Today’s increasing trend towards globalization, advances in IT and other developments in society have brought considerable diversity and change to the world we live in, and as we pursue greater convenience and enrichment in our lives, we also face a broad range of issues, including global warming and other environmental problems, poverty, and educational inequality.

Mitsui not only works to create value for society through its main business but also aims to be active beyond its main areas of work, to address issues faced by regional and global society.

Mitsui’s Operational Guidelines for Social Contributions Policy specify three areas of focus: international exchange, education, and environment.

Within these three areas, Mitsui utilizes its strengths and knowhow by focusing its social contribution activities on multicultural symbiosis, human resource development with an international perspective, and the global environment. By continuing our initiatives in these fields, working together and sharing them with society, we believe our activities will have follow-on effects that will lead on to solutions to larger-scale social issues.

In addition, we are planning and promoting volunteer programs with the hope building interest and sensitivity towards social issues amongst our own staff and management personnel.

**Social Contributions Policy**

**Guiding Principles**

We will build a congenial relationship with our stakeholders by striving to create a harmony with the global community and local communities in accordance with the Mitsui & Co. Management Philosophy (Mission, Vision and Values), and we will actively contribute to the creation of a future where the dreams of the inhabitants of our irreplaceable Earth can be fulfilled.

**Action Guidelines**

1. In order to respond in an appropriate manner to the needs of the global environment, and international and regional society, Mitsui will actively promote social contributions that go beyond its normal business activities in addition to contributing to society through the implementation of Yoi-Shigoto in its normal sphere of business.
2. Mitsui will establish the three important areas of ‘International exchange’, ‘Education’ and ‘Environment’ for its social contributions, and will implement social contribution activities befitting of Mitsui & Co.
3. In addition to the making of economic contributions, such as donations etc., Mitsui also aims to carry out proactive social contributions that involve the participation of its executives and employees.
4. Mitsui promotes social contributions with an emphasis on transparency and accountability in respect of its stakeholders. It also aims for the continued improvement of activities through communication and cooperation with its stakeholders.
There are many Brazilians living in Japan, next to the Chinese, South and North Korean and Philippine people. Although the figure decreased after the economic crisis caused by the collapse of Lehman Brothers in the autumn of 2008, and the Great East Japan Earthquake of March 2011 has effected more decrement, there are still approximately 194,000 Brazilian people living in Japan as of the end of December, 2012. There is a high concentration of Brazilian residents living with their families in areas with a large number of factories serving the automotive and consumer-electronics industries. Their children attend Japanese public schools or Brazilian schools, but there are also some children who do not go to school at all.

From 1908, as many as 270,000 Japanese emigrated to Brazil, where their offspring now number 1.5 million. Many Brazilians of Japanese heritage are active in politics and business, making Brazil a country with very friendly relations with Japan. Mitsui has long-standing and close business ties with Brazil which go back to the 1930s. Although Brazil is geographically on the opposite side of the earth to Japan, it is one of emotionally closest countries for us, Mitsui, thanks to the strong connection.

Following a revision of Japanese immigration law in 1990, many Brazilians of Japanese heritage came to Japan with their families. However, the children of these Brazilians face a number of problems: children who go to Japanese public schools lack Japanese language skills, those who go to Brazilian schools suffer from poor facilities and inadequate teaching materials, and there are many children who do not attend school at all. After investigating what Mitsui could do to improve this poor educational environment, in 2005 Mitsui began activities to support Brazilian residents in Japan, focusing on children, and these activities are still continuing today. The aim is to deepen mutual understanding between Japan and Brazil and promote genuine multicultural coexistence.

From 2005 till 2008, Mitsui donated education-related materials to 30 Brazilian schools. Watching the children enjoying lessons as they use the new experimental equipment and personal computers makes us vividly realize the significance of these donations. However, after September 2008, many Brazilians in Japan lost their jobs because of the recession. As a consequence, many families returned to Brazil, and the number of families that can afford to send their children to the relatively expensive Brazilian schools in Japan drastically decreased. This resulted in a decline in the number of pupils and the closure of many schools. In view of this situation, from 2009, Mitsui shifted the focus of its activities “from providing things to providing support for people” by awarding scholarships to Brazilian pupils through the schools to cover monthly tuition fees. As of the end of February 2013, 353 children were attending school thanks to this scholarship program. The children who receive the scholarships have sent grateful letters saying for instance ‘Thanks to Mitsui’s scholarship we can go to school and talk with our friends’ and ‘our lessons are fun.’ In these and other activities, Mitsui has benefited from the cooperation and advice of the NPO Action for a Better International Community, an affiliate of the Japan Foreign Trade Council, Inc.
Nearly all Brazilian schools in Japan started out as crèches, and then gradually grew into schools. As a result, there are many classrooms where the teacher does not have an elementary or junior school teaching license. The Brazilian Ministry of Education found it necessary to raise the level of the teaching staff to ensure an adequate education for the children. In response, the Federal University of Mato Grosso in Brazil and Japan’s Tokai University jointly formulated the Distance Learning Course for Brazilian Educators working at Brazilian schools in Japan based on e-learning, which began operating in July 2009. There are currently 219 participants, who will obtain their teaching qualifications after receiving a 4-year education (in 2013) based on regulations of the Federal Republic of Brazil.

The state of Mato Grosso, where the Federal University of Mato Grosso is located, is approximately 2.4 times greater in area than Japan and is covered in forest, as a result of which education by distance learning course is common. In the implementation of the program, the Federal University of Mato Grosso is drawing on this experience in distance learning, while Tokai University is taking advantage of its network of affiliated schools throughout Japan.

Mitsui participates in this program by meeting the cost of the Japanese language- and Japanese society-related course, designed to encourage knowledge of the host country. This activity is supported from the Brazilian side by the Brazilian government (Ministry of Education), the Federal University of Mato Grosso, and the Bank of Brazil, and from the Japanese side by the Ministry of Education, Sports, Science and Technology (MEXT), Tokai University, and Mitsui. It is thus an example of a project implemented with the joint participation of industry, government, and academia in both Japan and Brazil.

The Kaeru Project, implemented in the Brazilian city of São Paulo, helps children returning home from Japan to make a smooth transition to life in Brazil. Children returning from Japan face a range of serious difficulties including differences in lifestyle and language. Starting in 2009, to alert parents still in Japan and the people involved to these educational difficulties, Mitsui invites the therapists of Kaeru Project from Brazil to Japan as speakers for seminars in cities with a high concentration of Brazilian residents such as Toyota (Aichi Prefecture) and Hamamatsu (Shizuoka Prefecture). In 2012, these seminars were held nineteen times and were attended by a total of around 1,000 people.

Since 2005, Mitsui has continuously made donations to the NPO SABJA, which supports Brazilian residents in Japan with services including a telephone help line for advice on medical treatment, employment, education, and other issues, and assistance to Brazilians facing poverty. In cooperation with SABJA, Mitsui also runs a charity bazaar at the Brazilian Day festival held in Yoyogi Park every Summer, with Mitsui employees taking an active part as volunteers.

From 2012, Mitsui started providing its assistance to the Association of Brazilian Schools in Japan (Associação das Escolas Brasileiras no Japão: “AEBJ”), an NPO that provides Brazilian schools in Japan with guidance and advice for sound school management and skills-building of school staff.

Additionally, we provide support to NPOs and voluntary organizations that work mainly with Brazilian children in Kita-Kanto, Tokai, and other regions with a large Brazilian community.
Other Forms of Support

(1) If Brazilian children attending Japanese public schools develop only limited ability in both the Portuguese and Japanese languages, they may end up underachieving academically or dropping out of school. With the idea of remedying this problem, Mitsui worked with Tokyo University of Foreign Studies to develop supplementary teaching materials for children to assist them with Japanese language learning and studying other school subjects. From April 2007, these materials have been available to the public free of charge on the Tokyo University of Foreign Studies website (Japanese).

(2) Wishing to place our activities at the service of government agencies and other relevant bodies, Mitsui collaborates actively with government agencies and presents them with proposals for support. One channel for this is through contacts with members of a committee at the Ministry of Education, Sports, Science and Technology which deliberates on educational issues relating to the children of foreign residents.

(3) As an urgent response to the economic crisis which started in September 2008, used freight containers have been donated to store emergency supplies, and Brazilian residents of Japan have been given temporary employment in forests owned by our subsidiary Mitsui Bussan Forest Co., Ltd.

Mitsui–Endowed Lecture Program at the University of São Paulo

Activities in Brazil (Mitsui Bussan do Brasil Foundation)

In addition to our activities in Japan, we are also active in Brazil itself through the Mitsui Bussan do Brasil Foundation as outlined below.

• Kaeru Project
  In a project led by the psychologist Dr. Kyoko Nakagawa to assist their adaptation to Brazilian school and society, children who have returned from Japan are supported emotionally, academically, and through support to their environment.

• PIPA Project
  The PIPA Project is a program for supporting children with autism, a disease which one out of every 100 is said to be suffering from. The program utilizes the DailyLife Therapy method, originally contrived in Japan to help autistic children live a social life independently. The program is administered by Beneficência Nipo–Brasileira de São Paulo (Japan Brazil Benevolence Association in São Paulo).

• Mitsui–Endowed Lecture Program at the University of São Paulo
  To deepen understanding of society, culture, and other aspects of Japanese life, and to foster human resources who can contribute to the future development of both countries, Mitsui funds a lecture event taking place one to two times a year bearing the Mitsui name. Japanese legal books are also donated to the University. For details see Foundation and Funds Activities in the Americas.

In this way, Mitsui makes social contributions in Japan and in Brazil with the idea of reaching a deeper understanding of Brazil, an important partner country for Mitsui. We hope that this activity will help to strengthen the ties between our two countries.
In October 2004, Mitsui pledged its support for the Global Compact, which is championed by the United Nations. The Global Compact is a set of principles that private companies agree to accept as guideline for action, focused especially in the four areas of human rights, labor, environment and anti-corruption, and Mitsui participated in the movement to establish an international framework for realization of sustainable development. In May 2008, in response to a call from the then British prime minister Gordon Brown, Mitsui signed a Business Call to Action declaration committing to corporate action aimed at achieving the United Nations Millennium Development Goals (MDGs) by the target year of 2015, and started the concrete approach toward that goal.

In September 2010, Mitsui agreed with United Nations Development Programme (UNDP) to construct a solar powered-operated pumping facility for irrigation water to a farming community in Mozambique, and signed an agreement with UNDP. It is currently under construction.

This program, in which UNDP and Mitsui utilize their respective knowledge and strengths toward the achievement of the MDGs of reducing poverty, is an example of action to support development based on a public–private partnership. Providing the Chibuto Millennium Village in Gaza Province with the infrastructure to supply irrigation water will aim to help the community to become self-sufficient and sustainable by increasing incomes through improvement of agricultural productivity.

Mr. Iijima, President of Mitsui attended an MDGs follow-up meeting which was held in Tokyo in June 2011, and introduced this program. He explained that an empowerment of the community people to encourage the sustainable independence economically is important, and for that purpose, a human resource development becomes the issue to be solved.

Thus, Mitsui contributes the realization of sustainable development for the developing countries through the business to contribute to achieve the MDGs.
Mitsui’s mission of developing human resources that can contribute to the betterment of society is premised on our human resource-oriented principles that have been passed down through the long history of our company. As a general trading company (sogo-shosha) that conducts business worldwide, we aim at fostering not only our employees but also many youths around the world who are poised to forge the futures of the wide range of countries and regions where we conduct business so that they can play leading roles on the global stage with an international perspective. In this regard, our company is engaged in various initiatives that contribute to society as outlined below.

Mitsui-Bussan Scholarship Program for Indonesia

Our relationship with Indonesia reflects the culmination of conducting business with the nation. Aspiring to build even stronger ties between Japan and Indonesia, we established the Mitsui-Bussan Scholarship Program for Indonesia in 1992 to support exceptional individuals who will someday contribute to further development of their country.

A distinguishing feature of the scholarship is that rather than targeting international students already studying in Japan, it is awarded instead to high school students in Indonesia who are excellent in both performance and personality and show a strong desire to study in a Japanese university, providing such recipients with support for their studies and living expenses for five and a half years, including time needed to prepare for university entrance exams. Selected on the basis of test and interview results, recipients of the scholarship come to Japan after graduating from high school. They initially spend one and a half years learning Japanese and studying for university entrance exams. They then take university entrance exams for faculties/departments of universities they hope to enter, and subsequently begin attending university upon passing respective exams.

The scholarship program goes beyond providing financial backing, and also involves fine-tuned support extending to care for the psychological needs of recipients. For instance, staff members affiliated with the program meet with recipients monthly to check on their studies and living situations, and also make opportunities for recipients to interact with other current recipients and former recipients who have graduated.

The scholarship program has thus far seen 21 former recipients to graduation, and currently provides support to 10 individuals. We remain committed to this and similar initiatives even beyond Japan and Indonesia that pursue educational opportunities for individuals who are poised to play a role on the global stage.
Other Scholarship Programs

- Mitsui Bussan Trade Promotion Foundation
- National University of Singapore
- Royal University of Phnom Penh (Cambodia)

Mitsui-Endowed Lecture Programs

**Peking University**

In 2006, in conjunction with Peking University, we established an endowed lectureship called the Mitsui Innovation Forum at Peking University. The 10-year program, ongoing until 2015, brings in heads of leading companies and distinguished Chinese and Japanese scholars who present their views on “innovation” to an audience of youth who are poised to forge China’s future. The six lectures are held annually and have featured speakers from Japan on 10 occasions and from China four times. Each of those lectures has drawn in audiences numbering between 200 and 300 people, comprised of Peking University undergraduate and graduate students, graduates of the university, as well as individuals affiliated with corporations and students from neighboring universities. Moreover, the vibrancy and enthusiasm of the Chinese youth attending the lectures has been clearly apparent, with some post-lecture question and answer sessions running for almost a full hour.

We remain committed to this program in hopes not only that it will help educate individuals, but also that it will lead to a deeper mutual understanding between Japan and China and encourage interaction between the two nations.

**Saint Petersburg State University**

Since 2007, Mitsui & Co. has hosted two Mitsui-endowed lectures annually at Saint Petersburg State University, a prestigious university in Russia whose alumni have included many prominent politicians and academics since its founding in the early 18th century. Through the program, we aim to encourage a deeper understanding of Japanese society and its culture, and to inspire individuals to help build amicable relations between Japan and Russia and to facilitate greater interaction between the two nations. The program invites lecturers from many fields, including business, politics, education and sports. They speak at the university on the subject of “innovation”, drawing from their own unique experiences, knowledge and philosophies, and convey to their audiences of student youth the importance of embracing dreams and aspirations. In addition to the Mitsui-endowed lectures, Mitsui also contributes to the university by providing scholarships to its students for international study in Japan and donating Japanese-language books and DVDs to the university to be used as teaching materials by SPSU’s Faculty of Oriental Studies.

Other Mitsui-Endowed Lectures

- Fudan University, Zhejiang University (China)
- University of Languages and International Studies–VNU (Vietnam)
- University of São Paulo (Brazil)
- John Carroll University; The City University of New York Baruch College, Columbia University (United States)
- Mitsui Endowed Professorship Fund at Dartmouth College (United States)
- University of Warsaw (Poland)

Japan Studies

**Mitsui Educational Foundation**

In 1971, Mitsui & Co. (Australia) Ltd. established the Mitsui Educational Foundation with the aim of bringing about greater mutual understanding and friendship among Japanese and Australian youth, while contributing to stronger ties between the two nations. Every year, the foundation selects 8 to 10 students from universities across Australia to send on a three-week study tour of Japan. The young visitors to Japan have shown a keen interest in learning about a wide range of topics and have been given opportunities while in Japan to visit universities and other educational facilities, companies, factories, and sites that play a significant role in Japan’s history and culture. The foundation also offers other opportunities for the participants to learn more about Japan, including placements with homestay families where the students are able to experience Japanese lifestyles firsthand, and chances for them to spend two days...
with university students who are bound for careers at Mitsui. As of 2012, the Mitsui Educational Foundation program has welcomed 321 students to Japan over the 41 years since it was first established. The foundation will continue to make it possible for students from Australia to gain a better understanding of Japan so that they may forge connections between Japan and Australia for years to come.

- National Future Farmers of America

Overseas Internships

Support for Overseas Internship Program

The Institute of National Colleges of Technology, Japan (Kosen) has embarked on initiatives to provide three-week internship opportunities since 2009. Through the internship program, Kosen has been sending technical college students and faculty members to overseas locations of Japanese companies. We feel that educating a pool of young engineers equipped with a broader perspective and the capacity to succeed on a global stage can help bring about greater globalization of Japanese society. Premised on that notion, Mitsui & Co. has been lending its support to the Kosen internship initiatives by seeking out Japanese companies that are willing to provide such opportunities, and subsequently introducing those firms to Kosen.

Participants of the overseas internship program have offered various observations at Mitsui-hosted annual forums for them to report on their experiences. Their feedback has included such comments as: they have become more determined to work harder at building capabilities as engineers; they now strive to communicate more proactively with others in all environments; they now take more initiative in structuring teamwork; and they now have better understanding of other cultures and are more accepting of them.

Since the program’s inception, 93 students have been sent on internships with 15 participating companies, while 24 students have gained internship experience at 9 companies outside of Japan in fiscal 2012.
The Mitsui USA Foundation, established in 1987 in New York, is Mitsui USA’s charitable arm for active, good corporate citizenship, running programs in U.S. communities where the Company does business. Historically, the Foundation has placed emphasis on higher education and employee participation. More recently, it has enhanced its giving to include the disabled community. Every year, the Foundation supports over 50 projects across the United States in four areas: education, community and disabled welfare, arts and culture, and action based on employee participation and corporate matching. Half of this budget is devoted to education-related activities, and there are many projects bearing the name of Mitsui USA.

(1) Education

Education is also a key area of activity for the Mitsui USA Foundation, as part of which it organizes Mitsui-Endowed Lecture Programs.

John Carroll University: begun in 1993, the Mitsui USA Distinguished Lecture series at John Carroll University in Cleveland, Ohio, is held at the opening of the university’s East Asian Studies Program. This high-level lecture series hosts expert speakers on Japan and other Asian countries in areas including politics, economics, culture, and history. Baruch College, The City University of New York: begun in 1994, the Mitsui USA Lunch Time Forum is held six times a year and hosts speakers from academia and the business world. The panel discussions on global issues have been well received and the program has proved very popular, attracting an audience of almost 200 including not only leading members of the university faculty, but also New York City employees and business people.

Columbia University: inaugurated in 2000, the CJEB/Mitsui USA Symposium is held once a year and sees speakers and panelists engage with graduate students and experts in animated question and answer sessions on a wide range of subjects, from analysis of the global economy to cutting-edge hedge fund techniques. Including a reception, the event provides a forum for effective interaction.

Other activities include scholarship programs for approximately 60 university students at some 40 universities in the U.S. and summer home-stays in Japan for 10 U.S. high-school students under the Youth for Understanding program.

(2) Community and Disabled Welfare

Among our wide-ranging support activities are the following programs: LifeStyle, in which people with disabilities play host to elderly people at dinner party events; Abilities, which provides disabled New Yorkers with vocational skills training and support in seeking employment; the art and music therapy program Mercy Home, held every Saturday for 40 autistic children; Citymeals-on-Wheels, which delivers meals to elderly people; and Special Olympics NY, which offers a wide range of sports training and sporting events to people with intellectual disabilities.

(3) Arts & Culture

Our activities here include support for Midori & Friends Foundation “Making Music” programs, which provide children in East Harlem, NYC, with flute, clarinet, saxophone, vocal and rhythm lessons.

(4) Employee Voluntary Activities

Support for Mitsui USA VTF (Volunteer Task Force) activities; March of Dimes walker participation; “Matching Gift” Program, whereby employees’ individual donations are matched with an equal donation from Mitsui; and “Special Match” programs for natural disaster relief support.

For more details visit The Mitsui USA Foundation website at:
Together with its local subsidiaries and associated companies, Mitsui Bussan do Brasil established the Mitsui Bussan do Brasil Foundation in February 2008. The Foundation supports activities aimed at cultivating human resources able to contribute to the development of friendship and the expansion of cultural exchange between Japan and Brazil.

**The Kaeru Project**

Led by psychologist Dr. Kyoko Nakagawa, this is a project to help children returning from Japan to adapt smoothly to Brazilian school and society. It is offered free of charge at municipal and state-run schools. Under the project, the Brazilian non-profit organization ISEC (Institute for Social and Cultural Solidarity) which Dr. Nakagawa belongs to and the São Paulo state education bureau work together to provide support to children in the three areas outlined below.

1) Emotional support (play, reading, creative writing, counseling, etc.)
2) Academic support (catch-up lessons, intensive courses, etc.)
3) Support to the children’s environment (guidance for parents, school supervisors and teachers, etc.)

Using the expertise gained, it is planned in the future to expand the project beyond the state of São Paulo through dispatching outreach activities, workshops, etc.

**PIPA Project**

In Brazil, one out of every 100 is said to be suffering from autism. The disease poses significant strains on families and society at large due to difficulties in coping with the disorder and added educational challenges brought about by the disorder. With that in mind, since 2006 Beneficência Nipo-Brasileira de São Paulo (Japan Brazil Benevolence Association in São Paulo) has been implementing the PIPA Project, an initiative designed to help autistic children become independent by engaging them with the Daily Life Therapy method which avoids reliance on medications that are conventionally used in Brazil to treat those with autism. The initiative was the first in Brazil involving the Daily Life Therapy, a treatment method contrived by Dr. Kiyo Kitahara, founder of Musashino Higashi Gakuen in Japan. Mitsui is contributing a portion of the funds needed to deliver the project in hopes of helping to enable a greater number of autistic children to gain better acceptance into society and lead more independent lives. The project targets not only Brazilian children of Japanese descent but also Brazilian children of other ethnic backgrounds, with a particular emphasis on economically disadvantaged youths. It is hoped that the Daily Life Therapy will become more recognized in Brazil and be adopted more widely, as positive outcomes emerge from the project.

**Mitsui-Endowed Lecture Program at the University of São Paulo**

This program is supported by a grant from the Mitsui Bussan do Brasil Foundation, and the University of São Paulo Law School’s Institute of International Law and International Relations, which hosts the program. The aim is to foster an understanding of Japanese society and culture, especially among students and young researchers at the university, and to develop human resources with the ability to contribute to the expansion of friendly relations between Japan and Brazil. Regular lecture programs are presented once or twice each year. Japanese legal books are also donated to the University.

**The Mitsui Canada Foundation**

The Mitsui Canada Foundation was established in 1981 to commemorate the 25th anniversary of Mitsui & Co. (Canada) Ltd. with the mission of promoting culture and education. In the field of Japanese language education, Mitsui & Co. (Canada) provides judges for a Japanese speech contest. In the field of community welfare, the foundation supports a Japanese Cultural Center and gives assistance to facilities providing nursing care to elderly Japanese residents of the Vancouver and Toronto areas. It also provides donations to six major Canadian universities, (Toronto, Alberta, British Columbia, Regina, Queen’s, and McGill).
The MGVP was initiated in October 2009 with the idea of engaging in social contribution activities which bring employees together.

1. Try it V-1000

The company makes donations in proportion to the number of employees who take part in voluntary activity.

(1) Period of tabulation: one-year period from October to September of the following year
(2) Amount of contribution: Number of participants × 1,000 yen.
(3) Donee: selected on a rotating basis by the Americas, EMEA (Europe, Middle East and Africa), and Asia Pacific Business Units.

The number of employees participating in the Try it V–1000 program of FY2012 (October 1, 2011, to September 30, 2012) was 2,668 and the amount donated 2,668,000 yen. This year the EMEA (Europe, Middle East and Africa) Business Units selected Kenyan NGO Ushirika International as the recipient of those funds.

Whereas the nation of Kenya continues to achieve development and is regarded as one of the best examples of economic growth in East Africa, it still faces a substantial and evidently growing disparity between the wealthy and the poor. This income gap is particularly apparent in regard to children from impoverished backgrounds in that even in cases where they attend a fully-subsidized public school, for instance, inadequate levels of classroom instruction and household conditions result in poor academic performance, while students typically find themselves forced to drop out of school and as a consequence miss out on the very limited opportunities available to gain scholarship funds that would enable them to access higher education.

Concerned by this state of affairs, Mr. Tohsiyuki Yano, formerly employed by a Japanese company and stationed in Kenya opted to remain in Kenya after leaving his company, established Ushirika International in 2010, and assumed head of the organization, so that through the organization he could work toward providing occupational training to Kenyan youth and offering assistance to destitute families. Mr. Yano also went on to establish South Mount Nkama Academy, a private school located in the township of Loitokitok situated at the foothills of Mt. Kilimanjaro in southern Kenya. In order to provide more opportunities for outstanding young students to benefit from higher education even if they come from poor families, the school sets tuition at levels affordable even to disadvantaged households while offering quality education in classrooms that feature low student–teacher ratios. Mr. Yano hopes that young people given such opportunities will someday become employed in well-established companies, thereby contributing to a workforce that can eventually help lift the areas that the students call home out of their current state of poverty.

On February 18, 2013, a celebratory event was held at the Nairobi office of Mitsui Europe to commemorate this round of donations, during which Itaru Nishimura, Deputy Chief Operating Officer of the EMEA Business Unit, presented the donation to Mr. Yano, head of Ushirika International. The organization intends to use the funds granted by Mitsui toward improvements to South Mount Nkama Academy.
2. Volunteer Month

With the aim of bringing employees together in voluntary activity, November each year is declared Global Volunteer Month, during which each donation through the Try it V-1000 program is automatically doubled and various activities, talks, and other events are planned and staged. In November 2011, approximately 450 employees from across Mitsui participated in voluntary activity.

3. MGVP Volunteer Work Report

A booklet entitled Mitsui Global Volunteer Program Volunteer Work Report, which presents the voluntary activities of Mitsui employees focusing on Global Volunteer Month, is printed in a run of around 10,000 copies and distributed to the entire staff.

TABLE FOR TWO (TFT) is a program run by the authorized NPO TABLE FOR TWO International with the aim of fostering the health of people in both developing countries and advanced countries. The program seeks to simultaneously resolve the problem of hunger in developing countries and the problem of lifestyle-related disease in advanced countries based on the slogan 'meal for one, health for two.'

Mitsui introduced the program from August 2008 in the staff cafeteria at the Tokyo Head Office, and has received a total of some 24,000 donations (as of March 2011). When employees select the relevant lunch option at the Mitsui cafeteria, the employee pays an extra 20 yen and the company matches it with a similar donation in what is known as a matching gift arrangement, so that TFT receives a donation of 40 yen for each meal. The price of a school meal in a developing country is said to be 20 yen, so that by selecting the TFT lunch option the employee provides enough for two school meals in Malawi, Uganda, or another country through TFT.

The concept behind Table for Two is of the participant in the advanced country and children in the developing country sharing a meal across the divide of space and time. Employees participate actively in this program in the hope that it will promote human health around the world.

From autumn 2011, a drink-based version of TFT known as CUP FOR TWO will be rolled out through drink vending machines at company offices.
TFT Point Card Program – Originated at Mitsui from an Employee Suggestion

One day, the Mitsui staff member in charge of the TFT program received an e-mail from a junior employee: ‘I support the TFT program and would like more of our staff to find out about it, so please let me help you promote it.’ This led to the formation of the TFT Junior Task Force. Currently around 60 employees participate voluntarily in the task force and work together on plans to roll out the program within the company.

One of the ideas that arose in this process was the TFT point card system, a unique development in the TFT program that originated at Mitsui. TFT stickers awarded with each purchase of the TFT lunch option are collected on a TFT point card (see TFT point card program). Every time 50 cards of 10 stickers each have been collected, in addition to the normal TFT school meal donation, Mitsui makes a separate donation of 100,000 yen to TFT. This donation goes to providing meals through TFT to the NGO Nkanyiso, sponsor of the Kids Program in the Republic of South Africa which supports children who lost their parents to HIV/AIDS. Under the point card scheme, started in July 2010, 100 cards were collected in six months and on March 5, the director of Mitsui’s Johannesburg branch office and members of the local staff visited the NGO.

We hope that other companies that participate in TFT will also introduce the TFT point card program and that support for the program will spread further and further.
In July 2005, Mitsui launched the Mitsui & Co., Ltd., Environment Fund as a grant program which aims to realize sustainable development by supporting various activities and research projects that contribute to solving global environmental problems.

The fund is operated by Mitsui itself and is supported mainly by finance from Mitsui, but also receives donations from company officers and employees, including retirees. Its grant programs consist of Activity Grants, which support activities by NPOs and other organizations to contribute to the environment, and Research Grants, which support environmental research by universities, research institutions, and other organizations.

Mitsui also encourages its officers and employees and retirees to apply grant projects and to take part in activities of grant projects.

Since FY2011, Mitsui has supported for efforts aiming to revitalize a sustainable society by improving and resolving environmental problems caused by the Great East Japan Earthquake.
