Measures taken to promote remote work from home

- Shift work by group in each department, staggered commuting and work from home arrangements are encouraged to reduce infection risks between commuting and working in the office.
- The project “Work-X” (Workplace Experience) which started in 2018 has encouraged employees to choose the location of their office, depending on work progress and roles, which could diversify workplace. Land-line phones have been replaced with iPhone, paperless operation is in place and digital tools such as Teams / DocuSign are fully utilized to promote remote work.
