

Timber Procurement Policy

Mitsui & Co. recognizes that our handling of palm oil comes with various inherent risks, including environmental risks such as deforestation caused by illegal logging and the loss of biodiversity that accompanies this, and social risks such as violations of workers' rights and the human rights of local communities.

Therefore, we have formulated a sustainable timber procurement policy with the aim of realizing timber procurement that results in zero deforestation and exploitation of workers, indigenous peoples and local peoples.

Scope of Coverage

Mitsui & Co. and consolidated subsidiaries ("Mitsui & Co. group")

Applicable Products

Timber handled by Mitsui & Co. group (including chips and other raw materials for paper products) ("Timber")

Conduct Guidelines

Mitsui & Co. group recognizes the importance of natural capital. That is why we work to obtain environment-related certifications, as well as practice the sustainable procurement and supply of resources, materials, foods, and products that are essential for developing a society that takes into account the need to address global warming and biodiversity conservation.

In addition to implementing the following principles ourselves, we also require business partners, including suppliers, to understand and implement these principles with the aim of creating sustainable supply chains in cooperation with our partners.

- To carry out fair transactions that take into account international rules and customs and that comply with laws and regulations of the countries and regions in which business activities take place, including export destinations, and to thoroughly prevent corruption.
- To confirm that there will be no procurement from suppliers connected to serious environmental or human rights problems when beginning a new transaction.
- To confirm that Timber has been legally certified.
- To strive to ensure traceability in Timber production areas.
- To strive to expand handling of products that have received internationally trusted forest certification.

- To strive to avoid being complicit in development that affects high conservation value (HCV), high carbon stock (HCS), or peat swamp forests (There are exceptions, such as selectively cut natural forests).
- To confirm that business partners have taken environmental impact into account, including the conservation of ecosystems and water resources in production areas, and chemical substance management.
- To confirm that business partners are ensuring that freedom from forced labor and child labor, and employee freedom from discrimination, harassment, and inhumane treatment, respect for freedom of association and the right to collective bargaining are being maintained and that work hours and wages and occupational health and safety are appropriate.
- To confirm that business partners are showing sufficient consideration to relationships with local communities and the customary rights of local peoples.
- To strive to respect the human rights and cultures of indigenous peoples by complying with all applicable laws and regulations of the countries and regions in which we conduct our business activities as well as by respecting relevant international standards such as the United Nations Declaration on the Rights of Indigenous Peoples, the Convention concerning Indigenous and Tribal Peoples in Independent Countries (ILO Convention: C169), and the principle of “free, prior and informed consent (FPIC).
- To encourage suppliers to maintain dialogue with various stakeholders, including local peoples, NGOs, experts, and third-party institutions.

Information Disclosure

To set targets based on the above principles and properly disclose information in a timely manner.
