Independent Practitioner’s Assurance Report

Mr. Tatsuo Yamagata,
President and Chief Executive Officer,
Mitsui & Co., Ltd.

Hiroshi Inumiga
Chief Executive Officer
Deloitte Tohmatsu Evaluation and Certification Organization Co., Ltd.
3-5-1, Marunouchi, Chiyoda-ku, Tokyo

We have undertaken a limited assurance engagement of the sustainability information (the “sustainability information”) indicated with **X** for the year ended March 31, 2016, including “Proportion of female permanent staff and manager” and “Proportion of employees and management engaged in CSR” as of July 3, 2016, included in the “Sustainability Report 2016” and “Data of personnel affairs” created for the Company’s website (the “Report”) of Mitsui & Co., Ltd. (the “Company”).

The Company’s Responsibility

The Company is responsible for the preparation of the sustainability information in accordance with the calculation and reporting standard adopted by the Company (indicated with the sustainability information). CO2 quantification is subject to inherent uncertainty for reasons such as incomplete scientific knowledge used to determine emissions factors and material data.

Our Independence and Quality Control

We have complied with the independence and other ethical requirements of the Code of Ethics (for Professional Accountants) of the International Ethics Standards Board for Accountants, which is founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behavior. We apply International Standard on Quality Control (ISQC 1), Quality Control for Firms that Perform Audits and Reviews of Financial Statements, and Other Assurance and Related Services Engagements, and accordingly maintain a comprehensive system of quality control including documented policies and procedures ensuring compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Our Responsibility

Our responsibility is to express a limited assurance conclusion on the sustainability information based on the procedures we have performed and the evidence we have obtained. We conducted our limited assurance engagement in accordance with the International Standard on Assurance Engagements (ISAE) 3000 (ISAE3000), Assurance Engagements Other than Audits or Reviews of Financial Statements, and other International Standards on Assurance Engagements (ISAEs), ISAE 3006, Assurance Engagements on Greenhouse Gas Statements, issued by the IAASB and the Practical Guidelines for the Assurance of Sustainability Information, issued by the Japanese Association of Assurance Organizations for Sustainability Information.

The procedures we performed were based on our professional judgment and included inquiries, observation of processes performed, inspection of documents, analytical procedures, evaluating the appropriateness of qualification methods and reporting criteria, and verifying the methodology by reviewing records. These procedures also included the following:

-Evaluating whether the Company’s methods for estimates are appropriate and have been consistently applied. However, our procedures did not include testing the data on which the estimates are based or reperforming the estimates.
-Utilising dive visits to assess the competence of the data, data collection methods, source data and relevant assumptions applicable to this site.

The procedure performed to a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement. Consequently, for level of assurance obtained in a limited assurance engagement is substantially less than the assurance that would have been obtained had we performed a reasonable assurance engagement.

Limited Assurance Conclusion

Based on the procedures we have performed and the evidence we have obtained, nothing has come to our attention that causes us to believe that the Company’s sustainability information is not prepared, in all material respects, in accordance with the calculation and reporting standard adopted by the Company.

The above represents a translation, for convenience only, of the original Independent Practitioner’s Assurance report issued in the Japanese language.
