

Handling of Personal Information Related to Quantum Technology Business

Mitsui & Co., Ltd. (the "Company", or "Mitsui") complies with Japan's "Act on the Protection of Personal Information" and other regulations regarding the protection of personal information, manages personal information appropriately, and handles personal information as following in the course of conducting our quantum technology business.

1. Purpose of Use

Mitsui will use personal information for the following purposes.

(1) Personal information about the customer

- Identity confirmation and personal certification of customers
- Shipment of products, invoices, and prizes to winners for campaigns in which customers participated
- Customer inquiries, inquiries, complaints, repairs, support, confirmation, and records
- Improvement and development of products and other services
- Improvement of customer experience in our digital services (e.g., websites and mobile apps)
- Advertisements and information on products, services, campaigns, etc. through letters of information, e-mails, etc. (*1 and *2)
- Distribution of action-targeting ads using advertising distributors such as Google and Yahoo (*1/*2)
- Analysis of attribute information and activity history obtained by us to understand customers' tastes and preferences (*2)
- To provide our customers with our products and services safely. Includes the discovery of users who are in violation of the terms of use, notice to the users, and investigation, detection, prevention, and response to fraud and unauthorized access that abuse the services.

*1 : Information such as the browsing history and purchase history of websites obtained from customers may be analyzed, and services may be provided or advertisements may be distributed.

*2 : Information such as customer preferences and browsing histories obtained from third parties other than us may be used in conjunction with personal information of customers already in our possession. In this case, we will obtain prior consent from the customer and use it within the scope of the purpose of use listed

above.

*3 : The technique of recording and managing customers' information using our website on computers and application software is called "Cookie." Our website uses some cookies to make them more convenient for our customers. This cookie does not provide anything that can be used to identify individuals.

*4 : Our site uses Google's Google Analytics service to keep track of visits to our customers' sites.

When Google Analytics is used on our site, Google collects, records, and analyzes your visits to our site based on our cookies.

We receive the result of analysis from Google and understand the visitation status of our customers' sites.

Customer information collected, recorded, and analyzed by Google Analytics does not include any information that identifies a particular individual. These data are managed by Google in accordance with the company's privacy policy.

You can also stop being collected your data using our Google Analytics by disabling Google Analytics in the add-on sets of your browser. You can disable Google Analytics by downloading and installing Google Analytics Opt Out Add-On on the Download page of the Opt Out Add-On from Google and changing the add-on sets of your browser. If you disable Google Analytics, Google Analytics is also disabled on websites other than this website you visit, but you can re-enable Google Analytics by reconfiguring the add-ons on the browsers. Please refer to Google Analytics website for explanations of the terms of use of Google Analytics and to the company website for explanations of Google's privacy policy.

2-1, Otemachi 1-chome, Chiyoda-ku, Tokyo 100-8631, Japan

Mitsui & Co., Ltd. Representative Office for Personal Information Protection

3.Providing Personal Information to a Third Party

The Company may provide personal information to the following third parties for the purpose described in 1.(1) above.

- The country or region where the third party is located
The United States, the United Kingdom
- Data privacy regulatory framework of the country or region concerned
Please refer to the information at the following link.
 - The United States
https://www.ppc.go.jp/enforcement/infoprovision/laws/offshore_report_america/
 - United Kingdom
<https://ico.org.uk/for-organisations/uk-gdpr-guidance-and-resources/>
- Personal information protection measures implemented by third parties
- All recipients of personal information handled by the Company have implemented measures in accordance with the eight principles of the OECD guidelines governing the protection of privacy and transborder flows of personal data.

4.Matters concerning safety management measures

We will take necessary and appropriate safety management measures to control personal

data (this includes personal information that we have acquired or is attempting to acquire, and that is planned to be treated as personal data), such as preventing leakage, loss, or damage. We will also conduct necessary and appropriate supervision of employees and contractors (including subcontractors) handling personal data. The Rules on Personal Information Protection separately stipulate specific measures for the management of personal data. The main items are as follows.

(Establishment of Personal Information Protection Guidelines)

- In order to ensure the proper handling of personal data, we have established a Personal Information Protection Guidelines with respect to "compliance with relevant laws and guidelines" and "contact points for questioning and complaint processing."

(Development of Disciplines on the Handling of Personal Data)

- The Rules on Personal Information Protection have been established for each stage, including acquisition, use, storage, provision, deletion, and disposal, with respect to the handling methods, responsible persons in charge, handling persons in charge, and their duties.

(Organizational Safety Management Measures)

- We have appointed a responsible person in charge of the handling of personal data, clarified the scope of personal data handled by employees handling personal data, and established a system to report to the person in charge of any violation of the Personal Information Protection Law or the Rules on Personal Information Protection.
- Each organization conducts periodic self-inspections of the status of the handling of personal data, and the Internal Audit Department conducts audits.

(Human Security Management Measures)

- We regularly alert employees and provide them with training on matters to be noted regarding the handling of personal data.
- Matters concerning the confidentiality of personal data are described in the Employment Regulations and written pledges are submitted by employees.

(Physical Safety Management Measures)

- In areas where personal data is handled, we control the entry and exit of employees and restrict devices, etc. brought in, and take measures to prevent unauthorized persons from viewing personal data.
- In addition to taking measures to prevent theft or loss of equipment, electronic media, and documents that handle personal data, measures are taken to prevent

personal data from being easily identified when transporting such equipment, electronic media, etc., including transportation within business sites.

(Technical Safety Management Measures)

- Access control is implemented to limit the scope of person in charge and personal information databases handled.
- We have introduced a mechanism to protect information systems that handle personal data from unauthorized access from outside sources or from unauthorized software.

(Understanding of External Environments)

- When handling personal data at a server located in a foreign country, we constantly obtain the latest information on the personal information protection system in the foreign country concerned and take security control measures in accordance with the condition of the system.
