of realizing measures in response to sustainability issues, we have established the Environmental & Societal Advisory Committee as an advisory body to the Sustainability Committee. Mitsui mainly appoints to the former committee external experts who provide a wide range of insights on climate change, policies on water, energy, and other environmental matters; trends in technology; and human rights.

Details of the discussions at meetings of the Sustainability Committee are periodically reported to the Corporate Management Committee and the Board of Directors and utilized in decisions on the Company’s management policies. Further, meetings of the Board of Directors discuss overall sustainability, including the progress of climate change countermeasures. In the fiscal year ended March 31, 2020, out of a total of 70 proposals and reports submitted to and discussed by the Board of Directors, 25 related to sustainability and governance (≈ page 103).

**Initiatives of the Sustainability Committee to Date**

- Policy deliberations for co-rated business initiatives
- Report on latest trends in climate change issues
- Discussion on information disclosure policy for environment-related data
- Deliberations on enhanced disclosures of non-financial information in consideration of the external environment
- Policy deliberations for co-rated business initiatives
- Report on latest trends in climate change issues
- Discussion on information disclosure policy for environment-related data
- Deliberations on enhanced disclosures of non-financial information in consideration of the external environment
- Discussion on external environment in relation to climate change
- Discussion on declaration of support for TCFD

For details on the initiatives of the Sustainability Committee, please see our sustainability reports.

**Environmental & Societal Advisory Committee**

Aiming to realize measures in response to sustainability-related issues, Mitsui has established the Environmental & Societal Advisory Committee as an advisory body to the Sustainability Committee. Mainly comprising external experts who provide a wide range of insights on climate change, policies on water, energy, and other environmental matters; trends in technology; and human rights; and labor issues, this advisory committee evaluates risks in relation to each of these themes and provides recommendations on improving the quality of business projects.

---

1. This was calculated based on Calculation of Mitsui’s Ecosystem Services Based on the Stern Review of the 2019 Refinement to the 2006 IPCC Guidelines on National Greenhouse Gas Inventories.

2. This was calculated through the use of the Tier 2 approach in “Chapter 4: Forest Land” of 2019 Refinement to the 2006 IPCC Guidelines on National Greenhouse Gas Inventories. The calculation method has been changed from the previous calculation method based on the Tier 1 approach of the 2006 IPCC Guidelines to a calculation method based on the aforementioned Tier 2 approach in order to refine calculations from the fiscal year ending March 31, 2011, onwards.

3. This was calculated based on Evaluation of the Value of Ecosystem Services with Respect to the Biodiversity Preservation Activities of Companies, Ministry of the Environment.

4. “Mitsui’s forests” in Owani-machi, Aomori
**CASE 1 Business Impact Assessments Associated with Transition Risks (Scenario Analysis)**

We have selected business fields considered to possess significant financial and non-financial impacts related to transition risks, used multiple climate change scenarios to carry out impact assessments for each business, and investigated countermeasures based on the results.

(1) Business Fields Selected for Scenario Analysis in the Fiscal Year Ended March 31, 2020

Taking into consideration the GHG emissions of entire supply chains, we selected the following business fields.

- Oil and gas development businesses and LNG businesses (Energy Segment)
- Coal businesses (Mineral & Metal Resources Segment)
- Thermal power generation businesses (Machinery & Infrastructure Segment)

(2) Selected Scenarios

We have used the following scenarios taken from *World Energy Outlook*, which is published by the internationally recognized International Energy Agency (IEA):

- New Policies Scenario (NPS): Scenario based on the GHG reduction target submitted to the United Nations by respective countries
- Sustainable Development Scenario (SDS): Scenario needed to uphold the Paris Agreement, which seeks to keep global warming within 2.0°C of the pre-Industrial Revolution level

(3) Analysis Results

<table>
<thead>
<tr>
<th>Evaluation of the Impact on existing businesses</th>
<th>Countermeasures</th>
</tr>
</thead>
<tbody>
<tr>
<td>Oil and gas development businesses and LNG businesses</td>
<td>With reference to short-term market levels and the outlooks of multiple third-party organizations, Brent Crude is expected to trend between $30 and $80 per barrel in the medium to long term. Even under the SDS, which is a more conservative scenario than the NPS, the Company’s highly-cost-competitive assets are expected to maintain their advantages to a certain extent. While the energy industry faces the dual challenges of the need to realize increased volume and improved quality, renewable energy is expanding steadily. Meanwhile, fossil fuel will remain an indispensable energy source for the time being. We will strengthen the cost competitiveness of new business projects while considering the carbon costs. At the same time, we will focus our efforts on gas and LNG projects, which have comparatively low environmental burdens.</td>
</tr>
<tr>
<td>Coal businesses</td>
<td>The SDS is premised on further spread of the Electrical Arc Furnace method and on substitutes for coking coal being realized through innovative steel technologies, which have yet to be established. Ongoing verification of the possibility of realizing new steel technologies and of their impact is required. We will pay close attention to trends in new technologies and to progress in relation to the Electrical Arc Furnace method and the policies of respective countries. At the same time, over the medium to long term a steady increase in demand for high-quality coking coal centered on India and Southeast Asia is expected. While providing stable supplies to customers, we will strengthen our competitiveness.</td>
</tr>
<tr>
<td>Thermal power generation businesses</td>
<td>Even based on the SDS, the impact on existing businesses will be limited as businesses contracted under long-term power purchase agreements—in which a consideration is paid for generation capacity rather than for generation volume—account for the majority (96% as of March 31, 2020) of the Company’s power generation business portfolio. In stages, we intend to lower coal-fired thermal power as a percentage of our equity share of power generation capacity and increase the percentage of renewable energy, including hydropower, to 30% by 2030.</td>
</tr>
</tbody>
</table>

**CASE 2 Major Physical Risks and Countermeasures**

Under the NPS scenario, the physical risks would be relatively higher because the target agreed under the Paris Agreement to keep global warming within 2.0°C of the pre-Industrial Revolution level would not be met. Mitsui has carried out a survey of the impact of physical risks over the past five years on important investment assets, as well as an analysis based on the RCP (Representative Concentration Pathway) used by the IPCC (Intergovernmental Panel on Climate Change).

The major physical risks facing assets owned by Mitsui include the potential for localized storms, particularly strong tropical hurricanes and cyclones arising in the Atlantic and South Pacific, to cause negative impacts on operations in our mineral and metal resources projects. Furthermore, in cases of severe damage to production plants or facilities or infrastructure, such as the roads, railways and ports used for shipments, there is a risk that production or shipments could be suspended for long periods until these facilities are restored. On top of Mitsui’s own investments, in cases when Mitsui suppliers suffered significant damage, there is the risk of the overall supply chain failing, including failures to receive supplies of raw materials. Mitsui implements measures such as taking out insurance coverage, establishing crisis management policies, and upgrading facilities as necessary. Furthermore, we are also considering the establishment of a system to assess whether each of these measures is being appropriately arranged.
Human Resources Strategy for a Pool of Diverse Professionals

People is Mitsui’s greatest asset. By leveraging Mitsui's various management capital and collaboration among our diverse talent who possess professional expertise in a wide range of business domains, products, fields and regions, we create and develop businesses and generate new value on a global basis. To develop this pool of diverse professionals further and to promote their active roles, we formulate human resource management frameworks. Moreover, we are establishing environments that encourage further “Challenge & Innovation.” Through such initiatives, we will realize unmatched value creation.

Introduction of Share-Based Compensation Plan for Employees

With the aims of realizing Medium-term Management Plan 2023 with the theme of “Transform and Grow” and sustainable growth going forward, Mitsui has introduced a share-based compensation plan for employees. Under the new plan, every fiscal year employees are granted points that reflect personnel appraisals. Upon retirement, employees will be granted points that reflect long-term contribution and performance. In addition to the management and employees, we will foster a sense of unity between the management and employees and heighten employee engagement. We are offering each employee more options in terms of career paths, thereby enhancing management personnel, business management personnel, and highly specialized personnel.

People is Mitsui’s greatest asset. By leveraging Mitsui's various management capital and collaboration among our diverse talent who possess professional expertise in a wide range of business domains, products, fields and regions, we create and develop businesses and generate new value on a global basis. To develop this pool of diverse professionals further and to promote their active roles, we formulate human resource management frameworks. Moreover, we are establishing environments that encourage further “Challenge & Innovation.” Through such initiatives, we will realize unmatched value creation.

Diverse Talent

In the Mitsui & Co. Group, employees who come from a wide variety of backgrounds in terms of nationality, gender, values, and other attributes play active roles globally. We implement “diversity management,” under which each and every member of our diverse human resources recognizes and respects each other, inspires each other to exert their capabilities to the fullest, brings new value to our business, and creates innovation. This allows us to enhance the competitiveness of the Mitsui & Co. Global Group.

The Development of Global Talent

As we conduct businesses that are deeply rooted in countries and regions, we are concentrating efforts on empowering global talent, including regionally hired staff. As part of these efforts, we are not only providing such personnel with opportunities to work at our head office in Japan; we are also actively encouraging transfers among overseas operating bases, including those of affiliated companies. As a result, we are appointing an increasing number of regionally hired staff to general manager positions. Further, with a view to fostering leaders capable of forging ahead decisively with reform, we are conducting the Change Leader Program. This program selects regionally hired staff and supports their development by providing opportunities to converse directly with members of the senior management team.

Empowerment of Women

Mitsui has numerous female employees, who work in a wide variety of business domains. Aiming to “Thrive on Diversity” and accelerate business creation, we want women to account for 10% of our management staff by the fiscal year ending March 31, 2023. As of July 2020, 7.4%*1 of our managers are women. With the aforementioned target in mind, we have established Women Leadership Initiatives, which are steadily fostering the next generation of female leaders and creating a range of various role models for female leaders. Also, through this initiative, we provide female employees with organizational development instruction and support to enhance self-awareness, which are required of leaders. In addition, the initiative includes opportunities to engage in dialogue with external directors to help promote the further empowerment of female employees.

Environments That Encourage “Challenge & Innovation”

During Mitsui’s long history, an organizational culture characterized by “Challenge & Innovation” and openness-mindedness has been passed down from generation to generation as part of the Company’s DNA. To leverage this organizational culture and accelerate efforts to “Transform and Grow,” we have designated our new Head Office—to which we relocated in May 2020—as a venue where diverse individuals and professionals from inside and outside the Company spark “intellectual chemical reactions” to create new value. By strengthening cooperation that spans divisional boundaries and collaborations with external partners, Mitsui will step up the pace of its growth even further.

Features of the new office floors

- Collaboration spaces (‘camps’) where people readily gather, chat, and come up with ideas
- Each organization’s introduction of systems that enable employees to choose where to sit and work and which realize flexible teaming as needed for operations and projects
- Ability to reflect management strategies and flexibly change the layout of departments’ office floors with the aim of creating business synergies

Business Impact from COVID-19 and Our Response

The COVID-19 pandemic has led to lockdowns in major cities around the world and restricted the movement across cities and countries. Mitsui's businesses have been greatly affected as a result. We are working toward an early return to a growth trajectory by accelerating efforts to improve resilience to downward pressure in our ongoing operations.

</tr>
</tbody>
</table>

Restrictions on the movement of people and cargo have led to a sharp drop in demand for jet fuel, gasoline and other transportation fuels. Crude oil prices fell on the uncertain economic outlook, and profitability worsened in petroleum-related businesses.

Mobility-related demand has decreased. Demand and the operating rate for automobile-related businesses (production, sales, and financing), railways and aircraft leasing has dropped.

Healthcare demand is down from patients with mild afflictions and medical tourism has slumped, leading to lower operating rates in the hospital business.

Demand weakened for durable consumer goods such as automobiles. Profitability has worsened in businesses related to iron & steel products and chemicals, for which the Company supplies materials.

Decreased activity in financial markets has caused delays in planned IPOs and the divestiture of assets.

Action Plan for the Fiscal Year Ending March 31, 2021

While prioritizing the health and safety of all employees and stakeholders, Mitsui is focusing efforts on minimizing damage as well as maintaining the competitiveness of existing businesses and relationships with customers that have been built up over many years.

- **Maintaining existing businesses and relationships with customers and partners**
  Using digital tools, we aim to maintain our network and expand businesses with customers and partners.

- **Minimizing damage**
  With demand falling in various domains, the business environment has worsened, but we are working hard to minimize the damage with thorough risk management.

- **Sharply reducing costs and reviewing investment plans**
  While thoroughly reviewing new investments and expenditures for already approved investments, we are keenly moving to reduce costs with the cooperation of our joint venture partners and operators, in a bid to improve resilience to downward pressures in operations.

Mitsui’s Response

We introduce below some of the measures that Mitsui took in response to the state of emergency being declared in Japan.

- **Encouraging working from home**
  Based on COVID-19 outbreaks in each country, we encouraged employees to work from home in crisis situations, placing their safety and health as our foremost priority. During the state of emergency, all employees were forbidden to come into work, in principle, and the approval of the head of Emergency Management Headquarters (Chief Human Resources Officer) was required before any employee could report for on-premises work.

- **Promoting work with digital tools**
  We increased the use of digital tools. In addition to internal meetings, we used online meeting software for meetings with suppliers, our entrance ceremony for new hires, employee training sessions, and also meetings of the Board of Directors. The number of employees using Microsoft Teams collaboration software increased from roughly 600 people in January 2020 to almost 13,000 by May. In addition, the number of digital signature software users grew over 10 times compared with pre-pandemic levels.

- **Launching Work-X initiative for a new work style**
  Mitsui launched the Workplace Experience (Work-X) project in August 2019 to coincide with the move to a new Head Office. To realize new work styles, we not only introduced new equipment and functions but also strived to change employee awareness and behavior with this initiative, which is also in line with “Transform and Grow,” the theme of Medium-term Management Plan 2023. For example, we have proactively introduced digital technologies and done away with assigned seating and desk telephones in workspaces in order to facilitate collaboration among employees and be more flexible in teaming up. The Work-X project aims to make new work styles a reality, and we have seen success in efforts to go paperless and to use Microsoft 365 and smartphones instead of desk telephones, allowing a smooth transition for employees to work from home while restricting access to company offices.

A New Work Style in a “New Normal”

We will continue to examine an optimal balance between working in the office and working from home, assuming uncertainties persist as conditions change.

In order to leverage Mitsui’s comprehensive capabilities, a company strength, it is important for “intellectual chemical reactions” to take place among the diverse professionals at Mitsui, who have know-how in a variety of industries and areas. While taking advantage of both communication through digital tools and face-to-face communication, we aim to create new businesses.

Impact on Mitsui’s Strategies

Society has changed at an unprecedented speed during the COVID-19 pandemic, increasing the importance of taking initiatives with a long-term view. Mitsui’s direction has not changed significantly under the current medium-term management plan.

We are focused on the Environment and Health sectors in continuation from the previous management plan. Under the current medium-term management plan, we are confident in Mitsui’s ability to leverage its comprehensive strengths and have identified energy solutions, healthcare/nutrition, and Market Asia, which we believe are growth fields, as our strategic focus. Social needs related to the environment and healthcare domains have not changed due to COVID-19, in our opinion, and we intend to push harder on this strategy.

IT tools that enable telework and online work have become more inevitable. We will accelerate efforts to create new businesses for which digital technology is utilized and enable new work styles with digital tools.
Medium-term Management Plan

Gate 3

Mitsui & Co., Ltd. Integrated Report 2020
CFO Message

Results for the Fiscal Year Ended March 31, 2020, and Progress in the Quantitative Targets of the Previous Medium-term Management Plan

Looking back on business conditions in the fiscal year ended March 31, 2020, the global economy continued slowing down, particularly the manufacturing sector, through to the end of 2019, which reflected trade friction between the United States and China and other factors. Against this backdrop, the world-wide spread of COVID-19 from February 2020 onward triggered an abrupt deterioration in the global economy and falls in stock and commodity markets.

With respect to Mitsui’s performance in the aforementioned environment, its cash-generation capabilities remained firm. Core operating cash flow rose by ¥51.4 billion year on year to ¥621.9 billion, due to contributions from the Australian iron ore business by ¥51.4 billion year on year to ¥621.9 billion, due to contributions from the Australian iron ore business.

As for the quantitative targets of the previous medium-term management plan, which ended on March 31, 2020, profit for the year attributable to owners of the parent was below target, mainly due to the aforementioned factors. However, core operating cash flow remained solid throughout the period of the plan, and we largely achieved the 10% ROE target.

Cash Flow Focused Management Entrenched and Financial Base Strengthened

Review of the Previous Medium-term Management Plan

Since 2014, Mitsui’s medium-term management plans have included a cash flow allocation framework. This aims to allocate cash from operating cash flows and asset recycling in a balanced manner to both investments for growth and shareholder returns, thereby simultaneously allowing growth strategy implementation and strengthening of the financial base.

As well as including the aforementioned framework, the previous plan earmarked at least ¥100 billion annually for dividend payments, maintaining positive free cash flow after shareholder returns while stipulating flexible cash allocation corresponding to the business conditions during the period of the plan. Consequently, during the three years of the plan, cumulative cash acquired totaled ¥2,640 billion, comprising core operating cash flow of ¥1,860 billion and asset recycling of ¥780 billion. Meanwhile, we continued curbing investment and narrowing down investment candidates based on strengthened investment discipline. Cash outflow arising from investment and loans amounted to ¥1,910 billion, roughly in line with our original target under the plan.

In the fiscal year ended March 31, 2019, an additional acquisition of IHII Healthcare Berhad shares required a total cash outflow of approximately ¥230 billion, our largest one-time investment to date. Nonetheless, by using the cash flow allocation framework to conduct a comprehensive revision of cash allocation, which included an increase in asset recycling, we were able to execute this investment without placing undue burden on our finances. Furthermore, during the six fiscal years after introducing our cash flow allocation framework, we increased shareholder returns significantly, providing cumulative total shareholder returns of ¥880 billion.

Evolving Financial Strategy and Portfolio Management under a New Plan

Medium-term Management Plan 2023—“Transform and Grow” calls on Mitsui to pursue a corporate strategy of evolving financial strategy and portfolio management. Under this new plan, we will advance cash flow focused management even further and strengthen our ability to achieve flexible and strategic cash allocation.

As before, we aim to implement growth investment and increase shareholder returns while further strengthening the financial base. Regarding dividends, however, we will emphasize stability and continuity. Accordingly, we have set ¥80 per share as a minimum for annual dividends during the period of the plan. We will view as management allocation the amounts that are net of cash required for projects for which investment has been approved, for the

CFO Message

The forecast for cash flow allocation under the new plan is as shown in the table. However, we will flexibly and strategically revise cash flow allocation as appropriate in light of overall consideration of business conditions and the progress of initiatives. Mitsui will pursue medium- to long-term growth opportunities that emerge as conditions change after the COVID-19 crisis, allocate cash with a view to improving capital efficiency, and raise the total shareholder returns ratio compared with that achieved during the previous plan.

Further, the launch of the current plan marked our introduction of return on invested capital (ROIC) as an in-house indicator for performance management. Our aim is to promote awareness of ROIC enhancement in respective business fields and projects. This indicator takes into account not only invested capital but also working capital. By heightening awareness of capital efficiency in each business field, we will lift capital efficiency and ROE Companywide. ROIC-focused measures will evolve portfolio management and boost the effectiveness of management-driven cash allocation.

The dramatic changes in near term business conditions that have resulted from the worldwide spread of COVID-19—particularly the sudden downturns in commodity markets, share prices, and the currencies of emerging countries toward the end of the previous fiscal year—are exerting a certain amount of downside pressure on Mitsui’s balance sheet. As of March 31, 2020, the net debt-to-equity ratio, an indicator of leverage, had increased to 0.91x. When hybrid finance is taken into consideration, however, the net debt-to-equity ratio was 0.78x. Thus, even amid a significant increase in market volatility, Mitsui’s cash generation capabilities and balance sheet maintained their downside resilience.

In addition, there will be no change to our existing financial strategy of placing emphasis on securing liquidity as well as maintaining medium- to long-term funding and adequate liquidity. Moreover, with respect to large-scale projects in emerging countries, such as the Mozambique LNG project, we are reducing country risk by arranging project financing through the export credit agencies. In conjunction with these efforts, through the issuance of bonds for many of our projects that have begun operations, we are refinancing to improve capital efficiency. Further, in response to the growing awareness of environmental, social, and governance (ESG) factors in capital markets, we are diversifying our fundraising. For example, we introduced our first sustainability-linked loan in the fiscal year ended March 31, 2020.

Under the new plan, Mitsui will further enhance a robust financial base by continuing to implement its established financial strategy while realizing cash flow allocation in a flexible and strategic manner.

Digital Transformation

Our Initiatives

Under the leadership of the Chief Digital Information Officer (CDOI), we are stepping up the pace of our Companywide digital transformation strategy. One focus of our digital transformation initiatives is the creation of new business models. At the same time, we are introducing digital technology to the organization under the CFO to increase its capabilities and productivity as part of the management infrastructure that supports value creation. In fact, we believe that digital transformation initiatives themselves are one of the sources of our competitiveness.

In the era of consolidated financial results and financial reporting, we have been able to upgrade and increase the efficiency of operations for financial results preparation since we began using SAP Financial Consolidation in earnest in 2017 and thereby putting in place systems that facilitate accurate, efficient financial reporting from Group companies. Also, we have made progress in improving business processes, establishing workflows, and digitalizing documents. The benefits of the aforementioned initiatives are the fact that we were able to announce financial results for the fiscal year ended March 31, 2020, and the new medium-term management plan on schedule, despite our having to adopt telework systems on a worldwide basis as part of COVID-19 preventative measures. Having completed the transfer of overseas core systems to SAP S/4 HANA last year, we plan to complete the transition of domestic SAP core systems to HANA this year.

Going forward, we plan to utilize machine learning and high-speed data platforms.

With respect to financial transactions, in 2018 we became the first corporation in Asia to use CLS Bank International® for currency settlements. Since then, we have continued to incorporate software as a service (SaaS) for financial transactions. For example, we have significantly increased productivity by utilizing financial transaction digital platforms, such as Finastra MiX®;* 360T™;* and Confirmation.com,* and by digitalizing transactions and balance confirmations. Participation in these initiatives is creating a virtuous cycle by helping develop the advanced, FinTech that venture companies are tackling, which in turn is providing us with even greater attachment to leading-edge technologies and services.

In addition, we are using Computer-Assisted Audit Techniques (CAAT) to detect and analyze fraudulent acts. Also, we are developing and utilizing original credit-rating models, an initiative that we have been advancing for some time in credit management. Other initiatives include promoting the utilization of machine learning for credit-rating decisions and the utilization of Robotic Process Automation (RPA) to automate work tasks and reporting.

Given the diverse array of businesses that Mitsui is engaged in around the world, one of its important responsibilities is to keep enhancing the functions that form the foundations of business management. More specifically, we must maintain a strong internal control system; build efficient business processes; and collect, analyze, and report information appropriately. In tandem with efforts to incorporate rapidly emerging advances in AI and digital technology and pursue digital transformation proactively, we want to increase corporate value by further demonstrating robust and advanced capabilities.

Near Term Financial Management

As a result of the dramatic changes in business conditions accompanying the spread of COVID-19, a deterioration in our business results is likely to be unavoidable in the fiscal year ending March 31, 2021. However, we will strengthen downside resilience even further by maintaining existing businesses and minimizing the damage to them, reducing costs rigorously, and revisiting without special exceptions the cash amounts and implementation timing both of projects for which investment has been approved and of investments for the maintenance of existing businesses. At the same time, we are looking ahead to the “New Normal” following the spread of COVID-19 so that we return to a growth trajectory as soon as possible. Precisely because the outlook has become more uncertain, we will proactively undertake disclosure and the creation of opportunities for dialogue so that shareholders and other stakeholders better understand our management strategies and can stay informed about our progress.

August 2020
Performance Highlights

**Profit (Loss) for the Year Attributable to Owners of the Parent / ROE**

- Enhance our stable earnings base
- Reform cost structure of resources and energy businesses

**Core Operating Cash Flow**

- Cash flows from operating activities minus cash flows from changes in working capital

**Total Shareholder Return Amount / Total Shareholder Returns as a Percentage**

- Total shareholder return amount (left scale)
- Total shareholder returns as a percentage of core operating cash flow (right scale)

**Equity Share of Production**

- Crude Oil & Gas
- Coal
- Iron Ore
- Copper

**Power Generating Capacity (Gross)**

- Total shareholder return amount (left scale)
- Total shareholder returns as a percentage of core operating cash flow (right scale)
- Total shareholder returns as a percentage of profit for the year (right scale)
Review of the Previous Medium-term Management Plan

Under the previous medium-term management plan, Driving Value Creation, Mitsui set four key initiatives in line with its vision of “A pool of diverse professionals that take the initiative to create new businesses and actively leverage the Mitsui Group’s comprehensive strengths and global network for sustained creation of new value.”

Key Initiatives of the Previous Medium-term Management Plan

<table>
<thead>
<tr>

<tbody>
<tr>
<td>• Establish a profit base resilient to external changes and risks</td>
<td>1. Build a robust profit base and thoroughly strengthen existing businesses</td>
</tr>
<tr>
<td>• Dynamic allocation of resources</td>
<td>2. Establish selected new growth areas</td>
</tr>
<tr>
<td>• Strengthen our management foundation</td>
<td>3. Cash flow focused management; Strengthen financial base</td>
</tr>
<tr>
<td></td>
<td>4. Enhance Governance, Personnel, and Innovation functions</td>
</tr>
</tbody>
</table>

Summary of Quantitative Achievements

Mitsui broadly achieved its initial targets for core operating cash flow and ROE by enhancing its ability to steadily generate cash and by improving capital efficiency.

In the fiscal year ended March 31, 2020, Mitsui failed to attain its target for profit for the year, owing mainly to impairment losses on assets related to oil and gas development, among others.

Core Areas and Growth Areas

In the Company’s core areas of Mineral & Metal Resources, Energy, Machinery & Infrastructure, and Chemicals, Mitsui steadily expanded the profit base through bolt-on investments, operational improvements, portfolio optimization including recycling, and reinforcing trading functions. In the Company’s growth areas of Mobility, Healthcare, Nutrition & Agriculture, and Retail & Services, we allocated management resources targeting Asia, with its growing middle class, and North America, with its constantly growing economy, thereby promoting the expansion of our businesses.

In the fiscal year ended March 31, 2020, Mitsui endeavored to strengthen the foundations of businesses related to the environment and health. In addition, Mitsui aimed to expand and horizontally develop peripheral businesses.

Final Investment Decisions for Mozambique Area 1

LNG Project and Arctic LNG 2 Project in Russia

In June 2019, Mitsui made a final investment decision for the Mozambique Area 1 LNG project, in which its affiliated company has a 20% interest. It is an integrated upstream-midstream project that encompasses all stages from natural gas production and liquefaction to LNG shipment. In September 2019, we made a final investment decision for the Arctic LNG 2 project in Russia, in which we have a 10% interest with Japan Oil, Gas and Metals National Corporation (JOGMEC). Through these projects, we will contribute to the reliable supply of energy to Japan and the rest of the world.

Investment in Vietnamese Shrimp Producer and Processor Minh Phu

In May 2019, Mitsui acquired approx. 35% of the shares in Minh Phu Seafood Joint Stock Company ("Minh Phu"), one of the world’s biggest shrimp producers. Through the strength of vertical integration, from shrimp farming to processing and sales, Minh Phu exports shrimp products to 50 countries including the U.S. and Japan. In 2013, Mitsui invested in Minh Phu Hau Giang Joint Stock Company, one of Minh Phu’s processing factories. Mitsui intends to expand sales for Minh Phu through its global sales network.
Ongoing Challenges from the Previous Medium-term Management Plan

Under the previous medium-term management plan, Mitsui steadily expanded the profit base in core areas, centered on Mineral & Metal Resources and Energy, in addition to strengthening non-resource areas, especially Machinery & Infrastructure and Lifestyle. Furthermore, the Company expanded the business base with an emphasis on the environment and health. To achieve medium- to long-term improvement in corporate value, as explained on page 4, in the new medium-term management plan, Mitsui will pursue key initiatives to address issues that became more apparent during the previous medium-term management plan.

## Ongoing challenges
- Further raise profitability of existing businesses
- Establish profit pillars in areas where Mitsui’s comprehensive strengths can be leveraged
- Transform employee mindsets, improve productivity, and reduce costs without compromise
- Bring talent into the Mitsui Group and strengthen training and development framework
- Continuously raise ROE and shareholder value

## New challenges in a ‘New Normal’
- Strengthen risk management thoroughly and immediately
- Reduce costs and strengthen resistance to downturns
- Respond with agility to the accelerating digital economy
- Manage with a long-term perspective, such as responding to climate change

## Toward a New Stage

From a foundation in core areas and growth areas, we strove to strengthen and expand under the previous medium-term management plan. Mitsui will now enter the next stage, creating a robust cash generation capability, even in uncertain business conditions, while hoping this foundation and thoroughly managing risks. In addition to ongoing issues from the previous medium-term management plan, we will address new issues that have emerged as a result of the COVID-19 pandemic.

### Core Businesses
- Acceleration of the strategy ‘Make strong business stronger’

### Strategic Focus
- Establish next earnings pillars in fields where Mitsui can leverage its comprehensive strengths

### Core Areas / Growth Areas

### A New Stage

### Medium-term Management Plan 2023

### Callouts
- *1 Cash flows from operating activities minus cash flows from changes in working capital and time deposits
- *2 Includes ¥50bn increase in operating cash flow associated with application of IFRS 16 “Leases”
- *3 Cash flows from operating activities minus cash flows from changes in working capital

In line with our renewed corporate management philosophy (MVV) and our Materiality updated in 2019, we have formulated Medium-term Management Plan 2023—“Transform and Grow,” under which we will contribute to the development of society through our growth as a company, encouraging all of our employees to transform themselves, as well as keeping up with the accelerating pace of change in social needs, such as advances in digital technology and increasing interest in the environment.

### Quantitative Targets

- **Core operating cash flow**
  - ¥550 bn (Fiscal year March 2023)
  - ¥561.0 bn (Fiscal year March 2023)

- **Profit for the year**
  - ¥400 bn (Fiscal year March 2023)
  - ¥391.5 bn (Fiscal year March 2023)

- **ROE**
  - 10% (Fiscal year March 2023)
  - 9.7% (Fiscal year March 2023)
1 Strengthen Business Management Capabilities

Mitsui aims to quickly return to a growth trajectory by strengthening the profitability of existing businesses. The Company intends to reinforce its business management capabilities as an organization, while allocating management resources including human resources to the businesses where Mitsui is able to take the lead and produce results.

Specific Measures

- Improve business management expertise
- Foster and deploy business management talent
- Focus areas: Prioritize allocation of management resources, including personnel, in businesses and companies where profitability improvement can be realized

Strengthening Business Management Capabilities: Leveraging the Corporate Development Division

The Corporate Development Division was set up in 2013 as a Companywide support organization belonging to the Corporate Development Business Unit. In addition to teams in charge of improving management and increasing corporate value at investees, we have created a team of M&A specialists in charge of improving the quality of investment portfolios, and a dedicated team in charge of risk management, drawing from our pool of professionals in Japan. Team composition is unique such that specialists from investment banking, private equity and management consulting firms are recruited actively and those professionals are grouped with talent internally selected. These teams take a hands-on, results-oriented approach to getting involved in business units and important investees. The teams are involved in a broad range of initiatives, from earnings improvement to PMI and organizational reforms. Based on actual conditions received from hands-on support mentioned above, the division takes the role as a problem-solving leader to propose solutions to the Company’s management regarding managerial issues such as the development of management talent for the entire Mitsui Group. To this end, the division has built a robust collaboration framework with corporate organizations, such as the Corporate Planning & Strategy Division, the Investment Development, the Human Resources & General Affairs Division. To improve management at investees, teams in charge work on-site to improve management, and teams play roles in training and grooming business management personnel from the talent pool.

Utilization Scheme of the Corporate Development Division

- Mitsui & Co.
- Mitsui Group (investees)
- Corporate Development Division
- Business unit
- Management / Corporate
- Management / Issues
- Management / Brain
- Management / Value
- Propose solutions to Group management issues
- Teams of experts take hands-on approach to solving issues
- Training of business management personnel, accumulation of knowledge and know-how
- Improve returns while staying conscious of investment asset size

2 Evolve Financial Strategy and Portfolio Management

In addition to maintaining and improving our robust financial base, we pursue flexible and strategic capital allocation to growth investments and additional shareholder returns. We also thoroughly review investment amounts and timelines for projects for which an investment decision has already been made. With regard to shareholder returns, the Company aims to increase the total shareholder return ratio above the level of the previous medium-term management plan, while implementing capital allocation with a focus on improving capital efficiency and medium- and long-term growth opportunities.

For more information, please refer to CFO Message (P.56).

3 Personnel Strategy

Mitsui aims to create businesses and increase value through global talent management, including raising the professionalism of each and every employee, and harnessing their talents in the right place and at the right time, while organically connecting together its diverse pool of professionals. We are keen to change employee mindsets and behavior patterns, catalyzing “intellectual chemical reactions,” and accelerating the move toward a new working style that combines robust digital platforms and new head office functions.
5 Strengthen Profitability of Core Businesses and Take on Challenges in New Businesses

In the core businesses of Mineral & Metal Resources, Energy, Machinery & Infrastructure, and Chemicals, we will accelerate our "make strong businesses stronger" strategy. Mitsui aims to optimize its business portfolio to be more competitive over the medium and long term by recycling assets, including divestitures, and investing to maintain and expand reserves of natural resources.

- **Mineral & Metal Resources**: Iron ore, coking coal, copper, recycling
  - Maintain and expand iron ore volumes, and raise quality of coking coal assets
  - Expand, and raise quality of copper and Promote recycling business

- **Energy**: Oil, gas, renewable energy, new energy
  - Increase oil and gas production volume and deposits, raise LNG production capacity, and raise competitiveness of existing assets
  - Increase trading income, and expand renewable and new energy businesses

- **Machinery & Infrastructure**: Power generation, marine energy, gas distribution, automotive, shipping
  - Raise quality of asset portfolios, and Promote DX/optimization operations
  - Transform existing business, upgrading trading functions

- **Chemicals**: Methanol, tank terminal, coating materials, personal care, environmental chemicals, agriscience, wellness
  - Increase sophistication in trading, enhance network
  - Stronger resilience in existing businesses, raise profitability
  - Recycle, reuse, commercialization and application of environmental-focused new materials and technologies

Mitsui has created values by connecting various countries, regions and industries, thereby expanding its potential as a general trading company. To install a "creative" mindset and behavior patterns in its own businesses, the Company will accelerate initiatives centered on the Moon Creative Lab, a business creation platform. Through digital transformation (DX), the Company aims to create new businesses spanning business units, in addition to improving the productivity and competitiveness of existing businesses.

Timing of Earnings Contributions from Quality Business Assets

The chart shown below outlines the timing of earnings contributions from quality business assets fortified during the previous medium-term management plan in the Company’s core businesses of Mineral & Metal Resources, Energy, Machinery & Infrastructure, and Chemicals.

**Strengthen profitability and pursue new business**

- **Medium-term Management Plan 2023**
  - Core Operating Cash Flow ¥361.0 billion
  - Profit for the Year ¥391.5 billion

4 Sustainability Management / Evolution of ESG

With a focus on the impact to its operations and public demand and expectations, Mitsui mapped out important sustainability issues to determine the issues it should tackle on a Companywide basis during the period of the management plan, excluding issues toward which it is already engaging. As a result, Mitsui will address climate change, the circular economy, and business & human rights as priority issues under the current medium-term management plan. Please see page 44 for information about our response to climate change, and page 118 for more on business and human rights.

Mitsui will continue to strengthen corporate governance and improve the effectiveness of the Board of Directors.

Quantitative Targets

In the fiscal year ending March 31, 2021, Mitsui expects profit for the year to fall sharply compared with the fiscal year ended March 31, 2020, due to the spread of COVID-19. However, management estimates that core operating cash flow will be ¥400 billion. Mitsui will steadily execute the corporate strategy outlined in the management plan, and aim to quickly return to a growth trajectory.

- **Core Operating Cash Flow** ¥400.0 billion
- **Profit for the Year** ¥170.0 billion

Note: Core operating cash flow for the fiscal year ended March 31, 2020 has been revised to deduct payment of lease liabilities.
Strategic Focus

Building on the strategies that we pursued during the term of the previous medium-term management plan, we have established a strategic focus on fields that promise conspicuous growth and where we can realize our comprehensive strengths. Over the medium to long term, Mitsui will develop these businesses that will grow to support the earnings base.

Energy Solutions

With a platform that primarily comprises existing LNG development and power generation businesses as a basis, we will advance smart energy services as well as businesses that help mitigate global warming.

Over the long term, energy demand is expected to increase as the population and economy grow globally. However, society’s increased concern over the issue of climate change will cause a divergence in the traditional correlation between GDP and CO2 emissions, thereby giving rise to new business opportunities. In response to the issue of climate change, Mitsui will expand and accelerate initiatives focused on businesses that are likely to experience medium- to long-term growth.

Climate Change Countermeasures

Mitsui has become the first general trading company to set goals to achieve net-zero emissions by 2050. To this end, we will pursue the three main initiatives shown below. Further, we have introduced an in-house carbon-pricing system both for risk evaluations of existing businesses and for decisions on new investments.

Opportunities in Energy Solutions

In April 2020, Mitsui established the Energy Solutions Business Unit, which will play a leading role in the realization of a low-carbon and a carbon-free society by focusing on the following business fields.

- **New Downstream Electricity** (Distributed power supply, energy management services, retail)
  - We will offer customers one-stop services by advancing multiple energy-related businesses in such areas as electricity and gas retail, solar power generation and storage batteries, energy procurement, and energy-saving consultation and by advancing initiatives linked to electricity trading.

- **Next-Generation Fuels** (Bioethanol, sustainable aviation fuel)
  - While closely monitoring technological innovations, manufacturing cost reductions, and the incentives of respective regions, we will accelerate the introduction of bioethanol, sustainable aviation fuel, and other next-generation fuels.
  - Amid projections of growth in demand for gasoline, we will commercialize next-generation ethanol in such countries as China and India.

- **Hydrogen and Carbon Management** (Hydrogen, carbon credits)
  - In the short to medium term, we will pursue projects engaged in local production for local consumption, which is a field being driven by the progressive support systems of governments. As for the long term, Mitsui will build transportation supply chains. Also, plans call for the advancement of competitive carbon credit projects and carbon capture, utilization, and storage (CCUS) projects.
Healthcare / Nutrition

In the healthcare and nutrition sector, based on business foundations mainly comprising IHH Healthcare Bhd. (IHH), we will pursue multifaceted initiatives related to nutrition for presymptomatic diseases and disease prevention, and medical and healthcare data. In these ways, Mitsui will accelerate business growth and create added value unique to the Company.

External Environment

In emerging countries, mainly in Asia, medical expenditures are growing in accordance with population growth, the aging of societies, the expansion of middle-income classes and increasing rapidly as disease patterns change resulting from economic development. Meanwhile, medical service is not keeping up with demand, and a widening of the supply-demand gap is projected. Further, we expect healthcare value chains to extend further into the wellness field due to such factors as demand in the area of presymptomatic diseases and disease prevention and to the popularization of online medical consultations, which have been attracting attention as a method of preventing the spread of COVID-19. Therefore, multifaceted value creation including digital technology utilization is required.

Enhancement of the Value of the Hospital Business

In 2011, Mitsui initially acquired an equity interest in IHH. Since becoming IHH's largest shareholder in 2019, we have been further increasing our influence on business management and steadily implementing growth strategies in close collaboration with the company’s management team. Going forward, we intend to expand our business foundation, especially focusing on IHH, through (1) regional expansion by growing business in China, India, and other countries; (2) functional expansion by integrating and/or spinning out hospital ancillary businesses such as examination and diagnostics; and (3) business expansion by leveraging the huge amounts of medical data collected by IHH. Also, with our sights set on the "New Normal" emerging worldwide as a result of the current COVID-19 pandemic, we will realize sustained growth by utilizing online medical consultations and AI to transform methods of providing healthcare and to heighten consumer trust.

Utilization of Healthcare Data to Create New Value

Data is expected to become the ‘currency’ of the next generation. We will implement value creation aimed at utilizing data to propose solutions that improve the management of hospitals and to promote medical expenditure reductions and personalized medicine in such ancillary areas as insurance, drug discovery, presymptomatic disease measures, and disease prevention. While realizing this will not be easy, such as the measures it takes to ensure information security, we will promote data acquisition, accumulation, and mutual usage primarily in hospital, examination, diagnostics, and logistics businesses with a view to realizing better medical care and healthcare. In the future, we will implement multifaceted initiatives with our sights set on expanding into the wellness field, and we will contribute to create a better tomorrow where people smile and live healthy, enriched lives.

Market Asia

In addition to maintaining and expanding resources and infrastructure businesses—which we originally have strength in—we aim to build businesses that mainly target middle-income consumers, who are driving high economic growth. As for consumer businesses, due to the penetration of digital technologies, power is gradually shifting toward customers who won access to information and enjoy an increasingly advantageous position. Further, the millennial generation, who are digital natives, are expected to give additional impetus to this trend. Accordingly, Mitsui will capitalize on its comprehensive strengths to build platforms that provide Asian consumers with the products that they need.

Consumer Businesses Leveraging Digital Technologies

Mitsui will help Asians realize the quality of life to which they aspire by combining the Company’s unique functions and businesses to build a differentiated consumers’ ‘ecosystem’ rooted in Asia.

Consumer Ecosystem (Simplified)

Examples of Our Initiatives

Food and Retail

- We will cater to diversifying food needs through such businesses as a dairy products business in India and a curry restaurant business in Indonesia.

Retail Finance

- By utilizing the huge volume of data gathered through our motorcycle retail finance business in Southeast Asia and by utilizing AI technology jointly developed with a partner, we have created an original credit and collection scoring system that is enhancing our risk adaptation capabilities.

Healthcare

In addition to the hospital business, we will help upgrade Asia’s health and wellness services through such initiatives as the development of an integrated prevention and healthcare platform.

Resources and Infrastructure Businesses

Mitsui’s core businesses in the areas of mineral & metal resources, energy, and social infrastructure have robust business foundations in Asia. Going forward, we will promote initiatives in new fields to strengthen and evolve these business foundations. Such efforts will entail moving forward with the development of distributed energy generation businesses and other energy solutions businesses, downstream businesses, and such peripheral value-added businesses as computerized construction systems.
Initiatives in Digital Fields

Under our digital transformation (DX) initiative that started with the previous medium-term management plan, the Mitsui Group is effecting a transformation of its high-value-added business model by utilizing its on-site operational know-how and technologies, as well as digital technologies, backed by its broad base of business assets. Approximately 130 projects were examined during the previous medium-term management plan, and roughly 50 projects went on to the experimental stage, with 10 of these projects graduating to the operational stage.

The COVID-19 pandemic has underscored the importance of our digital transformation (DX) initiative. Under the new management plan, we are accelerating both offensive and defensive DX initiatives with the aim of creating businesses across the entire Company.

Business Transformation & Innovation with Digital

In Mitsui’s DX framework, the objective is to reduce costs through efficiency gains and optimization (Solution 1: S1) and expand sales (Solution 2: S2), improving the quality of existing businesses. Furthermore, we are creating new businesses and business models (Transformation: T) from a standpoint that differs from existing businesses. Mitsui is striving toward the realization of its “Transform and Grow” vision by overlaying this DX framework on its corporate strategies in Medium-term Management Plan 2023.

Mitsui engages in a broad range of businesses in many countries and regions. In other words, we have a diverse and varied perception of the real world (based on actual experiences). By using the data we gather to incite a digital version of the world (a virtual space), we are able to conduct analyses and make predictions about the future, and feed this back to the real world. By repeating this process, we aim to increase the efficiency of our real-world operations.

Medium-term Management Plan 2023

DX Framework

Medium-term Management Plan 2023

DX Framework

- **S1**: Greater efficiency
- **S2**: Greater added value

**Transform and Grow**

- Strengthen business management capabilities
- Strengthen profitability of core businesses
- Strategic focus
- Take on challenges in new businesses
- Thoroughly implement and achieve S1/S2 (short- to medium-term) for strengthening business management capabilities
- Implement and achieve T for next-generation businesses (medium- to long-term)

Over the short to medium term, by thoroughly implementing S1/S2, we aim to amass Quick Wins while strengthening and advancing the profitability of existing businesses in the Mitsui Group, including trading operations. Using our accumulated know-how and knowledge, we are targeting Big Wins that create a future business foundation, including in new domains, by implementing T for next-generation businesses with a medium- to long-term view.

Structure for Advancing DX Strategy

The Information Strategy Committee has been established as an advisory body to the Corporate Management Committee and chaired by the Chief Digital Information Officer (CDIO). Members include directors, executive officers, operating officers of relevant business units, and general managers of relevant corporate staff divisions. This committee formulates Companywide information and IT strategies, key policies related to building business foundations and advancing information strategies, and monitoring efforts. The Information Strategy Committee met a total of five times during the fiscal year ended March 31, 2020, confirming Digital Transformation initiatives, discussing changes to work styles related to the move to new offices in 2020, reviewing work processes, and deliberating upgrades to core systems. The minutes of the Information Strategy Committee meetings are periodically reported to the Corporate Management Committee and referred to in decisions on management policy for Mitsui.

DX Case Study: Asset Foundation of Existing Businesses

Along with MODUC, Inc., Mitsui collects FPSO3 operations data for analysis by AI to contribute to stable operations (improve operating rates), with the objective of improving the quality of the FPSO business and maximizing lifecycle value.

In January 2020, our FPSO operation in Brazil was designated by the World Economic Forum (WEF) as the most advanced plant in the world, leading the Fourth Industrial Revolution.

With the aim of accelerating DX initiatives, the Integrated Digital Strategy Division was newly created to integrate offensive and defensive DX promotion organizations in 2019. Additionally, a front-facing organization was established to respond to both business division and regional division, and the Center of Excellence (CoE) was established as a cross-functional organization to promote DX. These two organizations will also work to accelerate DX initiatives.

DX Case Study: New Technology Deployment

In 2018, Mitsui participated in AI FUND, L.P., a fund created by Andrew Ng, a world-renown researcher in artificial intelligence, with a focus on the AI field. In 2019, AI FUND and Mitsui created BEARING.ai, an AI company in the field of streamlining shipping operations, the first major application of deep learning algorithms to analyze vessel fuel economy and offer services for optimizing shipping routes. Field experiments are currently being conducted with leading shipping companies.

**Composition by Operating Segment**

- **Iron & Steel Products**: 38%
- **Mineral & Metal Resources**: 16%
- **Energy**: 16%
- **Machinery & Infrastructure**: 16%

**Notes**:
1. The horizontal and vertical totals may not match as a result of differences that occurred due to the rounding of figures.
2. “Net investment cash flow” is calculated from core operating cash flow and differs from free cash flow calculated using conventional accounting methods.
3. “Other non-current assets” includes non-current receivables, investment property, intangible assets, and deferred tax assets.

---

**Medium-term Management Plan**

On April 1, 2020, the Machinery & Infrastructure Segment was reorganized into two new business units following the completion of organizational restructuring. The Business Unit “Iron & Steel Products” and the Machinery & Infrastructure Segment reflect transfers carried out following this organizational restructuring, excluding the reorganization of organizational numbers.
Segment Strategies

Iron & Steel Products Segment

• Iron & Steel Products Business Unit

Business Activities
To respond to diverse industrial and latent customer needs, we procure, supply, sell, and invest in processing, functional trading, parts production and service businesses for iron and steel products, both in Japan and in various overseas regions.

Business Environment
• Slowdown in growth in global steel production, including China and Japan. Local production for local consumption in emerging countries.
• Needs are becoming more sophisticated for materials, especially in next-generation mobility (lighter and stronger materials).
• Realignment of steel production, processing and supply chains in response to low-carbon and circular economy.

Progress under Previous Medium-term Management Plan (top) and Targets in Medium-term Management Plan 2023 (bottom)
• Repositioned within steel product value chain, streamlined and optimized businesses. Still need to maximize the value of investment projects.
• A professional group leveraging the power of steel and other materials to create products and services that anticipate industry challenges and potential needs of customers. Work to develop and improve the value of businesses in terms of both investment and trading in the four domains of mobility, infrastructure, energy, and logistics, based on the themes of next-generation mobility, energy solutions, circular economy, and digital economy.

Individual Strategies

Mobility
We contribute to the development and manufacture of key parts for next-generation mobility. We aim to maximize enterprise value of Gestamp Automoción S.A. through initiatives to increase return on investment and deeper involvement in management, while working to strengthen peripheral trading business and implement new initiatives for next-generation businesses.

Infrastructure
We intend to strengthen and expand inspection, maintenance and repair (IMR) businesses in the Electrical Arc Furnace, infrastructure processing, steel logistics, and scrap businesses, and extend the operating life of infrastructure.

Energy
We contribute to energy solutions through the stable supply of energy and the renewable energy & energy conservation businesses. We also pursue highly functional trading in the oil and gas field, and will establish a business foundation in the renewable energy sector centered on GRI Renewable Industries, S.L. and GEG Holdings Limited.

Logistics
We are taking initiatives to expand the value at NIPPON STEEL TRADING CORPORATION, and to launch a digital platform business.

Impact from COVID-19 and Response Policies
• Impact materialized with weaker demand for steel products; lower operating rates at affiliated companies as economic activity stalled.
• Pace of recovery in economic activity varies by region, but we already started to streamline businesses, including cost reductions.

Vision
A professional group leveraging the power of steel and other materials to create products and services that anticipate industry challenges and the potential needs of customers.

Mobility
Promote electric vehicles and seek to reduce the weight of vehicle frames.

Strengthen existing businesses, develop and promote new businesses

Logistics
Digital transformation to reform distribution.

Energy
Contribute to the stable supply of energy.

Infrastructure
Promote Electrical Arc Furnace and IMR businesses.

Next-generation mobility

Digital economy

Circular economy

Contribute to the Development and Manufacture of Key Parts for Next-Generation Mobility

Electric vehicle powertrains
Develop products for electric vehicle powertrains and secure related steel products. Highly functional trading in electrical steel, production of motors for electric vehicles, specialty steel for powertrains.

Reduce weight of vehicles and strengthen materials
Tap into market growth for advanced materials. Automotive parts business (Gestamp), use of multi-materials.

Batteries
Develop demand for electric vehicles and hydrogen fuel cells, etc.

Heat-resistant stainless steel for fuel cell battery cases

Mineral & Metal Resources Segment

Business Activities
We ensure a secure and stable supply of mineral and metal resources essential to society through our business investments and trading activities across the value chain. We also promote recycling business in anticipation of sustainability and the circular economy.

Copper
We aim to maximize the value of existing assets in Chile and strengthening functions through the value chain.

Coal
We are creating a value chain in secondary battery raw materials.

Impact from COVID-19 and Response Policies
Impact on lower production and sales in mining operations, and lower trading volume due to weaker demand.
Along with operators in each business, we are taking thorough measures to prevent the spread of COVID-19 and minimizing its impact on operations.

Impact from COVID-19 and Response Policies
Impact on lower production and sales in mining operations, and lower trading volume due to weaker demand.
Along with operators in each business, we are taking thorough measures to prevent the spread of COVID-19 and minimizing its impact on operations.

Individual Strategies

- We are developing new iron ore deposits at Robe River and BHP South Flank, to establish a solid earnings base in the iron ore mining business in Australia, and contributing to increase the value of Vale S.A.

- We are improving the value of the Australia coal mining business and the Mozambique operations and contributing to optimize the portfolio.

- We are aiming to maximize the value of existing assets in Chile and strengthening functions through the value chain.

- We are creating a value chain in secondary battery raw materials.

- We are responding to changes in the industry structure toward a low-carbon society and promoting ESG initiatives.

Progress under Previous Medium-term Management Plan (top) and Targets in Medium-term Management Plan 2023 (bottom)

- Built a solid earnings base, improved invested asset value: iron ore, developed new ore deposits to replace existing deposits; coking coal, optimized asset portfolio; copper, improved invested asset value.

- Addressed changes in business environment, new business development: implemented new initiatives in recycling businesses and reduced emissions of greenhouse gases.

- In addition to reinforcing underground resource business, aim to balance economic viability and sustainability by combining with recycling business, with eyes on sustainability and the circular economy.

- Implement measures in response to changes in global environment (low-carbon society), and create businesses in the value chain by taking on challenges in new domains.

Business Environment
The Chinese economy has continued to expand despite the uncertainties in the global economy including U.S.–China trade friction. As the presence of Europe, the U.S. and Japan declines, India and Southeast Asia have become more prominent.

The Chinese economy has continued to expand despite the uncertainties in the global economy including U.S.–China trade friction. As the presence of Europe, the U.S. and Japan declines, India and Southeast Asia have become more prominent.

The Chinese economy has continued to expand despite the uncertainties in the global economy including U.S.–China trade friction. As the presence of Europe, the U.S. and Japan declines, India and Southeast Asia have become more prominent.

Mitsui & Co., Ltd. Integrated Report 2020
### Energy Segment

#### Business Environment

- The dual challenge of balancing cleaner energy with more energy is an ongoing issue.
- Business opportunities are increasing in fields that help reduce environmental load amid growing social interest in climate change.
- The role and expectations of new energy solutions is increasing.

- Demand for energy will increase over the long term alongside growth in the world's population and economy, and fossil fuels will remain a primary energy source.

#### Progress under Previous Medium-term Management Plan (top) and Targets in Medium-term Management Plan 2023 (bottom)

- Expanding and improved quality of robust upstream asset portfolio, including LNG, advanced midstream and downstream trading functions, and made progress on optimizing physical distribution.
- Expand efforts in distributed RE power sources, advanced electric power trading functions, made progress on commercialization of next-generation fuels, deepened collaboration with other divisions, created new business unit.
- Maintain and expand medium- and long-term profitability by evolving our competitive business portfolio based on the dual challenges. Create new value in the energy value chain.
- Expand and accelerate efforts in the energy solutions field. Formulate and execute Groupwide strategies to drive creation of next-generation businesses, leverage comprehensive strengths by integrating businesses.

#### Individual Strategies

- **Upstream oil and gas development**
  - By becoming more involved in projects, maximize value of existing assets and sharpen cost competitiveness.
  - Reform & business model, leverage knowledge and networks in existing businesses to advance new low-carbon businesses, and evolve the business portfolio.

- **LNG**
  - Steadily launch Arctic LNG 2 and Mozambique LNG development projects, enhance profitability and maximize value of existing projects.
  - Strategically advance our balanced and highly competitive LNG supply portfolio by improving capital efficiency and recycling assets.

- **Trading**
  - Increase profitability with a greater awareness of capital efficiency and risk management while monitoring demand needs. Build logistics flows with an eye on transition to non-fossil fuels.
  - Create, improve and optimize LNG sales portfolio that contributes to maximizing value of upstream operations.

- **Renewable energy generation and related businesses**
  - Expand and accelerate initiatives in distributed power sources, storage batteries, retail and logistics. Advance toward an integrated service provider for end consumers.

- **Next generation fuel business**
  - Create a next-generation fuel business portfolio, commercializing next-generation ethanol and bio jet fuel business.

- **Hydrogen and carbon management**
  - Establish business model for hydrogen value chain. Create business model for carbon management in offset operations, such as emissions credits.

#### Impact from COVID-19 and Response Policies

- We will collaborate with operators to continuously and thoroughly review capex/opex, and aim to strengthen cost competitiveness further.
- In the trading business, we are paying even closer attention to managing credit and other risks. We are also monitoring demand recovery trends by region and by product.
Machinery & Infrastructure Segment

- Infrastructure Projects Business Unit
- Mobility Business Unit I
- Mobility Business Unit II

Business Activities
We contribute to the development of countries and the creation of better lives through the reliable, long-term supply of indispensable social infrastructure such as power, gas, water, railways and logistics. Through strengthening contact points with end users including consumers, we provide sales, financing, leasing, transportation and logistics, and investment in various areas, including large-scale plants, marine resource development facilities, ships, aerospace, railways, motor vehicles, and mining/construction/industrial machinery.

LNG transport carrier for the U.S. LNG export project (Cameron)

Managing Officer, Chief Operating Officer of Mobility Business Unit I

Tatsuya Okamoto
Managing Officer, Chief Operating Officer of Mobility Business Unit II

Progress under Previous Medium-term Management Plan (top) and Targets in Medium-term Management Plan 2023 (bottom)

- In existing business domains, we steadily completed construction work and strengthened our profit base through continued receipt of orders. We also enhanced asset quality through strategic recycling, promoted efforts in new frontiers, made progress toward next-generation businesses, and demonstrated strong performance.
- We achieved trading growth in the ship and aerospace businesses, carried out additional investment in U.S.-based Penske Truck Leasing Co., L.P., and accelerated efforts toward the introduction of commercial vehicles. We also invested in the vehicle operating leasing business, among other efforts.
- We will continue efforts to enhance the quality of existing assets, establish profit bases, and transform the nature of our operations. We will also demonstrate our comprehensive strengths in a manner that goes beyond our existing business domains and step-up initiatives toward digital transformations.
- We will implement Groupwide management, strengthen EV/FCV initiatives, and incorporate growth from the MaaS domain. We will also expand platforms to capture growth in Asia.
- We will make a well-balanced business portfolio through business development and management-type investments. In addition, we will enhance asset quality by promoting recycling and establishing next-generation platforms.

Construction equipment
- Leveraging of comprehensive strengths in the construction business, promoting space-related initiatives, such as the satellite deployment business.
### Individual Strategies

#### Focus Businesses

**Materials and Infrastructure Business**

- Toward Realizing a Hydrogen-Based Society
  - In its Medium-term Management Plan 2023, Mitsuň has positioned energy solutions as a growth area, and is focusing on hydrogen energy as a promising clean energy of the future in response to demand for a low-carbon society. Specifically, in the FCEV-related business, Mitsuň supports the creation of a supply chain with FCEV hydrogen tanks manufactured by Hexagon Composites ASA in Norway, the world’s largest manufacturer of lightweight pressurized tanks. We also supported the development of infrastructure for realizing a hydrogen society through FirstElement Fuel, Inc., a company that develops hydrogen refueling stations in California.

**Integrated Agricultural Input Business**

- Mitsuň is engaged in the agricultural input distribution business, centered on Latin America. In particular, we are promoting the use of biopesticides that enhance the natural immune system of plants, and optimize the use of chemical fertilizers based on soil analysis. Amid the increasing use of biopesticides made from fungus and plant extract, the Company’s subsidiary, Certis USA L.L.C., is stepping up efforts to achieve agricultural practices in harmony with the environment as a leading firm in the biopesticides industry.

### Focus on Large-Scale and Global Solutions

- Mitsuň’s business includes a wide range of products and technology, from upstream and midstream chemicals such as basic chemicals and fertilizers to downstream chemicals that meet diverse market needs, including functional materials, electronic materials, specialty chemicals, forestry and housing materials, agricultural input, fertilizers, feed additives, and flavor and fragrance chemicals. We are also pursuing new initiatives in the tank terminal business, carbon fiber, and human nutrition.

### Seize New Growth Opportunities

- **Contribute to the realization of a sustainable society and a circular economy**
- **Create customized and innovative value through material design**
- **Improve productivity and create new businesses through digital transformation**

#### Strategic Approaches

- **Business Environment**: Increasing importance of carbon management and creation of a circular economy as a necessity to address climate change and environmental issues; global expansion of the oil to chemicals trend as oil refineries shift to chemical production.

- **Opportunities**: Engage in new growth businesses; increase profits in existing functions and enhance trading; expand trading networks.

- **Integrated Material Design**: Solutions based on science that help improve nutrition and the health of people and animals.

- **Expand environment-related businesses toward realization of a sustainable society**: Participated in paint business in Europe to address environmental issues and develop products to address diverse customer needs; strengthened initiatives in health domain, where needs are growing for disease prevention and day-to-day health management.

- **Value creation through material design in response to changing trends**: Contribution to improve quality of life and realization of a sustainable society through the stable supply of materials.

- **Value added to customers by offering differentiated materials**: Provides solutions based on science that help improve nutrition and the health of people and animals.

### Impact from COVID-19 and Response Policies

- **Decrease in production in manufacturing businesses for durable consumer goods as well as decrease in trading volume amid slump in demand**.
- **Further improve proposal abilities to customers and enhance our network**.
- **Implement thorough risk management measures and strengthen competitiveness by reducing costs**.
Segment Strategies

**Lifestyle Segment**

- **Food Business Unit**
- **Retail Business Unit**

**Business Activities**
Adapting to changes in consumption and lifestyles while meeting consumers’ diverse needs, including digital, we provide value-added products and services, develop businesses and make investments in business fields such as food resources and food products, fashion and textiles, retail services, healthcare, pharmaceuticals, and integrated services.

**Business Environment**

- **Values** and experiences change products to provide a personalized business.
- **Increase** in value and income, and the life of goods in emerging countries, along with changes in production sites and volumes as a result of innovating in manufacturing technologies.
- **High**-value-added needs are increasing, driven by spending patterns of millennials and Generation Z, changing lifestyles of women in society, and growing interest in health, the environment and sustainability. The structure of the retail business is changing from the spread of digital technology and technological innovation, such as AI and robotics.
- There is a widening gap in healthcare supply and demand, while medical expenditures increase in emerging countries, especially in Asia. The use of technologies is accelerating across a wider spectrum of healthcare, such as remote diagnosis and the wellness field, including preventative healthcare. Demand is increasing for integrated, high value-added services in the mature market of food services and equipment management.

**Initiatives in the intermediary distribution domain**

- We endeavor to ensure a reliable supply of quality food through our networks that connect global bases, including those in Japan, to major food production assets across a wide range of product lines.

**Examples of Initiatives (Food, Retail, Healthcare services)**

- **Global logistics network for food**
  We endeavor to ensure a reliable supply of quality food through our networks that connect global bases, including those in Japan, to major food production assets across a wide range of product lines.

- **Quality control and product development capabilities, and emphasis on sustainability**
  In Japan and overseas, we leverage our quality control capabilities, which we have cultivated domestically through Group companies such as Mitsui Norin Co., Ltd., Prifoods Co., Ltd., and Mitsui Sugar Co., Ltd., as well as our product development and proposal capabilities, which we have gained through our development center and Group companies such as Russian Food Materials Co., Ltd.
  We created a sustainable food supply chain, utilizing by-products in biomass power generation, for example, and the production of marine and feed products through science and digital transformation.

- **Initiatives in the intermediary distribution domain**
  In the intermediary distribution field, Mitsui & Co. Retail Holdings Co., Ltd. was established in June 2020 as an umbrella for domestic Group intermediary distribution companies in order to organize and flexibly take advantage of Group company functions in the intermediary distribution domain.

**Progress under Previous Medium-term Management Plan (top) and Targets in Medium-term Management Plan 2023 (bottom)**

- **Major Subsidiaries & Associated Companies (Food Business Unit)**

**Impact from COVID-19 and Response Policies**

- Production of consumer goods and services has had a negative impact on the restaurant industry and fashion industry, especially luxury brands, but has hastened growth in e-commerce and digital media.
- In the hospital business, stay-at-home orders have reduced demand for healthcare for patients with mild conditions and medical sources. Meanwhile, we have enhanced all our capabilities to provide resources to national hospitals accepting COVID-19 patients.
- We are also accelerating efforts to use digital technology including online medical consultations.
Business Environment
• Initiatives are underway to connect to services with a diverse range of data being generated in digital society.
• Needs are growing for digital infrastructure to accommodate the increase in data traffic; in addition to the increasing needs for cost-effective services.
• Functions of insurance risk management are becoming more important due to an increase in natural disasters; alongside growing business opportunities for environmental derivatives.
• It has become harder to hire domestic workers, and rising personnel costs have increased the need to seek out greater efficiency with robotics.

Progress under Previous Medium-term Management Plan (top) and Targets in Medium-term Management Plan 2023 (bottom)
• Solid performance at major domestic affiliated company, including MITSU KNOWLEDGE INDUSTRY CO., LTD, which posted record-high profits. Promoted the hiring and training of young managers.
• Progressed domestic real estate business steadily, participated in buyouts in Japan and Asia. Enhanced functions of Corporate Development Division.
• Reinforce existing businesses, centered on major domestic affiliated companies in Japan, create new businesses, co-create with other divisions through ICT.
• Create new value by combining knowledge in financing, real estate and logistics businesses with groupwide experience and networks.

Individual Strategies
Area Our Approach
ICT
• Further strengthen profit base of major domestic affiliated companies such as MITSU KNOWLEDGE INDUSTRY CO., LTD and Mitsui Bussan Electronics Ltd.
• Create new businesses using new technologies and business models
• Drive to create new businesses and facilitate digital transformation by pairing together knowledge of industry and business from other business units with knowledge in the ICT area.

Corporate Development
• Thoroughly strengthen existing businesses, such as by reinforcing relationships with existing customers, expanding the customer base, strengthening the management foundation, including IT, and improving functions.
• Implement initiatives for value improvement in real estate and real state development responding to the needs of regions and fields, while progressing procurement, development including redevelopment, and realization of profits.
• Contribute to our business transformation and expand the pool of management talent while continuing to assign specialized functions on a global basis.

Impact from COVID-19 and Response Policies
• Suspension of operation and transportation, decline in sales due to weaker demand and rental income in real estate, suspension of fund launches as well as asset recycling.
• Demand increase in some businesses led by stay-at-home demand.
• Pursue sales activities and improve business efficiency through using IT, and enhance investment disciplines.
Mitsui has a unique organizational structure that is built upon the two axes of product and regional expertise. Under this organization, we engage in its business activities while leveraging the respective strengths provided by these two axes and pursuing collaboration between them. One strength provided by our product expertise is our 16 Headquarter Business Units. Each Headquarter Business Unit formulates comprehensive strategies for each product it is responsible for, and these strategies integrate our domestic and overseas operations. Guided by such strategies, our Headquarter Business Units promote business activities around the globe. Furthermore, we are working to deepen the horizontal connections between each unit in order to leverage our comprehensive strengths. By doing so, we are promoting Groupwide businesses through collaborative initiatives between each Headquarter Business Unit. One strength provided by our regional expertise is our three Overseas Regional Business Units. We have divided the overseas markets on which we focus into three regions—the Americas, Europe, the Middle East and Africa (EMEA), and Asia Pacific—and have put into place a trilateral structure that provides independence to each region. Acting as a cornerstone for our regional strategies, each Overseas Regional Business Unit is entrusted with the business operations in their respective area of responsibility. While collaborating with our Headquarter Business Units, the Overseas Regional Business Units manage a diverse array of businesses together with affiliated companies that operate under their jurisdiction. Furthermore, the Overseas Regional Business Units function as expert organizations that have thorough knowledge of information pertaining to their respective area of responsibility, and this knowledge is leveraged to form close relationships with prominent local companies. In these ways, the Overseas Regional Business Units provide the foundation for our global strategies.

By combining the product strategies of the 16 Headquarter Business Units and the regional strategies of the three Overseas Regional Business Units, which are implemented under a trilateral structure, we are able to realize an organic global network.

Mitsui’s Corporate Governance

In terms of strengthening corporate governance, the Company worked to improve diversity among members of the Board of Directors. At the same time, an even greater number of discussions regarding Mitsui’s future direction and business strategies were held at Board of Directors’ meetings. In these ways, the Company has been moving forward with efforts to enhance the effectiveness of the Board of Directors.

**Basic View on Corporate Governance**

In structuring the corporate governance framework, the Company places emphasis on "improved transparency and accountability" and "the clarification of the division of roles between the oversight activities and the executive activities of management." For "improved transparency and accountability," the Company ensures sound supervision and monitoring of management with the viewpoints of External Directors and External Audit & Supervisory Board Members. The Company has also established an internal control system for disclosure so that all executives and employees fulfill their accountability to stakeholders under the principle of fair disclosure. For "the clarification of the division of roles between the oversight activities and the executive activities of management," the Company delegates execution of business to Managing Officers substantially while the Board of Directors retains a supervisory role over Managing Officer’s business activities. Chief Operating Officers of the 16 Headquarter Business Units and the 3 Overseas Regional Business Units serve concurrently as Managing Officers and engage in business operations for the consolidated Group in a responsive and flexible manner. While increasing the effectiveness of supervisory functions by having Audit & Supervisory Board Members, the Company implements corporate governance by maintaining an Audit & Supervisory Board system because it believes that having Internal Directors who are familiar with its business practices and operations is essential to the business of a general trading company. By adopting a Committee System in which External Directors and External Audit & Supervisory Board Members participate, the Company achieves highly effective corporate governance to secure "improved transparency and accountability" and "the clarification of the division of roles between the oversight activities and the executive activities of management."

**Board of Directors**

The Board of Directors is the highest authority for execution of business and supervision. and in order to secure this function, the Company has maintained a number of Directors that is suitable for having substantial discussions. The tenure of Directors is one year, and Directors can be reappointed without obstruction. The Chairman is authorized to call for a meeting of the Board of Directors and to chair the meeting. His role as the Chairman of the Board of Directors of the Company essentially involves carrying out supervision of management. He does not concurrently serve as an executive officer and he is not involved in the execution of day-to-day business operations. In addition, the Company has established the Governance Committee, the Nomination Committee, and the Remuneration Committee to serve as advisory bodies to the Board of Directors. These committees have majorities of external members, including their chairpersons. At Board of Directors’ meetings, matters that are deliberated or reported on abide by the Company’s internal regulations. In addition to matters concerning fundamental policies related to management, important business execution and matters authorized by resolutions of the General Meeting of Shareholders, the Company passes resolutions on matters determined by law and company statute. The Board of Directors also receives reports regarding matters determined by law and the status of important business operations. Regular meetings of the Board of Directors are held once every month in principle and extraordinary meetings are held from time to time if deemed necessary. In the fiscal year ended March 31, 2020, 15 meetings were held.

**Audit & Supervisory Board**

The Audit & Supervisory Board Members supervise the Directors’ execution of duties as an independent institution with the mandate of the shareholders. For this purpose, Audit & Supervisory Board Members carry out multifaceted, effective audit activities such as attending important internal meetings, verifying reports and investigating our business, and take necessary measures in a timely manner. A meeting of the Audit & Supervisory Board Members is regularly held prior to a meeting of the Board of Directors and whenever necessary. In the fiscal year ended March 31, 2020, 24 meetings were held.

The main items considered and discussed at the Audit & Supervisory Board are as follows: Audit policies, audit plans and work assignments; Assessment of the Independent Auditor; Audit activities conducted by full-time Audit & Supervisory Board Members; Major issues and due process relating to matters to be discussed at the Board of Directors’ meetings; Major issues and resolutions relating to the internal control system on a Global Basis; and Monitoring of progress on discussions between the Company and the Independent Auditor about various issues including “Key Audit Matters.” Each Audit & Supervisory Board Member has a duty to audit the following issues: (i) in the area of business auditing, execution of duties by Directors, decision-making processes at the Board of Directors and others, and the status of operation and improvement of the internal control systems; and (ii) in the area of financial auditing, the independence of the Independent Auditors, the system of financial reporting, accounting policies and holding of financial information, financial statements, reports from the Independent Auditors, and the system of corporate information disclosure.
Every fiscal year, the effectiveness of the Board of Directors is evaluated through a process that entails confirming efforts being undertaken in the fiscal year to address the challenges identified in the previous fiscal year’s assessment and Board of Directors. In conclusion, it was found that the Company’s governance structure is operating at a high level of effectiveness overall. Based on the interviews with all Directors and Audit & Supervisory Board Members, affirmative opinions were observed in the majority on the following points:

Evaluation of the Board of Directors

- Effectiveness of self-evaluation and third-party evaluation organization
- Improvement of evaluation from the previous term

Evaluation of the effectiveness by a third-party organization indicates that the effectiveness of the Board of Directors was appropriately ensured in the fiscal year ended March 2020.

As a result of summarizing the above, the Board of Directors judged that the effectiveness of the Board of Directors was appropriately ensured in the fiscal year ended March 2020.

Summary of Evaluation of the Effectiveness of the Board of Directors

For each question Grade 5 in 2020 period:

- Every fiscal year, the effectiveness of the Board of Directors is evaluated through a process that entails confirming efforts being undertaken in the fiscal year to address the challenges identified in the previous fiscal year’s assessment and Board of Directors. In conclusion, it was found that the Company’s governance structure is operating at a high level of effectiveness overall. Based on the interviews with all Directors and Audit & Supervisory Board Members, affirmative opinions were observed in the majority on the following points:

<table>

</tbody>
</table>

Self-evaluation

Implemented in December 2019

- 14 directors and 5 auditors for each question Grade 5: Comparison with the previous fiscal year’s comments

Third-party evaluation

Implemented from January to February 2020

- 14 directors and 5 auditors: Individual interviews

In addition to the self-evaluation method, third-party evaluation is conducted at the Board of Directors: effectiveness in the fiscal year ended March 2020.

Summary of Results of Third-Party Evaluation of the Effectiveness of the Board of Directors

The third-party evaluation entailed separate interviews of all Directors and Audit & Supervisory Board Members from January through early February 2020 about the effectiveness of the Company’s Governance and Board of Directors. In conclusion, it was found that the Company’s governance structure is operating at a high level of effectiveness overall. Based on the interviews with all Directors and Audit & Supervisory Board Members, affirmative opinions were observed in the majority on the following points:

- The majority of the external directors and audit & supervisory board members positively evaluated the results. Improvement and evaluation from the previous term.

Evaluation of the Effectiveness of the Fiscal Year Ended March 31, 2020

Based on the results of the self-assessment and third-party evaluation, and the following discussions at the External Members Meeting in February 2020 and the Governance Committee and Corporate Management Committee meetings in March 2020, the Board of Directors reviewed its effectiveness at a meeting in April 2020.

Further improvement of the effectiveness

- Improvement of information on individual business projects at the consideration of a broad range of topics to further understanding of overall strategy
- Additional implementation of new discussion at off-site meeting
- Improvement of effectiveness in the Board of Directors
- Clarification of roles of advisory committees

Performance-related bonus (Upper limit: ¥500 million in total per year)

- Bonuses are paid in accordance with the amount paid in bonuses.

Remuneration of Directors and Audit & Supervisory Board Members

Structure of Remuneration

- The amount paid in bonuses is calculated as follows:

Total amount paid in bonuses = (Consolidated profit for the period attributable to owners of the parent × 50% × 0.1%) + (Core operating cash flow × 0.1%)

However, the total amount shall not exceed ¥700 million. If the consolidated profit for the period attributable to owners of the parent is negative, i.e., a “net loss” and/or core operating cash flow is negative, i.e., a “Cash outflow,” then these items are set to 0 for the calculation. Consolidated profit for the period attributable to owners of the parent and core operating cash flow are key indicators for Mitsui, and they are taken into consideration when determining the dividend policy.
Amount paid as individual bonuses
The total amount calculated by the method shown above is distributed to each Director in the following proportions, which are assigned for each position. Amounts will be rounded to the nearest ¥10,000, however, if the total amount of the individual bonuses paid exceeds ¥100 million, and each amount less than ¥10,000 will be rounded down.

Amount individually paid = Total amount of bonus × Position points / Sum of position points

Points by position
Chairman/President: 200 points
Executive Vice President: 170 points
Executive Managing Officer: 107 points
Senior Executive Managing Officer: 90 points
Managing Officer: 70 points
Executive Officer: 20 points
External Director: 5 points
Audit & Supervisory Board Members: 3 points

Remuneration system of share performance-linked restricted stock
This purpose of the remuneration system of share performance-linked restricted stock (hereinafter referred to as the “System”) is to provide an additional incentive to Directors to achieve sustained growth in Mitsui’s medium to long-term performance and corporate value, and to foster a heightened sense of shared value with shareholders, by paying remuneration consisting of the stock Company’s ordinary shares in the fiscal year under a certain transfer restriction period, to Directors (shares allocated under the System will be referred to below as the “Shares”) in addition to basic fixed remuneration and a pension-related bonus. This new compensation system is a share performance-linked remuneration system, since the number of shares held by Directors at the end of a certain period (hereinafter referred to as the “Number of Shares after valuation”) would vary based on a comparison of the growth rates of the Company’s stock price and the Tokyo Stock Price Index (TOPIX), the number after valuation will be determined using the following formula, and the remainder of the Shares will be acquired by the Company without compensation at the end of the valuation period.

Number of Shares after valuation = Number of Shares × \((\text{Company's share price growth rate} ÷ \text{TOPIX growth rate} \times 150)\)

1. This is the growth rate of Mitsui’s share price during a valuation period defined as three months from the date of the Board of Directors’ resolution on December 19, 2018, which was approved as appropriate by the Remuneration Committee, to the effect that the amounts are appropriate, and on or other grounds as stipulated in the agreement concluded between the Company and the Director.

2. Procedures in the event of organizational restructuring
The Company would make reasonable adjustments to the number of Shares to be acquired without compensation or the time when the Restriction on Disposal will be lifted, by resolution of the Board of Directors, if the Company enters into a merger agreement resulting in the absorption of the Company, or a share swap agreement or share transfer plan under which the Company becomes a wholly owned subsidiary, or otherwise undertakes organizational restructing, etc., during the Restriction on Transfer Period, pursuant to a resolution of a General Meeting of Shareholders (or a resolution of the Board of Directors in the case of a matter for which a resolution of a General Meeting of Shareholders is not required).

The Company’s policy on the method used to calculate remuneration for Directors
The Company’s policy on the method used to calculate remuneration for Directors is decided by the Board of Directors within limits approved by resolutions at General Meetings of Shareholders. Before making decisions, the Board of Directors receives a report from the Remuneration Committee, which is chaired by an External Director, to the effect that the amounts are appropriate, based on prior deliberations by the Committee. The amounts for the fiscal year ended March 31, 2020 were determined through the following processes.

1. The basic remuneration for Directors, excluding External Directors, has been decided according to a specific formula based on the resolution of the Board of Directors on December 19, 2018, which was approved as appropriate by the Remuneration Committee. The individual amounts of basic remuneration paid to the Directors were decided at the meeting of the Board of Directors held on April 12, 2017, based on the report of the Remuneration Committee stating that these amounts were appropriate.

2. The amounts of performance-related bonus were decided according to a formula adopted at the meeting of the Board of Directors held on April 12, 2017. After deliberating on this formula, the Remuneration Committee recommended to the meeting of the Board of Directors held on April 12, 2017 that the formula was appropriate.

3. The remuneration system of share performance-linked restricted stock was decided by a resolution of the Board of Directors at a meeting held on July 3, 2019. The Remuneration Committee reported to that meeting of the Board of Directors that the number of stock options to be allocated was appropriate.

• Remuneration for External Directors
Remuneration of External Directors is limited to a fixed remuneration that does not include a performance-related portion, and there is no obligation of share purchasing for External Directors.

• Remuneration of Audit & Supervisory Board Members
Remuneration of Audit & Supervisory Board Members is determined through deliberation by the Audit & Supervisory Board Members, the total of which should not exceed the amount determined at the General Meeting of Shareholders. Audit & Supervisory Board Members receive only monthly fixed remuneration, which is not related to the performance of Mitsui.

Retirement compensation is not paid to Audit & Supervisory Board Members.

### External Directors / External Audit & Supervisory Board Members Selection Criteria

**Selection Criteria: External Directors**

**External Directors**

Prospective persons' extensive business experience and knowledge are required to deliberate and knowledge of his or her particular area of business should be used.

- The Company puts great value on ensuring the independence of External Directors from the Company in the pursuit of management oversight functions.
- With a view to overseeing business operations in a way that reflects the perspectives of our diverse stakeholders, the Company will take into consideration the fields from which candidates originate, along with their gender.

**Reasons for Appointing Each External Director**

<table>
<thead>
<tr>

</tr>
<tr>
<td>Ms. Egawa</td>
<td>Extensive business experience and knowledge are required to deliberate and knowledge of his or her particular area of business should be used.</td>
</tr>
</tbody>
</table>

### External Audit & Supervisory Board Members

The External Audit & Supervisory Board Members shall be selected with the objective of furthering the neutrality and independence of the auditing of the system, and, in particular, it is expected that the External Audit & Supervisory Board Members will give an objective voice to their auditing opinions from the standpoint of neutrality, building on such factors as independence. When selecting candidates for External Audit & Supervisory Board Members, the Audit & Supervisory Board shall confirm that no issues with independence arise by taking into consideration such factors as relations with the Company, management and important staff members.

---

**Note:** An External Director who is unlikely to have conflicts of interest with general shareholders, as stipulated by the stock exchange.
Mitsui’s Corporate Governance

- **Criteria for Independence of External Members (Directors/Audit & Supervisory Board Members)**
  - External Audit & Supervisory Board Members of Mitsui who do not fall under any of the following items are to be judged to have independence:
    1. Person who is currently or was in the past 10 years an execu-
       tive director, executive officer, managing officer, manager, 
       employee, administrative officer, etc. (hereinafter referred 
       to as “executing person”) of Mitsui or Mitsui’s consolidated 
       subsidiaries
    2. Person or the executing person of a corporation holding either 
       directly or indirectly 10% or more of the total number of 
       the voting rights
    3. Person whose major business partner is Mitsui’s consolidated 
       subsidiaries (1) or the executing person of the same
    4. Major business partners (direct or consolidated sub-
       sidiary (2)) or the executing person of the same
    5. Independent auditor of Mitsui or Mitsui’s consolidated subsid-
       iaries or employees, etc.
    6. Person providing professional services such as consultant, 
       lawyer or certified public accountant who received from Mitsui 
       monetary payment or other property benefits exceeding ¥10 
       million in total other than officer remuneration in the most 
       recent fiscal year (referring to the person belonging to the 
       organization if the one who received the relevant property 
       is an organization such as a corporation or association)
    7. Person or the executing person of a corporation who received 
       the annual total of ¥10 million or more of donations or aid 
       from Mitsui or Mitsui’s consolidated subsidiary in the most 
       recent fiscal year
    8. Person who has fallen under any of (2) to (7) above in the past 
       three years
    9. Spouse or relative within the second degree of kinship (herein-
       after referred to as ‘relative’) of the person who is cur-
       rently or has been recently the important executing person 
       of Mitsui or Mitsui’s consolidated subsidiary (including Director 
       who is not the executing person in the case of External 
       Audit & Supervisory Board Member)
    10. Close relatives of the person who currently falls or has recently 
        fallen under any of (2) to (7) above (excluding the one who is 
        not important)

- **Support Systems**
  - For External Directors, before regular and extraordinary meetings of the Board of Directors, materials on the proposals are provided and advance explanations are given. For External Audit & Supervisory Board Members, company information that contributes to their auditing, including the minutes of meetings between Full-
    time Audit & Supervisory Board Members and staff in the Audit 
    & Supervisory Board Member Division, is provided in a timely 
    manner by the Full-time Members and the staff.
  - Advance distribution of materials and advance explanations are con-
    ducted regarding regular and extraordinary meetings of the 
    Audit & Supervisory Board Member Division.

- **Agenda of External Members Meetings in FY2020**

- **Coordination between Supervision by the External Directors or Auditing by External Audit & Supervisory Board Members, Auditing by the Internal Auditing Division, Audit & Supervisory Board Members and the Independent Auditors, and Relationship with Divisions Involved in Internal Control**

- **Policy Related to Acquisition and Holding of Cross-SharesHoldings**

The Company defines listed shares held for reasons other than 
for investment returns as cross-shareholdings. These are 
acquired and held in accordance with the following policy.

1. The purpose of cross-shareholdings is to improve the corporate value of the 
investee and increase the equity method-based profit and divi-
dends to be received through participation in the manage-
ment of the investee. Cross-shareholdings in other companies as well as equity 
method-based investments (including deemed shareholdings) are categorized as ‘listed 
shares for general investment purposes’ and regarded as means of 
creating business opportunities and building, maintaining, or strengthening 
business and collaborative relationships.

2. Investment in equity-method applicable compa-

ies is implemented only in cases where the economic 
ratio is recognized. At the same time, each year the Board of 
Directors reviews the meaning and policy on holding such 
shares, including a verification of the rationale in relation to the 
Company’s cost of capital, within the framework of portfolio 
reviews that are carried out in relation to investment assets generally, 
including unlisted shares. If the meaning of holding 
these assets has significantly declined, 
the policy is to sell such assets, thereby reducing the 
cross-shareholdings.

- **Independent Auditors**

The Company appoints certified public accountants belonging to Deloitte Tochei Tatsuhito LLC as Independent Auditors to carry out 
auditing under the Companies Act of Japan and the Financial 
Instruments and Exchange Act of Japan as well as auditing of con-

- **Internal Audits**

Based on the order or approval of the President and Chief Executive 
Officer, the Internal Auditing Division evaluates the establishment 
and operational conditions of internal controls from various per-

- **Policy for Training on Directors and Audit & Supervisory Board Members**

Upon assumption, opportunities are given to Directors and Audit & Supervisory Board Members for gaining full understanding of the 
business, financial affairs, organization, etc., of Mitsui, the Companies Act of Japan and related laws and regulations, corporate 
governance and internal controls to ensure that they may fulfill 
their duties, including legal responsibilities, in the respective roles (fiduciary duties) expected of Directors or Audit & Supervisory 
Board Members, which are mandated by the shareholders.

Furthermore, opportunities are given for keeping them up to date as necessary.

- **Mitsui & CO., LTD. Integrated Report 2020**
Execution of Business Activities and Internal Controls

Execution of Business Activities

Ultimate responsibility for execution of business operations lies with the President and Chief Executive Officer. The President and Chief Executive Officer delegates authority to the Chief Operating Officers of the business units and regional business units, who, in turn, report to the President and Chief Executive Officer. The Corporate Management Committee is organized for deliberating the basic policies and important matters relating to the overall management. The Committee consists of the Chairman of the Board of Directors, President and Chief Executive Officer (the committee chair), the Directors in charge of Corporate Staff Units, and Representative Directors or Managing Officers nominated by the President and Chief Executive Officer. The Corporate Management Committee is the highest decision-making body. Matters determined by the Corporate Management Committee are determined by the President and Chief Executive Officer, taking into consideration the views of the Committee members.

Based on the basic design of internal controls provided for by the Board of Directors, management assumes the role and responsibility of maintaining, operating and assessing internal controls at Mitsui and Mitsui affiliated companies. The Internal Auditing Division, the division positioned directly under the President and Chief Executive Officer, examines the status of development and implementation of the internal control of Mitsui. The Company has established sub-committees pertaining to the execution of business and implementation of internal control as follows, and is taking measures to respond to a wide range of risks and forms of businesses, which continue to increase and diversify.

Framework for Internal Controls and Execution of Business Activities

- **Internal Auditing Division**
  - Exercise necessary decision-making in place of normal in-house decision mechanisms relating to all conceivable matters requiring an extraordinary response. The President and Chief Executive Officer serves as head of this headquarters
- **Corporate Management Committee**
  - Deliberate upon basic policies and important matters for the execution of Group-wide business operations
- **Compliance Committee**
  - Develop, maintain and improve the effectiveness of the compliance structure
- **Portfolio Management Committee**
  - Establish corporate portfolio strategy as well as investment and risk plans, monitor the corporate portfolio, and examine important individual proposals
- **Information Strategy Committee**
  - Plan Companywide information strategy and determine and monitor essential policies relating to the handling of personal information required in the course of business operations as well as Cyber Security Countermeasures
- **Sustainability Committee**
  - Plan, design and propose a management approach that focuses on sustainability with regards to Mitsui and society as a whole
- **Diversity Promotion Committee**
  - Make proposals regarding basic policy and the plan for diversity promotion, and formulate and implement targets set along with the plan

Internal Controls

In the construction of internal control processes, aiming to achieve the objective of the internal control process—Improvement of effectiveness and efficiency of business operations,” Compliance with laws, rules that are equivalent to the laws, and observance of management philosophy and company rules including all codes of conduct which reflect this philosophy—and “the conservation of company assets”—the following systems are implemented.

- **Risk Management System**
  - From Mitsui’s business activities are monitored and managed by Chief Operating Officers of business units and regional business units within the authority delegated to them from the Company’s management. Measures taken by each business unit to manage quantitative risks include setting position limits and loss-cut limits and conducting monitoring through divisions with relevant expertise. For the management of qualitative risks, the business units are obligated to observe relevant internal regulations. When a business unit or regional business unit takes on risks that are greater than the scope of authority granted to them, it is necessary to obtain approval of the Corporate Management Committee or a relevant representative director or senior managing officer, depending on the importance of the situation, in accordance with the standards of the internal approval system. Furthermore, organizations such as the Portfolio Management Committee, the Sustainability Committee, and the Crisis Management Headquarters establish and develop risk management structures on a Companywide basis and handle significant risks. Members of the corporate staff of each committee are responsible for surveillance of Mitsui’s position regarding the risks they are in charge of overseeing, as well as the control of risks within the prescribed range of their authority and the provision of support to relevant directors and managing officers.

- **Internal Controls over Financial Reporting**
  - The Company implements the internal controls framework as stipulated in the Financial Instruments and Exchange Act of Japan. In addition to Companywide discipline, the Company has been conducting self-assessment by units subject to evaluation and testing, and by an independent division concerning the effectiveness of accounting and financial closing controls, IT controls and business process level controls.

- **Internal Controls Related to Information Systems and Information Security**
  - The Information Strategy Committee establishes important policies related to Global Group information strategy. Further, the committee leads Mitsui’s efforts to build and operate information systems, develop internal rules required for information security, and strengthen the management of risks related to information, including the risk of information leakage. The committee ensures the establishment of systems to control risk associated with information assets appropriately. Specifically, it establishes rules for processes of procurement, introduction and operation of information assets; code of conduct for the system supervisory divisions regarding IT security requirements for external management systems; and the basics of information management; and internal rules relating to the handling of personal information required in the course of business operations as well as Cyber Security Countermeasures.

- **Compliance**
  - Mitsui has a strong belief that a sound reputation is the foundation of Mitsui’s business. At Mitsui, we define compliance as complying with corporate ethics and social norms in addition to laws, regulations, and internal rules of the Company. Mitsui requires its employees and officers to act in accordance with its corporate ethics based on its management philosophy and social norms in addition to laws and regulations as well as internal rules of the Company.

To those ends, we carry out corporate management with an emphasis on compliance, taking into account the Company’s corporate ethics. A Chief Compliance Officer (chairperson and an external lawyer as an observer), the Compliance Committee develops Mitsui’s compliance system and maintains a “Business Conduct Guidelines for Employees and Officers of Mitsui & Co., Ltd.” and it also has equivalent business guidelines in place for its subsidiaries.

The Company is striving to improve observance of these guidelines through continuous monitoring and reviews. In addition, the Company has a total of eight whistleblowing avenues in place, including those involving an external attorney at law and a third party providing hotline services. The Company made it clear that a whistleblower would not be subject to any retribution or detrimental treatment by the Company as a result of whistleblowing. Additionally, the Company makes sure that its domestic affiliated companies are also able to use the whistleblowing avenues (external attorneys at law and a third party providing hotline services). Mitsui’s overseas offices and overseas affiliated companies also have whistleblowing systems that were put in place considering applicable local laws and regional characteristics.

To maintain and improve its compliance structure, the Company consistently conducts activities to raise employee awareness toward compliance and provides as many opportunities as possible for employees to better themselves through training and other means. In doing so, the Company shares knowledge and important points of concern related to compliance. Any cases of violation of compliance are handled strictly, including disciplinary actions in accordance with the Employment Regulations of Mitsui & Co., Ltd.

- **Specially Designated Business Management System**
  - In response to the DPVA incident, the Company established the “Specially Designated Business Management System” in April 2005. Under this system, internal review of the four business domains “Environmental and Socially-related business,” “Medical, Healthcare and Bio-related businesses,” “Businesses with subsidy,” and “Businesses harboring other unusual reputation risks” is strengthened. When examining these matters, reports from the Sustainability Committee or the Environmental & Social Advisory Committee in which external experts participate, or opinions from other external experts, will be obtained as necessary in addition, the Company appoints consultants with insights into environmental and social risk and human rights issues, and operates similar internal controls. In addition, from its officers and employees, the Company appoints supervising officers to each affiliated company and has them conduct management based on the “Rules of the Division of Authority for Supervising Officers of Affiliated Companies.”

The Company has established the “Mitsui & Co., Ltd. Corporate Governance and Internal Control Principles.” In light of other laws and regulations, the Company requires its subsidiaries to develop and operate internal controls based on these principles and to the extent reasonable. For its equity-accounted investees, the Company coordinates with other equity participants and encourages the equity accounted investees to implement similar internal controls. In addition, from its officers and employees, the Company appoints supervising officers to each affiliated company and has them conduct management based on the “Rules of the Division of Authority for Supervising Officers of Affiliated Companies.”
Global Group Risk Management

Our broad range of businesses across the globe face various risks. In addition, the environment surrounding our management and businesses is undergoing rapid change, leading to higher levels of uncertainty. Amid these circumstances, we need to heighten our awareness of risks and carry out a swift response to address them. Issues resulting from changes in the external environment, which are difficult to address in our frontline operations, need to be resolved through collaboration between the front lines and management. To that end, we have in place the following risk management structure to ensure such collaboration.

1. In the Event of a Crisis

Pursuant to the Rules on the Crisis Management Headquarters, Mitsui established a Crisis Management Headquarters, headed by the President, as an organization to limit damage and loss by rapidly determining and implementing concrete measures to respond to crisis appropriately. Based on Rules on Business Continuity Management, in the event that business continuity is disrupted by earthquakes, flooding, terrorism, pandemics, power shortages, etc., and assuming that a crisis situation will be drawn out, Emergency Management Headquarters shall be established, headed by the Managing Director in charge of the Human Resources & General Affairs Division, for the purpose of quickly restoring and resuming distributed business operations in the wake of a disaster.

CASE: Our Response to COVID-19

Mitsui set up the Emergency Management Headquarters in January 2020, centralizing the management of information, including for affiliated companies, while rapidly deciding and implementing measures to bring employees home from overseas locations, and to change work systems, including at overseas trading affiliates.

2. Companywide Risks

Centered on the Corporate Management Committee and the Portfolio Management Committee, an advisory body to the Corporate Management Committee, Mitsui has put into place a comprehensive risk management structure to integrate Groupwide risk management, while facilitating the design, establishment and development of risk management structures on a Global Groupwide level, and handle significant risks. In addition, each division of the corporate units is responsible for surveillance of all of Mitsui’s positions, control within the range of their authority, and support of the relevant Directors and Managing Officers.

3. Frontline Operational Activities

Each Head Office Chief Operating Officer and Regional Chief Operating Officer manages business within the scope of the authority granted to them based on the various rules on delegation of authority, including the Rules on Delegation of Authority for Head Office Chief Operating Officers, and manages risk of loss relating to their businesses within the scope of their authority. Transactions that exceed the authority delegated to each Head Office Chief Operating Officer and Regional Chief Operating Officer require approval via Mitsui’s internal approval system. In other words, approval needs to be obtained from the Corporate Management Committee or a relevant representative director or senior managing officer, depending on the importance of the situation (please refer to page 113). Measures taken by each business unit to manage quantitative risks include setting position limits and loss cut limits as necessary. For the management of qualitative risks, the business units are required to observe related internal regulations.

In addition to these specific material risks, Mitsui has identified the following major risks that could adversely impact its financial health, operating performance, and cash flows.

1. Risk of changes in global macroeconomic factors
2. Risk associated with laws and regulations
3. Risk due to competition
4. Risk associated with constraints of human resources
5. Interest rate risk
6. Risks regarding pension costs and defined benefit obligations

Business Risks

Through its integrated risk management structure, Mitsui looks across organizational boundaries for Groupwide risks, and identifies material risks within the context of risk frequency, the scale of projected damage and Groupwide risk tolerance. We also promote a wide range of initiatives to hedge and control risks. As of March 31, 2020, Mitsui has identified the following material risks.

An Organization with Integrity

Takashi Masuda, the first president of the former Mitsui,* once said, “Let not short-term gains tempt your mind, seek only enduring prosperity by embracing grand aspirations.” Since then, the Mitsui Group has inherited the spirit of working with high aspirations to realize valuable business that is truly required by society.

We believe that business is built on a foundation of trust, and compliance is necessary to maintain and foster such trust. In our pursuit of compliance, it is not enough simply to follow laws, regulations, and norms. It is also extremely important that we continually verify the appropriateness of our words and actions against our sense of integrity. With these ideas forming the foundation of our business, Mitsui’s Corporate Management Philosophy (Mission, Vision, Values) also embodies these concepts of integrity that each and every employee on a Global Group basis cherishes while acting with an awareness of compliance.

* From a legal perspective, there is no continuity between the former Mitsui & Co. and the present Mitsui & Co., and they are totally separate corporate entities.

**Mitsui & Co. Group Conduct Guidelines—”With Integrity”**

It is essential that Mitsui & Co. and each of the Mitsui Group’s companies act with the highest levels of integrity and compliance, sharing our approach toward integrity and compliance on a Group basis to continue achieving sustainable growth as a Group and earning the trust of society. With this in mind, in November 2018 we put together the Mitsui & Co. Group Conduct Guidelines—“With Integrity.” These guidelines are reflected in each company’s corporate philosophy (MVP) and business conduct guidelines. As every officer and employee across the entire Group puts these conduct guidelines into practice in their daily work activities, the Mitsui Group faithfully and sincerely respects the trust placed in us by society.

**Initiatives to Build an Organization with Integrity**

To continue to be a corporate group that is truly trusted by society, we are working to rigorously reinforce compliance awareness with each employee. We are also asking employees to maintain a proper awareness and level of dignity as a member of a corporation, or in other words, to act with integrity. In these ways, we are working to build an organization with integrity on a Global Group level.

**Compliance Framework**

Mitsui promotes compliance-related initiatives on a Global Group basis under the direction and supervision of the Chief Compliance Officer (CCO) and in collaboration with the Compliance Supervising Officers appointed in each of Mitsui’s business units, and branches and offices in Japan and overseas. Initiatives of these Groupwide efforts include heightening awareness of integrity and compliance, improving and strengthening compliance programs, and responding to specific compliance issues as they arise. Furthermore, Compliance Administrators have been established in each business unit to provide assistance to the Compliance Supervising Officers. Based on the frontline conditions in each business, the Compliance Supervising Officers and Compliance Administrators promote a thorough response to compliance, including the implementation of initiatives to prevent the occurrence or recurrence of compliance-related issues as well as the promotion of integrity.

Also, to serve as an organization that operates under the Corporate Management Committee, Mitsui established the Compliance Committee, which works to develop our compliance framework and maintain and improve its effectiveness. With the participation of external attorneys, the Compliance Committee meets twice a year to discuss the state of the action plans based on trends in compliance-related matters, arising issues, and the overall compliance framework. The minutes of the committee meetings are shared among all of our officers and employees.

Across the entire Group, we aim to bolster the management capabilities, including enhancing integrity, and strengthen compliance at affiliated companies through their own efforts by having each company thoroughly discuss and put into practice our “Guidelines on the Establishment of Compliance System at Affiliated Companies,” a set of key rules and principles that are the bare essentials for operating compliance systems at affiliated companies. Furthermore, we periodically hold the Mitsui & Co. Group CCO Meeting, attended by CCOs from domestic affiliated companies, and regional CCO meetings at overseas bases to share knowledge and exchange information and opinions on a Global Group basis, in addition to implementing compliance measures at overseas bases that are designed for each region.

**Compliance Programs**

We believe that even if detailed, fine-tuned integrity and compliance programs are formulated, their effectiveness cannot be reinforced without senior executives taking the lead in related initiatives. By leveraging the Mitsui & Co. Group Conduct Guidelines—“With Integrity,” the CCO blog, and other efforts, we are continuously striving to instill an awareness of compliance while providing as many opportunities as possible to learn about compliance, including training programs. In these ways, we share lessons and important points of concern on compliance. We have designated November of each year as “With Integrity Month,” and have provided opportunities for every officer and employee to think more deeply about integrity by having the president give talks about integrity and having senior executives take the lead on reminding everyone that compliance and integrity are the foundation of our businesses. Any cases of compliance violations are handled strictly, including disciplinary actions, and measures to prevent a recurrence are formulated and implemented in accordance with our Working Regulations.

**Fostering a “Speak Up” Culture**

We believe that the essence of compliance lies in the development of an open working environment that reflects our management philosophy and values, so that problems can be prevented through smooth communication. At the same time, we strive to form open and innovative workplaces, and make concerted efforts to improve productivity and management capabilities while making workplaces better and encouraging employees to grow. Should problems occur, a report must be immediately made to superiors or to those in charge, so that appropriate action can be taken in a timely manner. We value the importance of discovering problems at an early stage, and we are actively fostering a culture in which people speak up when they become aware of issues. Senior executives continually disseminate the message that we can improve the Company by speaking up about issues.

The Company has established eight channels for reporting compliance-related matters within or outside of the administrative chain of command, including anonymous access to attorneys and independent organizations outside of Mitsui. The rules for the whistleblowing system prohibit any form of retaliation against or disadvantageous treatment of whistleblowers. We also clearly state that any infractions of this prohibition or any form of retaliation against or disadvantageous treatment of whistleblowers or investigators will be dealt with severely, thereby encouraging employees to speak up. Furthermore, Mitsui has introduced the Global Group Hotline, a special whistleblowing hotline for reporting and seeking advice regarding cases that breach the laws of Japan or another country in relation to anti-trust (monopoly) laws or anti-corruption laws, or cases that give rise to suspicion of such breaches. Under the system, the Compliance Department of the Legal Division of Head Office becomes a unified channel by which to receive whistleblowing reports from overseas trading affiliates, and other subsidiaries in Japan and overseas. Also, officers and employees of Group companies are able to seek advice directly through Mitsui’s whistleblowing system when the issues are related to officers and employees of Mitsui or when the issues could have a serious impact on the Mitsui Group.
Human Rights and Supply Chain Management

Respect for Human Rights

Mitsui & Co. regards respect for human rights, in accordance with international standards, as the foundation of its sustainability management. We have emphasized respect for human rights in both the Mitsui & Co. Group Conduct Guidelines and the Business Conduct Guidelines for Employees and Officers of Mitsui & Co., Ltd., and we have implemented various initiatives. Human rights initiatives in the corporate sector have become increasingly important in recent years. We recognize the need for human rights initiatives not only within Mitsui, but also across the entire supply chain. In August 2020, we formulated a Human Rights Policy to clarify our approach to human rights. This policy was approved by the Corporate Management Committee, and was reported to the Board of Directors’ meeting.

Human Rights Due Diligence

In accordance with the United Nations Guiding Principles on Business and Human Rights, in the fiscal year ended March 2020, Mitsui appointed external experts and began conducting due diligence with regard to human rights in the supply chains of products handled by Mitsui and its overseas trading affiliates, as well as the main business operations of its consolidated subsidiaries.

1. Identification of human rights risks
   Establishment of screening standards with reference to indicators and tools, etc.
2. Establishment of human rights risk items
   Establishment of risk items relating to human rights and labor with reference to international norms, etc.
3. Establishment of additional priority risk management items
   Establishment of supply chain risk management items as additional indicators with reference to international norms
4. Determination of risk severity
   Recognition of the four categories of core labor standards defined by the ILO as priority risk items
5. Implementation of human rights risk assessments
   Preparation of risk mapping, formulation of risk mitigation measures, and general understanding of risks

For details on the Human Rights Policy, please see Sustainability Report 2020.

Promotion of Supply Chain Management

Having diverse businesses around the world, Mitsui & Co. provides a wide range of services, from upstream to downstream, with as many as 20,000 suppliers. Together with our suppliers, we endeavor to correctly assess and solve ethical and social issues in supply chains in order to meet society’s demands, such as complying with laws, respecting human rights, complying with occupational health and safety laws, and reducing environmental load.

Sustainable Supply Chain Policy

Mitsui formulated its Supply Chain CSR Policy in December 2007, and has since made efforts to ensure that all of Mitsui’s suppliers fully understand its standards and cooperate in the implementation of the policy. We reviewed the policy based on society’s changing expectations, and renamed it as the Sustainable Supply Chain Policy in August 2020.

Initiatives with Suppliers

1. Companywide uniform supplier communication forms
   We send letters to all new suppliers (about 50,000 suppliers in total) requesting their understanding and cooperation in regard to our policies.

2. Questionnaires and on-site surveys
   We consider interactive communication with our suppliers to be very important, and we work jointly on ideas for improvements with our partners, wherever needed. For this reason, we regularly conduct surveys targeting the suppliers of Mitsui and its subsidiaries to confirm the status of their adherence to our policies, and whether they have their own policies related to such areas as human rights and labor practices, occupational health and safety, business ethics, and environmental management. Starting from the fiscal year ended March 2020, Mitsui has surveyed suppliers that handle products in high-risk business domains, in accordance with human rights due diligence. In addition to these surveys, Mitsui audits suppliers using a checklist of items for compliance with its policies. When necessary, the Company provides advice and guidance to suppliers based on meetings with persons in charge at suppliers and inspections of manufacturing facilities.

For details on the Promotion of Supply Chain Management, please see Sustainability Report 2020.

Stakeholder Engagement

Engagement for Business Creation

Through interactive communication with its stakeholders, each of Mitsui’s employees and officers is endeavoring to acquire a firm understanding of what society expects from Mitsui. We will contribute to the realization of a sustainable society through our business activities while responding to changes in market environments.

Mitsui & Co. signed and pledged its support for the UN Global Compact in October 2004, and has been participating as a corporate director of the Global Compact Network Japan (GCNJ), complying with the Global Compact as part of its own corporate guidelines. At present, as a member company of the GCNJ, Mitsui complies with and practices the principles of the Global Compact, and pursues SDGs on a Global Group basis.

Ten Principles of the UN Global Compact

**Human Rights**
1. Businesses should support and respect the protection of internationally proclaimed human rights; and
2. make sure that they are not complicit in human rights abuses.

**Labor**
3. Businesses should uphold the freedom of association and the effective recognition of the right to collective bargaining;
4. the elimination of all forms of forced and compulsory labor;
5. the effective abolition of child labor; and
6. the elimination of discrimination in respect of employment and occupation.

**Environment**
7. Businesses should support a precautionary approach to environmental challenges;
8. undertake initiatives to promote greater environmental responsibility; and
9. encourage the development and diffusion of environmentally friendly technologies.

**Anti-Corruption**
10. Businesses should work against corruption in all its forms, including extortion and bribery.

**Sustainable Development Goals (SDGs)**

- **Core Operating Cash Flow:** 608.9 640.0 572.8 404.2 551.6 410.7

#### Notes:

1. Figures for prior years have not been reclassified in accordance with Accounting Standard Codification ("ASC") 205-20, "Presentation of Financial Statements—Discontinued Operations."
2. Per share information is calculated based on the number of shares issued at fiscal year-end.
3. The stock price (Closing stock price on the Tokyo Stock Exchange) (yen) is calculated based on the fiscal year-end closing stock price on the Tokyo Stock Exchange divided by shareholders’ equity per share.
4. Net cash provided by operating activities is comprised of "gross profit," "selling, general and administrative expenses," and "provision for doubtful receivables."
5. Net income attributable to Mitsui & Co., Ltd. per share for the fiscal years ended March 31, 2012 and 2013 is not disclosed because there are no dilutive potential shares.

- **Net Cash Provided by Operating Activities**: 632.4, 859.2, 873.8, 790.4, 859.9

#### Notes:

1. The U.S. dollar amounts for cash dividends represent translations of the Japanese yen amounts at the rate in effect on the payment date.
2. Per share information is calculated based on the number of shares issued at fiscal year-end.
3. The net interest-bearing debt is calculated by subtracting lease liabilities from long-term debt. However, past figures have not been retroactively restated to reflect this change.
4. The U.S. dollar amounts for net interest-bearing debt (long-term debt) are calculated as the sum of the principal amount of the debt and the estimated interest for the next 12 months.

Mission
Build brighter futures, everywhere
Realize a better tomorrow for earth and for people around the world.

Vision
360° business innovators
As challengers and innovators, we create and grow business while addressing material issues for sustainable development.

Values
Our core values as challengers and innovators

Seize the initiative
We play a central role in driving transformation.

Thrive on diversity
We foster an open-minded culture and multiply our strengths to achieve excellence.

Embrace growth
We drive our collective growth by continuously growing as individuals.

Act with integrity
We pursue worthy objectives with fairness and humility, taking pride in work that stands the test of time.

Mitsui & Co. Group Conduct Guidelines

With Integrity

Five Key Principles

01 We will comply with laws and regulations, and act to the highest ethical standards. We will respect human rights and never engage in discrimination of any kind.

02 We will respect the individuality and diversity of every employee, and foster a culture of open-mindedness.

03 We will engage in fair business practices, and respond to the trust placed in us by society with good faith and sincerity.

04 We will place value on the global environment, and contribute to the realization of prosperity and a high quality of life for society.

05 We will speak up with courage when we have doubts or feel that something is wrong, for the good of the company.
